Animal Law Worldwide Federico Dalpane, Maria Baideldinova, 2024-11-18 This book offers a unique panoramic survey of the state of animal law in twenty-six countries and in the legal system of the European Union. The authors give a brief introduction to each jurisdiction, examine key issues, and formulate recommendations. The contributions provide ample opportunities for legal comparative studies touching on constitutional law, criminal law, civil law, environmental law, and administrative law, and discuss the crucial role of NGOs and civil society in raising awareness for the plight of animals. The contributions show the mature stage reached by the discipline of animal law, which is gaining attention in wider circles. The book discusses wildlife, agricultural animals, experimental animals, service animals, stray animals, and others. One of the topics is the constitutionalisation of animal welfare (with a growing number of countries amending their constitutions to include the protection of animals or considering such amendments). Other topics include the trend of moving away from the age-old legal classification of animals as mere things, and the persistent weaknesses in the implementation of legal provisions for the protection of animals. This book will be of keen interest to the worldwide animal law community, legal comparatists, legal theorists, policy makers, judges, law enforcement officials, as well as veterinary doctors. Federico Dalpane is an assistant professor at KIMEP University, College of Social Sciences. Maria Baideldinova is an assistant professor at KIMEP University, School of Law.

Treaties, Trenches, Mud, and Blood (Nathan Hale's Hazardous Tales #4) Nathan Hale, 2014-05-13 Learn about the most well-known battles (and little-known secrets) of World War I with author-illustrator Nathan Hale's *Treaties, Trenches, Mud, and Blood*, a Hazardous Tale from the New York Times bestselling graphic novel series. "These books are, quite simply, brilliant. . . . Thrilling, bloody, action-packed stories from American history." —New York Times In 1914, the world's biggest countries (and some of its smallest, too) were gearing up for a massive fight. Land, history, geography—each country went to war for different reasons and with different resources. But most ended up the same: sending their young men to fight for their lives in the mud, on the sea, and in the air, in a conflict that would eventually claim more than nine million lives. World War I, "The Great War," or "The War to End All Wars," was fought along thousands of miles of frontline trenches, with mechanized weapons, and dangerous new weapons like machine guns and mustard gas. It left behind a world that was scarred, angry, and traumatized. Its horrifying lessons are still being examined today. Nathan Hale's Hazardous Tales! Read them all—if you dare! trends on the management of animal genetic resources, the state of capacity to manage animal genetic resources, including legal and policy frameworks, and the state of the art in tools and methods for characterization, valuation, use, development and conservation.

Prehistoric Art in Europe Nancy K. Sandars, 1995-01-01 Until around 10,000 BC art in Europe appears to have been in

advance of the rest of the world and throws light on the total history of early man. The great masterpieces of cave-painting at Lascaux are well known, and one tradition of early sculpture is from the first surprisingly classical. With the shelter paintings of the Spanish Levant and the clay modelling and painted pottery of eastern Europe in the fourth and third millennia BC fresh artistic problems were tackled. Later still evolved the high technical accomplishment of the metal-workers, and this study concludes with an account of the new departures of Celtic La Tene art of the last four centuries BC.
