Critical Method and Contemporary Film Christopher K. Brooks, 2019-09-24 This volume offers film enthusiasts and teachers an investigation into what film critics do and examines what ideologies inform their evaluations. By employing recent television programs and films and comparing them to older ones, the study is able to trace changes in the methodologies of film and media critics. The work argues for the emergence of neofuturism as a chosen method of interpretation, contrasting with the dominance of postmodernism as the evaluative method through the early years of the new millennium. It also asks the questions who evaluates film and why? In doing so, the study questions the criteria for film evaluation, the validity of some reviews, and asks the question whether the evaluative system needs to change altogether.

Black Children in Hollywood Cinema Debbie Olson, 2017-03-14 This book explores cultural conceptions of the child and the cinematic absence of black children from contemporary Hollywood film. Debbie Olson argues that within the discourse of

children's studies and film scholarship in relation to the conception of "the child," there is often little to no distinction among children by race—the "child" is most often discussed as a universal entity, as the embodiment of all things not adult, not (sexually) corrupt. Discussions about children of color among scholars often take place within contexts such as crime, drugs, urbanization, poverty, or lack of education that tend to reinforce historically stereotypical beliefs about African Americans. Olson looks at historical conceptions of childhood within scholarly discourse, the child character in popular film and what space the black child (both African and African American) occupies within that ideal.

STEAM Meets Story Gloria D. Campbell-Whatley, Diane Rodríguez, Jugnu Agrawal, 2021-06-11 This innovative STEAM guide will help general and special education teachers to increase effective instruction with adolescents (grades 5-10). The authors show teachers how to link STEM concepts with popular fiction and film selections as a catalyst to launch student interactions, discussions, projects, and investigations. This approach will promote problem solving and reasoning skills by initiating the scientific process, rather than simply presenting established facts. The book includes a wealth of lesson plans that connect abstract STEM ideas to realistic experiences that students encounter. Sample lessons call on students to produce drawings and models that move STEM to STEAM. Grounded in popular film and some of the most-read young adult books, the text includes teaching strategies found to be effective with traditionally underserved students and those with disabilities. Book Features: Standards-based STEM lessons interrelated and interwoven with writing, reading, speaking, and other skills. Practical ideas and hands-on activities for engaging adolescents in both traditional and virtual environments. Guidance for working with diverse populations, such as students with different abilities, culturally and linguistically diverse students, translingual students, and transnational students. Templates, handouts, and lessons linked to *Star Wars*, *The Giver*, *The Immortal Life of Henrietta Lacks*, *Harry Potter*, *To Kill a Mockingbird*, *Star Trek*, *The Matrix*, *Holes*, and more.
