EFT -Emotional Freedom Technique and Acupressure, Color Breathing, Visualization for Healthy Mind, Body and Clear Eyesight Clark Night, 2011-03-06 Color version. EFT is an Easy Type of Chinese Acupressure, Puncture without Needles or Hard Pressure. EFT is applied by 'TAPPING', activating energy points, meridians on/in the body with the fingertips. Tapping removes energy blocks, (stuck, stagnant energy), orients, 'polarizes', corrects, balances and strengthens the energy flow in the body, through the Meridians/Energy Pathways, Energy Points, Chakras, Nervous System. (Electric, Chi and other Energies, Physical and Spiritual.) Tai Chi, Qi Gong, Karate Energy Control Methods are related to EFT. EFT removes negative, destructive emotions, thoughts, feelings, stress from the mind/brain, system by correcting energy flow. The body's energies flow correct and strengthen. EFT balances and improves function of the left and right brain hemispheres. This produces good health, clear eyesight. Neck, chest, shoulder, eye muscle tension, stiff, infrequent eye 'shifting' movements, headaches, strain in the mind/brain, negative, unhappy past/present thoughts, emotions, experiences, blocked energy flow, lowered liver/kidney health, staring, squinting cause unclear eyesight. Negative, destructive thoughts, emotions, worry are a common cause of mental strain, back, chest, shoulder, neck, eye muscle tension and unclear eyesight. Lowered eyesight increases worry, mental strain, which then increases the body..., neck, eye muscle tension. Eye function is impaired. Light rays focus incorrect in the eye. Circulation to/in the eye lowers. Vision is more unclear. EFT, Nutrition, Natural Eyesight Improvement corrects these conditions; Blocked energy (experienced during a stressful event) happens first, before the negative emotions occur and locks them into the mind/body. Negative thoughts, emotions maintain blocked energy flow. Removing blocked energy first results in removal of the negative emotions, thoughts, feelings and often brings instant clear

eyesight. As EFT Tapping removes energy blocks, corrects the energy flow, resulting in removal of negative emotions, thoughts, feelings; the person can then place positive, constructive thoughts into the mind, system; think, feel in a positive, constructive way about the past or present stressful event. Positive thoughts, emotions help to correct and strengthen the body's energy flow. Correct energy flow is now maintained. Mental and physical health improve, eye function returns to normal, eyesight is 20/20 and clearer at all distances, close and far. Health of body organs, systems improve as energy flows correct throughout the body. EFT improves the function of the brain, visual cortex, left and right brain hemisphere activation, integration. This improves function of the brain with the eyes, retina, eye muscles and body. Eyesight and mental, physical health improve. Memory, imagination, math, science, speech, learning, creativity, art, music., skills - all functions of the brain, left and right hemispheres even the oldest, deep survival areas of the brain improve. This is a main treatment of Natural Eyesight Improvement. 20 free PDF E-Books: Natural Eyesight (Vision) Improvement Training+Do It Yourself-Natural Eyesight Improvement-Original and Modern Bates Method+Better Eyesight Magazine by Ophthalmologist William H. Modeling and Control for a Blended Wing Body Aircraft Martin Kozek,Alexander Schirrer,2014-10-27 This book demonstrates the potential of the blended wing body (BWB) concept for significant improvement in both fuel efficiency and noise reduction and addresses the considerable challenges raised for control engineers because of characteristics like open-loop instability, large flexible structure, and slow control surfaces. This text describes state-of-the-art and novel modeling and control design approaches for the BWB aircraft under consideration. The expert contributors demonstrate how exceptional robust control performance can be achieved despite such stringent design constraints as guaranteed handling qualities, reduced vibration, and the minimization of the aircraft's structural loads during maneuvers and caused by turbulence. As a result, this innovative approach allows the building of even lighter aircraft structures, and thus results in considerable efficiency improvements per passenger kilometer. The treatment of this large, complex, parameter-dependent industrial control problem highlights relevant design issues and provides a relevant case study for modeling and control engineers in many adjacent disciplines and applications. Modeling and Control for a Blended Wing Body Aircraft presents research results in numeric modeling and control design for a large, flexible, civil BWB aircraft in the pre-design stage as developed within the EU FP7 research project ACFA 2020. It is a useful resource for aerospace and control engineers as it shows the complete

Advanced Buteyko Breathing Exercises Artour Rakhimov, 2023-06-06 This book could be used in order to learn the Buteyko breathing method exercises even by people with poor results for the body oxygen test or the Buteyko CP test (less than 15 s). However, the best results, in cases of self-learning (or DIY methods), are achieved when the learner already has at least 25 s for the body oxygen test. This Kindle and PDF book is advanced, in comparison with other descriptions of Buteyko breathing exercises, in the following areas: The book describes relaxed breathing exercises for people with hypertension and panic attacks. These groups of learners are often unable to safely do breath holds and practice ordinary Buteyko reduced breathing exercises. Air hunger can worsen their symptoms. The book explains how to proceed from easy Buteyko breathing exercises to its more advanced types. This relates to breathing exercises with a moderate and strong degree of air hunger. Chapter 4 of this book provides practical scripts for the use of visualization and imagery during Buteyko breathing exercises. The book explains optimum and maximum durations for Buteyko breathing sessions. It also describes the phenomenon of overtraining due to Buteyko breathing exercises and steps that are necessary in order to solve this problem. Chapter 5 explains the phenomenon of a lost CO₂ sensitivity, which should not be confused with the blunted CO₂ sensitivity. The book provides practical step-by-step instructions how to overcome both of these health challenges using lifestyle changes and other special methods. The book describes instructions for application of Buteyko breathing exercises during physical activity. Chapter 6 describes the click effect that leads to nearly instantaneous transition to much better results for the body oxygen test (the CP test). For some (lucky) students, the click effect helps them to quickly break through 40 s threshold for the morning CP and achieve astonishing health benefits. These health effects include natural cravings for physical exercise and raw foods, sleep that is no longer than 4.5 hours (without trying), amazing clarity of mind, very high energy levels and other natural changes. The book does not include description of those lifestyle changes (related to sleep, physical exercise, diet and so forth) that lead to increased body oxygenation. It focuses on practice and progress related to the Buteyko breathing exercises.
