Michael Alexander Stewart

OPULENCE OF JOHN LOCKE Akṣapāda, Opulence of John Locke: Quotes from the Father of Liberalism John Locke, the founder of British Empiricism is ever remembered for his inspirational thoughts and ideas. Locke is one among the most popular philosophers and political theorists. He made immense contributions to the modern theories of the liberal government. He was also well known for the political theories as a proponent of limited government. Locke's theories also provided influential arguments on religious toleration. John's intelligent thoughts include his analysis of the world. His insight was that initially, about knowing ourselves in order to analyze the world around us. He also states that we should be aware of ourselves and our areas of inquiry we are well suited to. John thinks that the human mind is incredibly active and it's in constant operations. According to him, the complex ideas are the product of the combination of simple ideas put together. His words of ideas and teachings are so inspirational that the future generations could look into.

John Locke's Political Philosophy and the Hebrew Bible Yechiel M. Leiter, 2018-06-28 John Locke, whose ideas helped give birth to the United States, predicated his political theory on the Hebrew Bible. Why?

Jonathan Edwards and Justification by Faith Michael McClenahan, 2016-05-06 Jonathan Edwards (1703-1758) is widely regarded as North America's most influential theologian. Throughout the early decades of his ministry he engaged in a public and sustained debate with 'Arminian' theology, a crusade that contributed significantly to the events of the Great Awakening. This book investigates the contours and substance of this theological war. In establishing a clearer historical context for this polemic, McClenahan seeks to overturn the scholarly consensus that Edwards' own theology was a twisting of the Reformed tradition. By demonstrating that Edwards' interlocutor was the dead English Archbishop, John Tillotson, McClenahan provides the hermeneutical key for many of Edwards' most significant works. Justification by faith is one of the most contested doctrines in contemporary theology and Jonathan Edwards, referred to as America's Augustine, wrote extensively on this area. His is a voice that many people are keen to hear.

Edge of the Screen Murray Pomerance, 2024-11-14 This book is a series of seventeen meditations that revolve around the notion of the viewer's placement at the edge of the screen. Every page is an opportunity to think about an aspect of film, or of film viewing, in new ways, and to begin reconsidering deeply ingrained ways of unthinkingly characterizing and accounting for what it is that we watch when we watch a film, what happens to us, and how we make sense of and appreciate it. This volume follows from three others by the author: *Virtuoso: Film Performance and the Actor's Magic* (2020); *The Film Cheat: Cinematic Artifice and Viewing Pleasure* (2021); and *Uncanny Cinema: Agonies of the Viewing Experience* (2022). All of these, including *Edge of the Screen*, meander and interrogate cinema as we watch it, both connecting us to and disconnecting us from the moment of pleasure. Each meditation is characterized by a deep penetration of the inquiring, continually hungry authorial mind and a very extensive set of analyses of filmic moments from myriad films, including *2001: A Space Odyssey*, *Memento*, *Zabriskie Point*, *An American in Paris*, *Planet of the Apes* (1968), *Superman* (1978), *Possessed*, *The Jungle Book* (1942), *The Spy Who Came In from the Cold*, *The Toll of the Sea*, *Rope*, and numerous others. These meditations are careful and philosophical as much as energetically ruminative, yet are written in an accessible style for all interested readers who both love cinema and wonder about that love. Each chapter can stand alone, even though all work together to challenge perspectives on what we encounter, experience, think, and feel when we watch films. Across its chapters, *Edge of the Screen* takes on a wide range of topics: the ontology of film; the relation between characters, actors, and the figures who appear onscreen; film's relationships to the other arts, especially painting but also novels and theatre;

the passage of time in film, and its momentary character; film criticism, including deeply held values such as coherence; film's relationship to mortality; and more.

The Art of Study Burke Aaron Hinsdale, 1900

Government: A Public Administration Perspective Jos C. N. Raadschelders, 2015-03-04 Most public administration texts overly compartmentalize the subject and don't interconnect the various specializations within government, which leaves a serious gap in preparing students for public service. *Government: A Public Administration Perspective* is designed to fill that void. It provides a comprehensive, multidisciplinary view of government that includes perspectives from political science, political theory, international relations, organizational sociology, economics, and history. The text draws on classic and modern literature from all these areas to analyze government at four different levels - ideational, societal, organizational, and individual layers. It links public administration's various subfields - human resource management, budgeting, policy making, organizational theory, etc. - into a holistic framework for the study of government. It also includes an extensive bibliography drawing from American and European literature in support of the book's global, historical, and comparative approach.

Metafiction Mark Currie, 2014-07-15 Metafiction is one of the most distinctive features of postwar fiction, appearing in the work of novelists as varied as Eco, Borges, Martin Amis and Julian Barnes. It comprises two elements: firstly cause, the increasing interpenetration of professional literary criticism and the practice of writing; and secondly effect: an emphasis on the playing with styles and forms, resulting from an enhanced self-consciousness and awareness of the elusiveness of meaning and the limitations of the realist form. Dr Currie's volume examines first the two components of metafiction, with practical illustrations from the work of such writers as Derrida and Foucault. A final section then provides the view of metafiction as seen by metafictional writers themselves.

Studies in the History of Tax Law, Volume 8 Peter Harris, Dominic de Cogan, 2017-08-10 These are the papers from the 8th Cambridge Tax Law History Conference held in July 2016. In the usual manner, these papers have been selected from an oversupply of proposals for their interest and relevance, and scrutinised and edited to the highest standard for inclusion in this prestigious series. The papers fall within five basic themes: Two papers focus on tax theory; one on John Locke and another on the impact of English tax literature in the Netherlands in the nineteenth century. Five deal with the history of UK specific interpretational issues in varying contexts - an ancient exemption, insurance companies, special contribution, the profits tax GAAR and capital gains tax. Two more papers consider aspects of HMRC operations. Another three focus on facets

of international taxation, including treaties between the UK and European countries, treaties between the UK and developing countries and the UN model tax treaties of 1928. The book also incorporates a range of interesting topics from other countries, including the introduction of income tax in Ireland and in Chile, post-war income taxation in Australia, early interpretation of 'income' in New Zealand and a discussion of some early indirect taxes in India and China.

English Philosophy in the Age of Locke Michael Alexander Stewart, 2000 Investigating key issues in English philosophical, political, and religious thought in the second half of the seventeenth century, this book presents a set of new and intriguing essays on the topics. Particular emphasis is given to the interaction between philosophy and religion among leading political thinkers of the period; connections between philosophical debate on personhood, certainty, and the foundations of faith; and new conceptions of biblical exegesis.

The Mating Mind Geoffrey Miller, 2011-12-21 At once a pioneering study of evolution and an accessible and lively reading experience, a book that offers the most convincing—and radical—explanation for how and why the human mind evolved. Consciousness, morality, creativity, language, and art: these are the traits that make us human. Scientists have traditionally explained these qualities as merely a side effect of surplus brain size, but Miller argues that they were sexual attractors, not side effects. He bases his argument on Darwin's theory of sexual selection, which until now has played second fiddle to Darwin's theory of natural selection, and draws on ideas and research from a wide range of fields, including psychology, economics, history, and pop culture. Witty, powerfully argued, and continually thought-provoking, *The Mating Mind* is a landmark in our understanding of our own species.

Fictional Characters, Real Problems Garry Hagberg, 2016 These new essays explore central aspects of the ethical content of literature: character, its formation, and its role in moral discernment; poetic vision in the context of ethical understanding; self-identity and self-understanding; literature's role in moral growth and change; and the historical background of the ethical dimension of literature.

Who Controls the Hunt? David Calverley, 2018-03-01 As the nineteenth century ended, Ontario wildlife became increasingly valuable. Tourists and sport hunters spent growing amounts of money in search of game, and the government began to extend its regulatory powers in this arena. Restrictions were imposed on hunting and trapping, completely ignoring Anishinaabeg hunting rights set out in the Robinson Treaties of 1850. *Who Controls the Hunt?* examines how Ontario's emerging wildlife conservation laws failed to reconcile First Nations treaty rights and the power of the state. David Calverley traces the political and legal arguments prompted by the interplay of treaty rights, provincial and dominion government interests, and the corporate concerns of the Hudson's Bay Company. A nuanced examination of Indigenous resource issues, the themes of this book remain germane to questions about who controls the hunt in Canada today.
