Hussin A.Rothana

The Complete Roderick John Sladek, 2005-01-04 Two novels about the education of a young machine: “In a properly run universe Sladek’s Roderick would be considered a major American novel. Which it is.” —Michael Dirda, The Washington Post Roderick is a robot who learns. He begins life looking like a toy tank, thinking like a child, and knowing nothing about human ways. But as he will discover, growing up and becoming fully human is no easy task in a world where many people seem to have little trouble giving up their humanity. The Complete Roderick—consisting of the Philip K. Dick Award nominee Roderick and Roderick at Random—is widely considered to be the most ambitious and genius work of a novelist described by The Encyclopedia of Science Fiction as “the most formally inventive, the funniest, and very nearly the most melancholy of modern US science fiction writers.” “A major comic talent . . . hilarious and serious.” —Sunday Times “Superb . . . comparable with early Kurt Vonnegut.” —Time Out “To the small band of science-fiction humorists who can actually make you laugh—my own list features, in alphabetical order, Douglas Adams and Robert Sheckley—please add the name of John Sladek.” —The New York Times Book Review

Launching Liberty Doug Most, 2025-08-19 Out of nothing but the government’s behest, a few bold men conjured a giant ship-building industry in 1940 and launched the ships that took America to war and to victory. In 1940, the shadow of war loomed large over American life. President Roosevelt understood that it wasn’t a matter of if the United States would be pulled into battle, but when. He foresaw a “new kind of war,” one that hinged on efforts at home. Long before the attack on Pearl Harbor, German U-boats were relentlessly attacking American vessels, prompting Roosevelt to launch a monumental ship-building campaign. He knew that no matter how much weaponry and how many tanks, planes and trucks America built, the “Arsenal of Democracy” would be useless unless it could be brought in massive volume, and at breakneck speed, to troops fighting overseas. Launching Liberty tells the remarkable story of how FDR partnered with private businessmen to begin the production of cargo freighters longer than a football field—ships he affectionately dubbed “ugly ducklings.” These colossal Liberty Ships took over six months to build at the start of his \$350 million emergency shipbuilding program, far too long. The government turned to Henry Kaiser, the man who had delivered the Boulder Dam ahead of schedule and under budget, but had never built a ship in his life. Kaiser established a network of shipyards from coast to coast and recruited tens of thousands of workers eager to contribute to the war effort. Many, particularly African Americans and women, traveled

from some of the most downtrodden, rural parts of the nation to help their country and to find a better life of greater equality. As German U-boats maintained their pace of attack, Roosevelt and Kaiser initiated a bold, nationwide competition among shipyards to see who could construct ships the fastest. Driven by duty and the thrill of innovation, workers reduced the shipbuilding timeline from months to weeks and then to days. Launching Liberty is a tapestry of voices reflecting the diverse American experience of World War II. From the halls of the White House to the cramped quarters of half-finished cargo ships, we hear from naval architects, welders, nurses, engineers, daycare providers, and mothers balancing family life with the demands of wartime economy. This book uncovers the inspiring, untold stories of those who rose to the challenge during one of America's most tumultuous times.
