What he found was so much more than adventures in Humanland. Where did he go? What did he do? And who did he meet while the rest of his friends worked to solve the mystery of Stellarlune? The Ocean, Volume 1 Herve Claustre,Carolyn Scheurle,Laura Lorenzoni,Sanae Chiba,Emily King,2023-07-25 The ocean was the origin of life on earth billions of years ago and it is vital for the future of humanity. It is vast, deep, harsh and somehow "rebellious" to uncover its secrets and hence, there is much that is unexplored and misunderstood. Scientists need

to study the ocean to better understand its functioning and properties, as well as how they shape our environment and impact us. For example, do you know what the role of the ocean is on weather and climate? There still remains so much to explore in ocean biodiversity and the diverse resources that can be found (for example, fish stocks, bio-molecules, and also minerals, oil, and gas). How can we make sure that our use of these resources is done sustainably and how can we minimize our impacts (e.g. pollution, acidification) on the ocean as our human population increases? In this collection of Frontiers for Young Minds, scientists from various disciplines in oceanography share their knowledge and motivations, give insights in innovative tools and recent discoveries to better understand this ocean. The collection will target a large range of oceanic environments from the open ocean to the coast, the surface to the abysses also including specific areas like coral reefs or sea-ice environments. It will cover marine disciplines that range from physics to chemistry, from biology to ecology and from economy to conservation and policies. It will address innovative tools and methods that are used to observe and characterize oceanic properties and features: ships and satellites, the highly diverse variety of robots as well as genomics or artificial intelligence. Finally, it will encompass a great variety of scales, ranging from the diel to geological time-scales and from local-regional to global scales and also from the tiniest cells to the biggest living animals on our planet. The United Nations have declared the 2021-2030 period as the “Decade of Ocean Science for Sustainable Development”, stressing the urgent need to approach fundamental issues related to the ocean and the future of humanity on well sounded scientific grounds and knowledge. This Ocean collection aims to provide information to young readers that will help them to increase their understanding of the ocean and its central role in nature and our lives. We hope to empower them to make informed decisions in these challenging times and to engage to protect, study and enjoy its richness.

In the blink of an eye, Sophie is forced to leave behind everything and start a new life in a magical world. But what if life in the beautiful Lost Cities isn’t as idyllic as it seems? When to trust. When to let go. Her friends are divided and scattered, and the Black Swan wants Sophie to focus on their projects. But her instincts are leading her somewhere else. Stellarlune—and the mysterious Elysian—might be the key to everything. But finding truth in the Lost Cities always requires sacrifice. And in the battle that follows, only one thing is certain: nothing will ever be the same.

The Heroes Return Monica Tesler,2019-12-17 Jasper and Mira must escape the rift and deliver the Youli's message to Earth Force before it's too late in this action-packed fourth novel in what Shannon Messenger calls the "richly detailed, highly imaginative" Bounders series! After escaping the Youli's attack on Alkalinia, Jasper and Mira find themselves trapped with the lost aeronauts in the rift, a rip in space where time moves differently. For every minute they spend in the rift, they are losing days back home. Just when Jasper fears they'll be stuck in limbo forever, the most unlikely ally shows up: the Youli. The Youli promise to rescue everyone in the rift, but their help comes at a price. First, Jasper must tell Earth Force that the Youli want peace. And second, Mira can't return with Jasper. She has to leave with the Youli. Back home, almost a year has passed. The Youli war is public, Bounders are in space full-time, and Jasper's pod is divided. Cole and Lucy have been promoted. Marco and Addy are missing. Jasper delivers the Youli's message, but the admiral isn't interested in peace talks. Instead, she sends Jasper and the aeronauts on a publicity tour of Earth to build support for the war. At first, Jasper revels in the spotlight. But it soon becomes clear that if Jasper doesn't convince Earth Force to stop fighting—and soon—there won't be an Earth left to fight for, and he may never see Mira again.
