Summary of John Taylor Gatto's Dumbing Us Down Everest Media, 2022-03-27T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 I used to teach English language and literature, but I don't anymore. I teach school, and I win awards doing it. The seven lessons that make up a national curriculum are taught from Harlem to Hollywood Hills. #2 The first lesson I teach is confusion. I teach my students that everything I teach is out of context. I teach them disconnections, and I teach them too much. They learn about things in depth, but they learn about them like children learn the catechism or the Thirty-nine Articles of Anglicanism. #3 I teach my students that they must stay in the class where they belong. I don't know who decides where my kids belong, but that's not my business. I make sure they understand their place in the pyramid. #4 The third lesson I teach is indifference. I teach students not to care too much about anything, even though they want to make it appear that they do. They must become totally involved in my lessons, but when the bell rings, they must turn on and off like a light switch.

Weapons of Mass Instruction John Taylor Gatto, 2010-04-01 The transformation of schooling from a twelve-year jail sentence to freedom to learn. John Taylor Gatto's *Weapons of Mass Instruction*, now available in paperback, focuses on mechanisms of traditional education which cripple imagination, discourage critical thinking, and create a false view of learning as a byproduct of rote-memorization drills. Gatto's earlier book, *Dumbing Us Down*, introduced the now-famous expression of the title into the common vernacular. *Weapons of Mass Instruction* adds another chilling metaphor to the brief against conventional schooling. Gatto demonstrates that the harm school inflicts is rational and deliberate. The real function of pedagogy, he argues, is to render the common population manageable. To that end, young people must be conditioned to rely upon experts, to remain divided from natural alliances and to accept disconnections from their own lived experiences. They must at all costs be discouraged from developing self-reliance and independence. Escaping this trap requires a strategy Gatto calls open source learning which imposes no artificial divisions between learning and life. Through this alternative approach our children can avoid being indoctrinated-only then can they achieve self-knowledge, good judgment, and courage.

The Underground History of American Education John Taylor Gatto, 2001 The underground history of the American education will take you on a journey into the background, philosophy, psychology, politics, and purposes of compulsion schooling.

A Different Kind of Teacher John Taylor Gatto, 2000 Gatto analyzes the roots of the modern American education system, outlining prescriptions for revitalizing the system, advocating greater emphasis on critical analysis, creativity, practicality, and real-world exposure in the curriculum. He calls on educators and administrators to acknowledge student's need for a spiritual and ethical framework upon which to build a good life.

The Learning Game Ana Lorena Fábrega, 2023-09-05 How did we conclude that the best way to prepare kids for the future is to cluster them into classrooms by age and grade, forcing them to learn the same things, at the same time and pace, seven hours a day, five days a week, for twelve years? We trust the school system to prepare our kids for the future. We get excited when they get good grades, or disappointed if they don't. But we rarely stop to question whether school is teaching

our children the right things in the right way. Kids could get good at playing the game of school, but are they really learning? Teacher-turned-edupreneur Ana Lorena Fábrega, known by her students as Ms. Fab, invites us to rethink education. In *The Learning Game*, she reveals how traditional schooling has gone wrong, and proposes a series of actionable strategies to help kids learn. What if we guide kids to think for themselves? Should we encourage kids to take risks and tackle projects of their own? How do we help kids learn to love learning? Answering these questions and many more, *The Learning Game* will arm you with practical tools to design a new approach to learning—one that leaves behind the game of school and prepares your kids for the game of life.

The State of the American Mind: Stupor and Pathetic Docility Amechi Okolo PhD, 2010-06-10 This book, *The State of the American Mind: Stupor and Pathetic Docility* Volume One begins to unravel some of the most obvious, perplexing, embarrassing and enduring problems and contradictions of American history and sociology, viz., how could the American revolution that started with the most ringing and most inspiring Declarations of human equality in world history end up establishing the most vicious, exploitative society the world ever knew Black chattel slavery and only ten percent white enfranchisement, etc. Further, how could men of such great wisdom and intellect like George Washington, James Madison, Thomas Jefferson, and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil, because they had variously experienced white servitude and slavery themselves, collude to establish and institutionalize the horrible system of Negro chattel slavery in America; and also disenfranchised over 90 percent of people of their own race actions that racism could not explain. The structural/institutional slavery system they established, and the resultant consequent racism hobbles America today as it did in the past, and forced Eric Holder, the Attorney General to declare that, America is a nation of cowards, when it comes to race discussions. Thus, this book starts with serious critical discussions of race in America and reveals what no textbook has ever done, viz., that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains. Further, the book also shows the year Black slavery started something almost, all textbooks got wrong. It also shows who, was the first Black slave in America something no textbook ever mentions. It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues that America avoids but must be frankly discussed for America to move forward. This book therefore shatters the two dominant themes of Americas history and sociology that Blacks were brought into America in chains as slaves while whites came to America in search of freedom, as Obama famously told us in his race speech. Thus, the crowning lesson of this book, in addition to discussing some critical policy issues like education, health care, etc., is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry, their

universal history and experience of servitude, bond-indentures and slavery. Nothing is more universal, more common and more shared in American history and sociology than the fact that most of our ancestors, black and white, were servants, bond-indentures and slaves who were dominated and super-exploited by few overlords. Colonial America was the preferred dumping ground for British, outcasts, rejects, criminals, masterless class, vagabonds, bond-indentures, slaves, etc., until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens. Thus, that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom because of the obvious reason that good, powerful achieving citizens do not normally emigrate to new uncharted lands.

The Joy of Slow Leslie M. Martino, 2024-08-13 A parent's guide to cultivating an unhurried lifestyle and education that help their children thrive In a culture that prizes productivity, efficiency, and success, it's easy to feel as though we're constantly falling short and to lose sight of joy. The homeschool community is not exempt from this pressure, but longtime educator Leslie Martino shows parents how to slow down to recapture the delight and depth that are hallmarks of meaningful learning. In *The Joy of Slow*, she offers practical guidance on: creating daily rhythms that celebrate the ordinary and make space for spontaneity supporting children as they explore personal interests and engage in self-directed learning tracking students' progress in ways that might be overlooked by traditional assessments prioritizing connection with other people and the natural world While parents of young children are more likely to embrace a slow childhood that nurtures wonder and imagination, panic often sets in as kids grow older, and parents worry about preparing them for the world beyond school. These fears are exacerbated by learning challenges, unspoken competition among peers, and standardized assessments. *The Joy of Slow* offers a much-needed reset, inspiring parents to prioritize the needs of each individual child and to help them find renewed freedom and passion.

Take Back the Land Rick Boyer, 2011-10-01 This is a book for young people. It was written because I believe young people are important and that they have a huge part in God's plan for the future of America and the Church. In fact, you are the future, and a big part of the present, too. – Rick Boyer, *The Learning Parent* God is calling you to greatness. No excuses. Be ready to answer the call. As a young person, you have the chance to impact the future in a positive, godly way. The question is: Are you ready for the challenge? If you're a believer in Jesus Christ, your calling is to change the world. All you need to get started is the desire to influence your country and church in a positive way. Home schooling and the strength of the Christian family is helping to produce the future leaders of our culture, those with the potential to lead decades of revival and national reformation. If you ignore the challenge, there is little hope for America. A lot depends on you. So, here is the challenge: Grow up. Now. Get busy. Take responsibility to change this world for God, because that's exactly what He expects you to do. Your life matters, and God wants to make your life great. It won't be easy, and reading this book, you may feel it's

being a little tough on you. There are high expectations and little allowance for excuses. Life isn't easy, but strive to make it a worthy one. Pioneer missionary William Carey once said, Attempt great things for God. Expect great things from God. Take Back the Land is an important, landmark book for the homeschool movement. Written by homeschooling pioneer Rick Boyer, its message is aimed at the Joshua Generation whose special mission is nothing less than taking America back to its Christian roots. The author explains the meaning of this great mission and why he believes the Joshua Generation has been chosen by the Lord to carry it out. - Samuel Blumenfeld, columnist The New America Take Back the Land is a call to young adults to get busy for the kingdom, to take the Word of God seriously and apply it in every area of life. Great exhortation to pray, seek wise counsel and act! Filled with ways that young adults can make an impact on the world that God created. Well done Mr. Boyer! Well done!" - Corey Cheney, Christian Home Educators of Colorado and Homeschool Update Magazine

College Without High School Blake Boles,2009-09-01 Because the real world is the best education. High school can be boring. High school curriculum can be frustrating and out of touch. So what is the answer for young people whose creativity, bright ideas, and boundless energy are being stifled in that over-scheduled and grade-driven environment? What would you do if you could go to college without going to high school? Would you travel abroad, spend late nights writing a novel, volunteer in an emergency room, or build your own company? What dreams would you be pursuing right now? College Without High School shows how independent teens can self-design their high school education by becoming unschooled.

Students begin by defining their goals and dreams and then pursue them through a combination of meaningful and engaging adventures. It is possible to pursue your dreams, and gain admission to any college of your choice. Boles shows how to fulfill college admission requirements by proving five preparatory results: intellectual passion, leadership, logical reasoning, background knowledge, and the capacity for structured learning. He then offers several suggestions for life-changing, confidence-building adventures that will demonstrate those results. This intriguing approach to following your dreams and doing college prep on your own terms will be welcomed by students (and their parents).

The Empty Campus Sergio Caldarella, 2016-11-26 The Empty Campus, starting from a documented series of cultural premises, depicts an image of society rooted in the ideas of education, real learning, knowledge, and understanding that could serve as an antidote to many of the wrongdoings of our species. The main goal of this essay is to address some of the worst facets of the current situation of learning and the overall cultural situation of our time, pointing to its human and political implications. The Empty Campus grows from a profound concern for the deepest roots of what makes us civilized beings and the passion for learning and understanding that defines civilization in its opposition to barbarism.

Homeschooling Ginny Yurich, MEd, 2025-05-27 During the past five years, homeschooling rates have been on the rise and show no signs of slowing. But many parents lack confidence, questioning whether they are doing it right (or whether they should take the plunge at all). With so many voices offering conflicting advice, it's hard to know where to start and where to go from there. A homeschooling mother of five and founder of 1000 Hours Outside, Ginny Yurich draws from her years of experience and research, as well as her master's degree in education from the University of Michigan, to encourage and equip parents who want to give homeschooling a try or want to improve their experience. Starting from the standpoint of you're doing it right instead of you're doing it wrong, Ginny helps parents understand that just by choosing to homeschool they are · learning through living · allowing for individual timelines · leaving space for boredom · providing multiage experiences · teaching self-reliance · offering freedom · slowing down · and more If you've been on the fence about homeschooling or wondering if you're doing it all wrong, let Ginny encourage you in all you've already accomplished and equip you for even greater things ahead.

Freefall of the American University Jim Nelson Black, 2012-12-03 It's happening in colleges all across the country. Instead of being educational institutions designed to encourage the free discussion of ideas, universities have become prisons of propaganda, indoctrinating students with politically correct (and often morally repugnant) ideas about American life and culture. This book exposes the liberal bias in today's universities, providing hard evidence, in clear and unimpeachable terms, that shows how today's colleges are covertly and overtly proselytizing with leftist slants on sexuality, politics, and lifestyles. By naming names and providing specific and credible insights from faculty members, administrators, professional observers, and analysts who have witnessed and chronicled the intellectual and ethical collapse taking place within the academy, this book offers a broad overview of the issues, the history of the problems, analysis from a broad range of academics and professionals, and also observations of the university students themselves, in their own words, from schools all across the nation.
