The Wild Robot Protects Peter Brown, 2023-09-26 The action-packed third installment in Peter Brown's internationally bestselling *The Wild Robot* series takes Roz on an under-the-ocean journey to save her beloved island! Life for Roz and the animals on their island is perfect: wild, natural, harmonious. Her son Brightbill has even found a mate! But then, one day an injured seal washes ashore and warns of dangerous, cloudy waters that are flowing toward the island—and soon the animals are forced inland to fight over dwindling resources. Roz calms and organizes the animals, but the poison tide takes a terrible toll on the island. And when the robot discovers that her new body is waterproof, she marches into the waves and sets out across the ocean, determined to stop the poison tide. During her undersea journey, Roz encounters amazing geological formations and incredible creatures, and she sees the devastation caused by the toxic waters. Creatures she meets along the way direct her to a mysterious character known as the Ancient Shark, who explains that the poison tide is caused by a huge

station that floats on the waves; a station operated by humans and by robots. To stop them, the Ancient Shark is prepared to attack with an army of sea creatures. However, Roz hopes to find a peaceful solution, instead. Can the wild robot save the ocean and her island and everything she loves? This thrilling third installment of the Wild Robot series takes readers on a new adventure under the ocean and to the frigid northern waters where Roz may have to make the ultimate sacrifice.

The Wild Robot Peter Brown, 2016-04-19 Now a DreamWorks movie available on Prime Video! This #1 New York Times bestselling illustrated middle grade novel from a Caldecott Honor winner tells an extraordinary story full of action and thought-provoking questions as a robot learns to survive—and live—in the wilderness. Can a robot survive in the wilderness? When robot Roz opens her eyes for the first time, she discovers that she is all alone on a remote, wild island. She has no idea how she got there or what her purpose is—but she knows she needs to survive. After battling a violent storm and escaping a vicious bear attack, she realizes that her only hope for survival is to adapt to her surroundings and learn from the island's unwelcoming animal inhabitants. As Roz slowly befriends the animals, the island starts to feel like home—until, one day, the robot's mysterious past comes back to haunt her. From bestselling and award-winning author and illustrator Peter Brown comes a heartwarming and action-packed novel about what happens when nature and technology collide.

Multiagent Robotic Systems Jiming Liu, Jianbing Wu, 2018-10-08 Providing a guided tour of the pioneering work and major technical issues, Multiagent Robotic Systems addresses learning and adaptation in decentralized autonomous robots. Its systematic examination demonstrates the interrelationships between the autonomy of individual robots and the emerged global behavior properties of a group performing a cooperative task. The author also includes descriptions of the essential building blocks of the architecture of autonomous mobile robots with respect to their requirement on local behavioral conditioning and group behavioral evolution. After reading this book you will be able to fully appreciate the strengths and usefulness of various approaches in the development and application of multiagent robotic systems. It covers: Why and how to develop and experimentally test the computational mechanisms for learning and evolving sensory-motor control behaviors in autonomous robots How to design and develop evolutionary algorithm-based group behavioral learning mechanisms for

the optimal emergence of group behaviors How to enable group robots to converge to a finite number of desirable task states through group learning What are the effects of the local learning mechanisms on the emergent global behaviors How to use decentralized, self-organizing autonomous robots to perform cooperative tasks in an unknown environment Earlier works have focused primarily on how to navigate in a spatially unknown environment, given certain predefined motion behaviors. What is missing, however, is an in-depth look at the important issues on how to effectively obtain such behaviors in group robots and how to enable behavioral learning and adaptation at the group level. Multiagent Robotic Systems examines the key methodological issues and gives you an understanding of the underlying computational models and techniques for multiagent systems.

The Dark Matter of Children's 'Fantastika' Literature Chloe Germaine, 2023-09-21 Following the material turn in the humanities, this book brings perspectives from science and ecology into dialogue with children's fiction written and published in the UK and the USA in the 21st century. It develops the concept of entanglement, which originated in 20th-century quantum physics but has been applied to cultural critique, through a reading of Fantastika literature. Surveying a wide-ranging scope of literary texts, this book covers the gothic, fantasy, the Weird, and other forms of speculative fiction to argue that Fantastika positions entanglement as an ethical imperative that transforms our imaginative relationship with materiality. In so doing, it synthesizes perspectives from a similarly diverse range of areas, including ecology, physics, anthropology, and literary studies, to examine the storied matter of children's Fantastika as ground from which we might begin to imagine an as-yet-unrealised future that addresses the problems of our present.

The Machine Penalty Daniel B. Shank, 2025-04-22 This book makes the argument that comparing AI to humans leads us

to diminish similar outcomes from AI across situations. This may be taking a human's advice for a restaurant recommendation over an AI's or believing that AI can't be as biased as people can when denying loans to others. This machine penalty is caused both by comparing humans and AI in terms of appearance, identity, behavior, mind, and essence, and by situations involving controllable, personal, important, subjective, or moral decisions. It can be applied across many different situations, where we diminish different AI outcomes. We penalize machines' influence when they give advice, fairness when they evaluate people, blame when they cause harm, value when they produce art, and satisfaction when they provide companionship. The result is immediate consequences in those domains and downstream consequences for society. This monograph brings together diverse research from human-computer interaction, psychology, sociology, and communication including theories such as Computers Are Social Actors, anthropomorphism, mind perception, and algorithm aversion to present an expansive argument and evidence for the machine penalty.

Technologies for Children Marilyn Fler,2023-07-10 Technologies for Children is a comprehensive guide to teaching design and digital technologies to children from birth to 12 years. Aligned with the Early Years Learning Framework and the Australian Curriculum: Technologies, this book provides practical ideas for teaching infants, toddlers, pre-schoolers and primary-aged children. The third edition includes expanded content on teaching digital technologies, with a new chapter on computational thinking. Key topics covered include food and fibre production, engineering principles and systems, and computational thinking. The content goes beyond discussing the curriculum to consider technology pedagogies, planning, assessment and evaluation. Case studies drawn from Australian primary classrooms and early childhood centres demonstrate the transition from theory to practice. Each chapter is supported by pedagogical reflections, research activities and spotlights, as well as extensive online student resources. Written by Marilyn Fler, this book presents innovative, engaging and student-centred approaches to integrating technologies in the classroom.

Curating Community Collections Mary Schreiber,Wendy K. Bartlett,2024-01-25 Begins where diversity audits end, informing and supporting academic, school, and public librarians in the quest to embed diversity, equity, and inclusion in a meaningful and sustainable manner throughout collections, policies, and practices. A primary question for many librarians, directors, and board members is how to evaluate diversity in a collection on an ongoing basis. *Curating Community Collections* provides librarians with the tools they need to understand the results of diversity audits and to formulate a reasonable, achievable plan for increasing diversity, equity, and inclusion not only in the collection itself, but also in library collection policies and practices. Information on ways to make diversity, equity, and inclusion part of a library's everyday workflow will help ensure the sustainability of these principles. Mary Schreiber and Wendy Bartlett teach readers how to

increase the number of diverse materials in their collections and make them more discoverable to library patrons through the implementation of a community collections program. Stories from librarians around the United States and Canada who are auditing and improving the diversity of their collections add broad, scalable perspectives for libraries of any size, budget, and mission. Action steps provided at the end of each section offer a practical road map for all types of libraries to curate a diverse, equitable, and inclusive community collection.

European Robotics Forum 2025 Marco Huber,Alexander Verl,Werner Kraus,2025-05-21 This book presents a selection of peer-reviewed papers from the 16th European Robotics Forum (ERF) of euRobotics, the European Robotics Association, held in Stuttgart, Germany, from March 25-27, 2025. ERF is Europe's leading event for robotics and AI, bringing together researchers, industry experts, and policymakers to discuss advancements and strategic priorities in the field. The book includes 49 high-quality papers, chosen through a rigorous review process from 100 submissions. Contributions are organized into two main areas: • Robotics—Covering topics such as mechatronics, kinematics, dynamics, and safety. These papers highlight key developments in traditional robotics domains. • AI for robotics—Focusing on machine learning, foundation models, computer vision, and hybrid. AI approaches. This section explores the integration of AI into robotic systems. Providing insights into the latest research and technological advancements, this book serves as a valuable resource for researchers, engineers, and professionals working at the intersection of robotics and AI.

The Power of a Rich Reading Classroom CLPE,2020-02-06 There is something quite magical about forming a connection to a book: the way in which the words on the page can conjure feelings of excitement, fun, joy, laughter or tears, channeling the part of our being that fundamentally makes us human. The journey that children take as they travel towards becoming a competent and confident reader can be a long, winding and complex road. This book helps teachers understand how to build a quality reading rich curriculum that supports the needs of all the children in their classroom. Starting with a section on choosing texts, the book goes on to explore a variety of essential teaching approaches from a read aloud programme, to drama and storytelling, art and illustration. This is a practical resource that provides teachers and schools ideas to support the embedding of text experience and deliver a reading rich curriculum that leads to higher student attainment and working at greater depth.
