Essays for Studying (1984, To Kill a Mockingbird, Fahrenheit 451) Lukas, 2019-09-17 These essays are written for the students who study a famous all over the world novels. An essays contains basic facts from the writer's (George Orwell, Harper Lee, Ray Bradbury) biographies, the plot of the books (anti-utopia 1984, To Kill a Mockingbird, Fahrenheit 451) are retold, and the main characters and ideas are characterized. It is also shown how the books influenced the literary process and other writers. • The only mistake George Orwell made in his anti-utopia 1984 was the date. A lot of things that he described as if happening in 1984 can be observed in the nowadays world. However, he depicted the future that everyone should be afraid of at any time. "I am sure that totalitarian idea lives in the consciousness of intellectuals everywhere, and I tried to follow this idea till the end. My story is set in England to emphasize that English speaking nations are not better than others and that the totalitarianism can win everywhere if it is not fought against", George Orwell wrote not long before his death. • To Kill a Mockingbird is an anti-racist novel, a historical drama of the Great Depression and a sublime example of the Southern writing tradition. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime. • The book's tagline explains the title: Fahrenheit 451" – the temperature at which book paper catches fire, and burns... In a terrifying care-free future, a young man, Guy Montag, whose job as a fireman is to burn all books, questions his actions after meeting a young woman and begins to rebel against society. Fahrenheit 451 is a dystopian novel by American writer Ray Bradbury, published in 1953.

The Projected and Prophetic: Humanity in Cyberculture, Cyberspace, and Science Fiction Jordan J. Copeland, 2020-03-31 This volume was first published by Inter-Disciplinary Press in 2011. The papers collected in this volume document the exchange and development of ideas that comprised the 5th Global Conference on Visions of Humanity in Cyberculture, Cyberspace, and Science Fiction, hosted at Mansfield College, Oxford, United Kingdom, in July 2010. As in the past, the conference was driven by questions related to how cyberculture, cyberspace and science fiction can provide new insights into the nature of what it is to be human and the understanding of what it means for human beings to live in communities. In addition to these recurring themes, there is just as importantly a disposition that is shared by those participating in this

volume. The authors, as well the writers, thinkers, and filmmakers they consider in their essays, demonstrate an intrepid and inquisitive approach that tests age-old questions within the rapidly expanding, but still vaguely defined spaces that new technologies have afforded us. Moreover, in many ways, the conference and present volume reflect their subject, which has always been situated self-consciously and comfortably between the receding boundaries that have traditionally served both to delineate various academic disciplines and to distinguish real scholarship from popular discourse. Thus, as evidenced in the chapters of this volume, the conference benefited from the participation of delegates who represented a variety of fields, methodologies, and perspectives.
