Anna Botsford Comstock

Handbook of Nature Study Anna Botsford Comstock ,2016-05-31 For decades, Handbook of Nature Study has been a matchless resource for teachers, naturalists, and anyone curious about the world around them. Originally written in 1911 and later revised by a group of naturalists in 1939, this classic work remains as valid and helpful today as it was back then. Anna Botsford Comstock crafted this handbook primarily for elementary school teachers who had limited knowledge of common plants, animals, and the natural environment. Whether you're in an urban setting or the rural outback, this treasure trove of information provides insights into the living and nonliving things that surround us.

Apples, Pumpkins, and Harvest Ann Flagg,1998 Activities and lesson plans for units on autumn, fall season, or fruits and vegetables for children in grades K-1. Includes poster on the growth of an apple.

Even More Everyday Science Mysteries Richard Konicek-Moran,2010 What are the odds of a meteor hitting your house? What are warm clothes anyway? Do you get more sunlight from Daylight Saving Time? Everyone loves a good mystery and these unfold in the 15 stories presented in Even More Everyday Science Mysteries, the third volume in author Richard Konicek-Moran's award-winning series. Again, the author uses stories without endings to teach a science principle, allowing the students to investigate how each story can be resolved. All the stories relate to the world around us and encourage students to take ownership of their learning. In Here's the Crusher, family members ponder what could have crushed a plastic soda bottle sitting on a table. By exploring each family member's idea, common misconceptions are uncovered and discussed. In Florida Cars? Amber seeks out the causes of rust on cars from Florida. She experiments with nails to try to discover what ingredients produce rust. Your students will tackle Amber's problem and reach their own conclusions. Science topics explored include evaporation, erosion, thermal energy, atmospheric pressure, buoyancy, and density. These stories are bound to reveal the wonderful ideas all students have, give them the confidence to explore their own thinking, and provide opportunities for them to 'do' science rather than have science 'done' to them. --Page Keeley, NSTA President 2008-09

Everyday Discoveries Sharon MacDonald,1998 Science and math concepts are embedded in the things children do every day. With this book, children learn the how, the why and the what happens next with these open-ended, self-directed activities. God-given Foods Eating Plan: for Lifelong Health, Optimization of Hormones, Improved Athletic Performance Gary F. Zeolla, 2007-03-01 This book studies different food groups, with a chapter devoted to each major classification of foods. First the Biblical evidence is considered, then modern-day scientific research. Foods are classified as God-given foods and non-

God-given foods. A healthy eating plan is composed of a variety of God-given foods and avoids non-God-given foods. Unlike other books on this subject, this book does not promote a vegetarian diet since God gave us meat for food, and meat-eating is assumed throughout Scripture, with no negative connotations. Moreover, meat, poultry, and fish can and should be included in a healthy eating plan. The proposed eating plan is also designed to optimize hormones, such as testosterone, growth hormone, and insulin. This can produce dramatic differences in a person's health and well-being and can lead to a gain in muscle mass and a loss of body fat. It can also lead to improved athletic performance. This book also looks at other aspects of athletic nutrition.

The book offers activities for beginners as well as for more advanced problem solvers. Each chapter also provides guidance for ELLs and students with special needs, so no matter your classroom environment, you'll be able to use these strategies to make math class more dynamic, engaging, and fun.
