Paratexts and Performance in the Novels of Junot Díaz and Sandra Cisneros Ellen McCracken, 2016-04-30 Part of a new phase of post-1960s U.S. Latino literature, *The Brief Wondrous Life of Oscar Wao* by Junot Díaz and *Caramelo* by Sandra Cisneros both engage in unique networks of paratexts that center on the performance of latinidad. Here, Ellen McCracken re-envisions Gérard Genette's paratexts for the present day, arguing that the Internet increases the range, authorship, and reach of the paratextual portals and that they constitute a key element of the creative process of Latino literary production in 21st century America. This smart and useful book examines how both novelists interact with the interplay of populist and hegemonic multiculturalism and allows new points of entry into these novels.

Virginity in Young Adult Literature after *Twilight* Christine Seifert, 2015-01-27 Around 2005 something surprising happened in young adult literature: YA books became obsessed with presenting characters who wanted to have sex but couldn't—at least not without losing something vital to their identity. Since the publication of *Twilight*, the YA market has

been flooded with books that feature naive virgins finding true love. While some YA novels do present nuanced depictions of sex and of healthy sexual relationships, the fiction most popular with young adult readers presents adolescent girls as virginal sex objects waiting to be fulfilled by their love interests. In *Virginité in Young Adult Literature after Twilight*, Christine Seifert looks at an alarming trend in YA novels. Labeling this phenomenon “abstinence porn,” Seifert argues that these novels that fetishize virginity are harmful to readers. Like pornography, such works reduce female characters to objects whose sexual acts are the sole expression of their identities. Chapters in this book examine paranormal, dystopian, and contemporary romance, paying particular attention to recurring virginity themes or tropes. The book also provides an antidote by showing how some sex-positive teen novels provide more empowering messages to readers. Organized by genre, the books were selected for this study based on their popularity with teens. Exploring how messages about virginity are sustained and repeated from text to text, this book also calls out key reader reactions to demonstrate how they are responding to these messages. Featuring a list of discussion questions, *Virginité in Young Adult Literature after Twilight* will be a valuable resource for teachers, librarians, parents, and mature young adult readers.

Mediation and Multimodal Meaning Making in Digital Environments Ilaria Moschini, Maria Grazia Sindoni, 2021-11-15 This collection explores the mediation of a wide range of processes, texts, and practices in contemporary digital environments through the lens of a multimodal theory of communication. Bringing together contributions from renowned scholars in the field, the book builds on the notion that any form of digital communication inherently presents a rich combination of different semiotic modes and resources as a jumping-off point from which to critically reflect on digital mediation from three different perspectives. The first section looks at social and semiotic practices and the implications of their mediation on artistic production, cultural heritage, and commerce. The second part of the volume focuses on dynamics of awareness, cognition, and identity formation in participants to digitally-mediated communicative processes. The book’s final section considers the impact of mediation on shaping new and different types of textualities and genres in digital spaces. The book will be of particular interest to scholars, researchers and students in multimodality, digital communication, social semiotics, and media studies.

Distributed computing covers methods and technology to build complex computational systems composed of collaborating software components scattered across diverse computational elements. Intelligent computing offers a hybrid palette of methods, techniques and their applications ranging

from classical artificial intelligence, information and data sciences, multi-agent technologies or computational intelligence to more recent trends such as swarm intelligence, bio-inspired computation, cloud computing, machine learning or social/cyber-physical trust and security.

New Adult Fiction Jodi McAlister, 2021-11-18 The term 'new adult' was coined in 2009 by St Martin's Press, when they sought submissions for a contest for 'fiction similar to YA that can be published and marketed as adult - a sort of 'older YA' or 'new adult'.' However, the literary category that later emerged bore less resemblance to young adult fiction and instead became a sub-genre of another major popular genre: romance. This Element uses new adult fiction as a case study to explore how genres develop in the twenty-first-century literary marketplace. It traces new adult's evolution through three key stages in order to demonstrate the fluidity that characterises contemporary genres. It argues for greater consideration of paratextual factors in studies of genre. Using a genre worlds approach, it contends that in order to productively examine genre, we must consider industrial and social factors as well as texts.

SAMPLE EXCERPT: "What was the inspiration behind the creation of this book?" Although many people have expressed how much Bared to You resembles Fifty Shades of Grey, Day said in interviews that her real inspiration for writing this book is her own novel, Seven Years to Sin. It is a historical novel also dealing with a couple recovering from difficult, abusive pasts. In Seven Years to Sin, the main characters were brought together by their histories. But Day wondered how it would be like if the past of two people very attracted to each other push them apart. What if their trauma inhibits them from connecting with the person they are in love with? Can an abuse survivor be able to have a functional and healthy romantic relationship with another abuse survivor? Day wanted to explore that. This premise, the desire to answer these questions at least in the context of a story, resulted in the plotline that will encompass the three books in the Crossfire series. - - - - Don't miss out! It's highly recommended. if you're a real literature junkie or a diehard fan of the novel (I am both) it's really a must read. Highly recommended. - ForTheQuinn (Austin, TX, US) Disclaimer: This work is not meant to replace, but to complement the original work. If you've loved the novel, then this is the book for you. It is educational in purpose, entertaining in nature, unauthorized and unofficial. It is a digestive work produced to stimulate the appetite and to encourage readers to appreciate the original work even more.

Web Indicators for Research Evaluation Michael Thelwall, 2022-05-31 In recent years there has been an increasing demand for research evaluation within universities and other research-based organisations. In parallel, there has been an increasing recognition that traditional citation-based indicators are not able to reflect the societal impacts of research and are slow to appear. This has led to the creation of new indicators for different types of research impact as well as timelier indicators, mainly derived from the Web. These indicators have been called altmetrics, webometrics or just web metrics. This book describes and evaluates a range of web indicators for aspects of societal or scholarly impact, discusses the theory and practice of using and evaluating web indicators for research assessment and outlines practical strategies for obtaining many web indicators. In addition to describing impact indicators for traditional scholarly outputs, such as journal articles and monographs, it also covers indicators for videos, datasets, software and other non-standard scholarly outputs. The book describes strategies to analyse web indicators for individual publications as well as to compare the impacts of groups of publications. The practical part of the book includes descriptions of how to use the free software Webometric Analyst to gather and analyse web data. This book is written for information science undergraduate and Master's students that are learning about alternative indicators or scientometrics as well as Ph.D. students and other researchers and practitioners using indicators to help assess research impact or to study scholarly communication.
