?ngel Planells'Art and the Surrealist Canon Anna Vives,2019-08-20 Having been mistakenly perceived as a follower of Salvador Dalí, Catalan surrealist painter and writer Àngel Planells (1901-1989) has passed through the history of art practically unnoticed. Yet his work suggests an influence on a number of works by Dalí, proving that a fairer way to define their relationship is as an artistic dialogue. His participation in the groundbreaking International Surrealist Exhibition in London in 1936 is in itself a marker of his quality as an artist, but Planells' contribution to surrealism is remarkable for his use of astronomy, fantastic scenes redolent of Edgar Allan Poe's narrative as well as ludic elements and meta-pictorial techniques that contest Fascism.

Musical Concerns Jerrold Levinson,2015 This volume presents a new collection of essays on music by Jerrold Levinson, one of the most prominent philosophers of art today. Music, Text and Translation Helen Julia Minors,2012-12-20 Expanding the notion of translation, this book specifically focuses on the transferences between music and text. The concept of 'translation' is often limited solely to language transfer.

It is, however, a process occurring within and around most forms of artistic expression. Music, considered a language in its own right, often refers to text discourse and other art forms. In translation, this referential relationship must be translated too. How is music affected by text translation? How does music influence the translation of the text it sets? How is the sense of both the text and the music transferred in the translation process? Combining theory with practice, the book questions the process and role translation has to play in a musical context. It provides a range of case studies across interdisciplinary fields. It is the first collection on music in translation that is not restricted to one discipline, including explorations of opera libretti, surtitling, art song, musicals, poetry, painting, sculpture and biography, alongside looking at issues of accessibility.

Handbook of Affective Sciences Richard J Davidson, Klaus R Sherer, H. Hill Goldsmith, 2009-05-21 One hundred stereotype maps glazed with the most exquisite human prejudice, especially collected for you by Yanko Tsvetkov, author of the viral Mapping Stereotypes project. Satire and cartography rarely come in a single package but in the Atlas of Prejudice they successfully blend in a work of art that is both funny and thought-provoking. The book is based on Mapping Stereotypes, Yanko Tsvetkov's critically acclaimed project that became a viral Internet sensation in 2009. A reliable weapon against bigots of all kinds, it serves as an inexhaustible source of much needed argumentation and-occasionally-as a nice slab of paper that can be used to smack them across the face whenever reasoning becomes utterly impossible. The Complete Collection version of the Atlas contains all maps from the previously published two volumes and adds twenty five new ones, wrapping the best-selling series in a single extended edition.

The Way of Music Robin Maconie, 2007 Here at last is a listener's guide to the hidden meanings of western classical music, expressed in accessible, jargon-free language and drawing on universal listening experiences and skills. *The Way of Music* is six booklets in one volume; it is a study guide in attention training, listening skills, and music appreciation for students, teachers, and the general reader. Each book is complete in itself, to be read and used as part of a multilayered database of musical meaning. Alternating aphorism and explanation, Books 1 and 2 inquire into hearing and communication processes using the example of a barking dog, while Books 3 and 4 extend the range of inquiry into the acoustics and performance of ethnic and classical music. Book 5 offers a substantial survey of over 100 examples of recorded music, providing a history of western music and culture, and incorporating discussion and assignment topics. The final book presents the range of class, gender, and cultural perspectives found in 101 adult student responses to the slow movement of Beethoven's Piano Concerto No. 4. Drawing on Robin Maconie's earlier work, *The Second Sense: Language Music and Hearing* (2002), *The Way of Music* presents many of the same insights in highly encapsulated form for readers in the text

message age, taking the discussion of classical music out of music departments and returning it to a broader public and educational arena. Student Observations: You learn logic, reason, and a sort of sensitivity to the passage of time from listening to classical music. Music, when one is trained to listen, helps to improve your senses. Your sense of hearing is heightened; you become more alert, because you are concentrating on many different instruments and sounds simultaneously. Music reaches beyond the improvement of academic performance to a realm of improvement of the human condition.
