In Search of the Unknown Father Wolfgang Petzold, 2018-11-16 A war child explores the incredible story of his origins - A German-Serbian destiny - - The truth always comes to light It borders on a miracle of how he found his Serbian family. With this moving fate, he wants to encourage many people not to give up in search of their roots. He combines the still taboo theme of Children of Prisoners of War with historical and current events.

**In Search of the Unknown in Medieval Architecture** John James,2007-12-31 John James is an Australian architect and medieval historian. Since 1969 he has been searching for the origins of the Gothic style, beginning with a five-year study of Chartres cathedral. At that time there were no coherent techniques for analysing the detailed construction history of existing stone structures. This he created. He expanded his research to include all the early Gothic churches in the Paris region with a three-year survey of over 3500 buildings. His most important discovery has been that all churches of this period were constructed in many short campaigns by mobile building teams, and that major innovation was more likely to occur in the smaller buildings than in the larger. This volume makes available 42 of the author's studies on the development of Gothic architecture in France.

*In Search of the Unknown Illustrated* Robert William Chambers,2020-11-02 *In Search of the Unknown* is a module for the Dungeons & Dragons roleplaying game, designed for use with the Basic Set of rules. It was written by game designer Mike Carr and was first published in 1979 by TSR, Inc. The module details a hidden complex known as the Caverns of Quasqueton. Reviewers considered it a good quality introduction to the game that was written in the so-called dungeon crawl style, where the primary goal of the players is the exploration of a dangerous labyrinth to battle monsters and obtain treasure.

*In Search of the Unknown* Chambers Robert William,2017-06-24 *In Search of the Unknown* was an introductory scenario intended to teach Dungeon Masters (DMs) how to create dungeons. Mike Carr intended it for use as an instructional adventure for new players. The module is a beginner's scenario, which allows the DM to add their own choice of monsters and treasure. The module is coded B1 because it was created as the first adventure for the Dungeons & Dragons Basic Set,

though it is possible to convert it to Advanced Dungeons & Dragons. The adventure is designed for characters of first to third level, and was written for DMs and players with little or no gaming experience.

*In Search of the Unknown* Robert W Chambers,2021-03-05 In Search of the Unknown by Robert W. Chambers Many years ago two wealthy adventurers, Rogahn the Fearless and Zelligar the Unknown, built a hidden complex known as Quasqueton Caves. From this base, they conducted their business away from the prying eyes of civilization. Although of questionable ethical standing, the two repulsed a barbaric invasion and gained support from the locals. Eventually, they gathered their army and set out on an expedition against said enemies, where they met their disappearance. The player characters (PCs) enter the story at this point by listening to a series of voices provided on the module. Each PC knows one or more stories, although their veracity is somewhat questionable. The rumors are mainly about a great treasure hidden somewhere in the Quasqueton Caves, which the PCs can enter through a cave-like opening. A variety of monsters wander through the finished upper level of the dungeon, including orcs, troglodytes and giant mice. The DM periodically checks to see if the group encounters these threats as well as the dangers in each individual room. Most of the rooms have empty spaces in which the DM places whatever monster or treasure is best suited to his campaign. The finished upper level served as home for Rogahn and Zelligar and contains much of their personal possessions. A number of traps await an unwary group. Some of these rooms include an area full of swimming pools (some dangerous and some not) and a wizard's laboratory. The randomly generated monsters in the lower and unfinished level differ from the ones above and include zombies and goblins. Some of the pre-filled rooms at this level include a museum, arena, and large cave, but many of the caves at this level do not include any description and the DM must devise the contents for these areas. The end of the module includes a list of enemies and treasures that the group must fight and find. It also includes a list of characters from various classes that the party may encounter while exploring the dungeon. Also included are a number of pre-generated characters that the party could use to play in the adventure.
