Henry IV Chris Given-Wilson,2016-01-01 Henry IV (1399-1413), the son of John of Gaunt, duke of Lancaster, seized the English throne at the age of thirty-two from his cousin Richard II and held it until his death, aged forty-five, when he was succeeded by his son, Henry V. This comprehensive and nuanced biography restores to his rightful place a king often overlooked in favor of his illustrious progeny. Henry faced the usual problems of usurpers: foreign wars, rebellions, and plots, as well as the ambitions and demands of the Lancastrian retainers who had helped him win the throne. By 1406 his rule was broadly established, and although he became ill shortly after this and never fully recovered, he retained ultimate power until his death. Using a wide variety of previously untapped archival materials, Chris Given-Wilson reveals a cultured, extravagant, and skeptical monarch who crushed opposition ruthlessly but never quite succeeded in satisfying the expectations of his own supporters.

Perception and the Internal Senses Juhana Toivanen,2013-05-15 In Perception and the Internal Senses Juhana

Toivanen advances a detailed philosophical reconstruction of Peter of John Olivi's (ca. 1248-98) conception of the cognitive psychology of the sensitive (i.e. animal) soul. Like most medieval philosophers, Olivi thought that higher animals and human beings have many psychological capacities in common. The book analyses these capacities by concentrating on Olivi's conception of the metaphysics of the soul, his theory of perception, and his views about the post-sensory cognitive power which medieval philosophers called the internal senses. Being the first monograph in English that concentrates on Olivi's philosophical psychology, *Perception and the Internal Senses* enables us to understand better medieval ideas concerning animal psychology and the human/animal boundary.

Respira Michael Townsend Williams,2021-10-04 Para todos aquellos que se sienten abrumados por las exigencias y ansiedades de la vida cotidiana, *Respira* ofrece prácticas para fomentar la relajación, la atención y la concentración. Cuando encuentras el equilibrio en la vida, puedes hacer cosas increíbles: crear, subirte a un escenario, liderar un equipo, emprender un negocio, formar una familia. Pero muy a menudo, frente a los cambios, permitimos que el estrés se apodere de nosotros y nos sentimos descentrados. Michael Townsend Williams, expublicista convertido en profesor de yoga y mindfulness, defiende el «buen hacer», abogando por una vida productiva, pero no a costa de nuestra salud y bienestar. ¿Y cuál es la clave para lograr esto? El aliento. Nuestra respiración, que es la conexión directa entre nuestra mente y nuestro cuerpo, refleja aquello con lo que estamos lidiando en cada momento. Nos avisa cuando algo nos sobrepasa. Con sencillos ejercicios de respiración y elementos de yoga, meditación y atención plena, *Respira* te ayudará a: • Reducir el estrés y aumentar tu bienestar • Mejorar la concentración y la productividad • Cultivar nuevos buenos hábitos y abandonar los malos • Desarrollar el coraje y la resiliencia ¿Estás preparado para respirar mejor? La crítica ha dicho... «*Respira* es un libro fantástico sobre algo que hacemos 600 millones de veces en la vida, pero en lo que raramente pensamos.» Michael Acton Smith, CEO de Calm «Perfecto para cualquiera que busque aprender a respirar mejor, encontrar la paz y comprender los conceptos básicos de la atención plena.» Lynchpin Media

The Modal Logic of John Fabri of Valenciennes (c. 1500) Christophe Geudens,Lorenz Demey,2022-05-03 The first book-length study to address issues in modal logic at the eve of the Renaissance, this monograph provides important new insights into the way the debates on modal logic during the post-medieval period tied in with the so-called Wegestreit, the divide between the via antiqua and via moderna that dominated the discourse on logic during the 15th and early 16th centuries. The focus of the book is on the logic and philosophy of language of John Fabri of Valenciennes (fl. c. 1500), one of the last exponents of the terminist approach to logic that was bitterly criticized by the humanist movement. By means of a careful reconstruction of Fabri's text, the book argues that Fabri's modal logic ultimately goes back to the work of John Buridan, and represents the same approach to the topic as the modal logics that were developed by adherents of the via moderna in Paris. This has significant implications for the historiography of post-medieval philosophy. Fabri was active in Louvain, which until the late 16th century was the most important intellectual center in the Low Countries. According to a long-standing tradition in the scholarship, Louvain was one of the few bulwarks of via antiqua logic on the map of post-medieval Europe. The book argues that this thesis is at least in part a scholarly fiction, and thus in need of revision. By shedding light on an author whose thought has thus far remained entirely unstudied, it also constitutes a valuable step towards a history of philosophy without any gaps. The book is aimed at graduate students and researchers in the history of logic and philosophy, but will also be of interest to intellectual historians, historians of ideas, and to any contemporary modal logician who is interested in the historical roots of their discipline.
