David Sanderson, Laura Bruce

Urbanization and Its Impact on Socio-Economic Growth in Developing Regions Benna, Umar, Benna, Indo, 2017-06-19 The social and economic systems of any country are influenced by a range of factors. As the global population grows in developing nations, it has become essential to examine the effects of urbanization. Urbanization and Its Impact on Socio-Economic Growth in Developing Regions is a pivotal reference source for the latest research findings on the role of urban growth on the socio-economic infrastructures in developing regions. Featuring extensive coverage on relevant areas such as job creation, sustainability, and transportation planning, this publication is an ideal resource for city development planners, decision-makers, researchers, academics, and students interested in emerging perspectives on socio-economic development.

Anthropology of Complex Society Gaya Pandey, 2021-01-01 The book Anthropology of Complex Society deals with characteristics of complex society and simple society. It also describes anthropological approaches to the study of complex society, folk-urban continuum, peasant culture, urban culture, impact of urbanisation and industrialisation. Institutions like marriage, family, kinship, religion and network system of Complex Society have found significant place in the book. Studies on peasant societies, castes, urban and industrial places by different scholars have been reviewed and analysed to know their main features. Town planning and its various aspects have also been highlighted.

Advanced Introduction to Social Innovation Frank Moulaert, Diana MacCallum, 2019 Social innovation (SI) has, in the last decade or so, become an important idea and concept in policy, practice and scholarship surrounding human development. It is often seen as an antidote to narrowly defined technological and market-oriented modes of innovation. Its historical significance and development, tied to centuries of struggles for social change, remain under-appreciated and unacknowledged. This Advanced Introduction explores the historical and contemporary meanings of social innovation and its relationship with political and social movements. It develops an understanding of SI as a form of ethical practice for meeting needs, transforming social relations, and collectively empowering communities to shape the future. Additionally, it proposes that ethical research should aim to be socially innovative in this sense and provides concrete suggestions of how this concern

can be embodied in action-research and community development methodologies.

International Perspectives on Knowledge and Quality Brian Hudson, Niklas Gericke, Christina Olin-Scheller, Martin Stolare, 2022-01-27

Drawing together an international author team from Australia, Finland, France, Germany, Norway, Sweden and the UK, this book examines how we might democratize and open up access to 'knowledge of the powerful' for all. This book moves beyond the narrow knowledge vs skills debate of the 20th century to interrogate the epistemic quality of education in schools, and is a valuable resource for reflecting on the design and implementation of teacher education. Based on a range of national studies by the Knowledge and Quality across School Subjects and Teacher Education network (KOSS), funded by the Swedish Research Council (2019-22), the chapters explore teachers' powerful professional knowledge and the implications this has for innovation in teacher education, policy and practice in educational settings.

Counting the Costs Jonathan Rigg, 1995

Written by an international panel of specialists on Thailand who share a common concern for the environment, this volume examines the causes and consequences of environment change both in the countryside and the urban areas of the Kingdom. The papers, however, in no sense reflect a common view; the authors embrace contrasting environmental ideologies in discussing a wide range of concerns. These include the role of Buddhism and tourism in promoting sustainable development, environmental systems of thought and action, the practicalities of water

pollution control in Bangkok and the Gulf of Thailand, and the changing bases of life and livelihood among the hill peoples of the North. The environment as an issue of concern is now important phase of assimilation, interpretation, prescription and action. The papers in this volume reflect this change.

Accessibility, Land Use and Transport Karst Geurs, 2006 How can accessibility be defined? How useful are different accessibility approaches in evaluating land-use and transport policy strategies? How can the economic benefits associated with accessibility changes be measured? What are the accessibility benefits of having a public transport service available as a transport option for unexpected future use? How can the land-use, transport and accessibility impacts of Dutch compact urbanisation policies implemented in the last decades be measured? The research presented in this thesis seeks to answer these and related questions. Results suggest that current practices in evaluating accessibility in the Netherlands can be improved using geographical accessibility measures within an integrated land-use/transport perspective. Another major outcome is formed by the possible significant benefits associated with option use of public transport services in addition to use and non-use benefits traditionally included in transport policy appraisal. Residents in the service area of regional railway links seemed to be willing to pay significant amounts for the continued availability of the railway links for unexpected future use. Dutch compact urbanisation policies were also shown to have contributed to the land-use and transport-related intentions of the Dutch national government. Without compact urban development urban sprawl would likely have been greater, resulting in greater car use and related environmental impacts, higher congestion and lower accessibility levels, along with stronger fragmentation of wildlife habitats.

Urban Growth in Emerging Economies Gordon McGranahan, George Martine, 2014-04-29 Along with globalization, urban transitions have been central in the southward shift in economic power towards the newly emerging economies. As this book shows, however, these transitions have not been painless, and it is important for the rest of the urbanizing world to learn from the mistakes. It examines the role of urbanization and urban growth in the emerging economies, taking the BRICS countries (Brazil, Russia, India, China and South Africa) as case studies. Their different approaches towards urbanization have shaped their historical development paths and assisted or constrained their futures. Several of the BRICS bear heavy burdens from past failures to accommodate urban growth inclusively and efficiently, and many other urbanizing countries in Asia and Africa are in danger of replicating their mistakes. The overriding lesson of the book is that cities and nations must anticipate urbanization, and accommodate urban growth pro-actively, so as not to be left with an enduring legacy of inequalities and lost opportunities. This book is aimed at students and researchers in urban studies and development studies. It will also be of interest to policy advisors concerned with urbanization and the role of cities in a country's development

Urbanization and Regional Sustainability in South Asia Sumana Bandyopadhyay, Chitta Ranjan Pathak, Tomaz Ponce

Dentinho,2019-11-09 This book examines urbanization and migration processes in South Asia. By analyzing the socio-economic impacts and infrastructural, environmental and institutional aspects of different conurbations, it highlights conflicts over agricultural land as well as the effects on health, education, poverty and the welfare of children, women and old people. The authors also explore issues of mobility; connectivity and accessibility of public services, and discuss the effective use of new urban-management tools, such as the concept of smart cities and urban spatial monitoring.

Handbook of Research on Social Impacts of E-Payment and Blockchain Technology Lai, P.C.,2021-12-10 The social landscape is undergoing a global change with the emergence of e-payment and blockchain technology. This new technology changes the ways in which consumers and businesses interact with each other. This dynamic offers both opportunities and challenges to the socioeconomic landscape. It is important to understand the strategies, opportunities, and challenges contained in the e-payment and blockchain sector. Indian Tribal Culture Gaya Pandey,2022-01-01 This book is an academic attempt of the author to present cultural features of Indian tribes, developmental efforts made by the Government to bring them in mainstream and socio-cultural changes which have occurred in different periods of time making them dynamic and progressive. The book is divided into twenty chapters dealing with the tribals of India. As we know that Indian tribals are found in every geographical region of India such as north-eastern Indian region, north-western Indian region, central Indian region, western Indian region and southern Indian region. Therefore, region-wise cultural practices have been presented in the book describing their social,

economic, political, religious, ritualistic, village, polyandrous, polygenous, movements, forest life, women and tribal identity. Changing models of tribal development, welfare programmes and developmental programmes launched by the Government have also found significant place in the book. Processes of socio-cultural changes like Hinduisation, Islamisation, Christianisation, Westernisation, modernisation, secularisation, urbanisation, industrialisation, globalisation, detribalisation, revitalisation, retribalisation and tribalisation have been presented in scientific manner. The book will be of great help to the students of Anthropology, Sociology, History and other social science subjects. It will also be useful to the candidates opting anthropology in different India level or State level competitive examinations and other scholars interested in understanding tribal culture development and change wholistically.

Urbanisation at Risk in the Pacific and Asia David Sanderson, Laura Bruce, 2020-05-05 This book presents practical approaches for tackling the threats from climate change and disasters to urban growth in Pacific island countries and Asian nations. With chapters written by leading scholars and practitioners, Urbanisation at Risk presents research and case studies from island countries across the Pacific, Cambodia, Nepal and the Philippines. The book explores and presents the theory, policy and practice of how governments, civil society, aid organisations and people themselves prepare for, withstand and recover better from urban disasters including windstorms, floods, earthquakes and fires, and the effects of climate change. This book is written for urban policy makers, researchers, humanitarian aid and development workers, and anyone interested in urbanisation, participatory approaches, disasters, resilience and climate change adaptation.
