Mike Jess

Piedra libre a las Ciencias Sociales en la escuela primaria Graciela Rossi de Defagot, 2020-01-31 Teniendo como objetivo cristalizar en la práctica la teoría existente...imaginando las preguntas que se plantean los docentes ante el desafío de: ¿Las Ciencias Sociales hoy, la Didáctica y sus complejidades? ¿Cómo podemos enseñar ciencias Sociales a nuestros alumnos/as? ¿Cuáles son las características de los niños/as y su aprendizaje? ¿Cómo despertar su interés? ¿Cuáles son las estrategias que podemos utilizar? ¿Narraciones, Juegos de simulación, Estudio de casos? ¿Leo atentamente la teoría pero no me doy cuenta cómo hacerlo? Debemos despertar el pensamiento crítico ¿Cómo?; ¿Logramos el deseado cambio conceptual en ellos? ¿Formamos parte de una Escuela formadora de ciudadanos del siglo XXI? ¿Efemérides icono sentido!? ¿Cómo evaluar formativamente? Preguntas que espero encuentren respuestas en estas páginas en las cuales la teoría se plasma en la práctica. Soñando que gracias a su lectura logren pensarse como docentes actuales intentando ayudarlos a llevarlo a cabo. Estas son algunas de las razones que me han llevado a escribir este texto cambiando, luego de la jubilación, el aula por las páginas de un libro; aspirando liberar el futuro de cada uno de mis lectores para que se repregunten obteniendo nuevas respuestas que me gustaría compartir. Espero les sirva a todos y cada uno de Uds. Mil gracias por interesarse en buscar respuestas.

La reflexión sobre la práctica del docente de Ciencias Naturales. Fundamentos teóricos y actividades didácticas para profesores y alumnos. María Ruina, 2022-03-02 La teoría en sí misma no transforma el mundo. Puede contribuir para su transformación, pero para eso tiene que salirse de sí misma y tiene que ser asimilada y reelaborada por aquellos que van a causar con sus acciones reales y efectivas esa transformación¹. (Paulo Freire, 1970) Indudablemente, el ejercicio de una actitud crítica y fundamentada durante la formación del profesorado brinda mejores oportunidades a los futuros docentes para afrontar los retos que propone la sociedad actual. En este sentido, adherimos fuertemente a la postura de Giroux (citado por Da Silva, 2001) cuando concibe al docente como un intelectual transformador, esto es, alguien que no se conduce como un técnico o un burócrata, sino como una persona comprometida, crítica y cuestionadora frente a los temas que tienen que ver con la enseñanza de su disciplina/área. Sin embargo, en la realidad existe una gran distancia entre esta postura y lo que llevan a cabo los docentes en sus clases. Antonio Gutiérrez (2009) asevera que, en la actualidad, los modelos didácticos predominantes en las clases de Ciencias Naturales, se corresponden con las perspectivas más tradicionales de la enseñanza,

que ponen el acento en la adquisición del vocabulario científico. En forma paralela, durante la formación docente se prioriza el dominio del conocimiento propio de las disciplinas, que, en el caso de las Ciencias Naturales, son los que corresponden a la Biología, la Física y la Química y en menor grado, los vinculados con las Ciencias de la Tierra. Dentro de este encuadre los saberes didácticos, metodológicos, epistemológicos, históricos, etc. quedan relegados a un segundo plano.

Consecuentemente, disminuyen también las posibilidades de reflexionar sobre sus propias prácticas y de pensar en maneras de superarlas. El autor plantea la necesidad de brindar espacios para que los futuros docentes puedan tomar decisiones frente a los problemas que plantean las situaciones particulares de su práctica a efectos de contribuir al desarrollo de su autonomía. A partir de este punto de vista, propone la siguiente definición para referirse a lo que significa enseñar: Enseñar constituye un complejo proceso de ponderación de situaciones concretas de trabajo y de toma de decisiones en torno a las mejores estrategias que posibiliten, en esas situaciones concretas, que los alumnos se apropien de los contenidos propuestos en el currículum escolar (Gutiérrez, 2009, p.141) Coincidimos plenamente con el autor cuando afirma que ser experto en una disciplina no equivale a ser experto en su enseñanza (p.141). Desde esta perspectiva cabe plantearse qué es lo que un docente de ciencias debería aprender durante su formación inicial y continua. Desde nuestra experiencia y atendiendo a las múltiples publicaciones referidas a esta cuestión, estimamos que en las planificaciones del profesor que se desempeña tanto en el Nivel Superior cuanto en las instancias de formación continua (capacitación/actualización docente) deberían estar presentes, entre otros, los siguientes tópicos: el conocimiento específico sobre el área curricular y sus vinculaciones con otros campos de conocimiento, la enseñanza de una imagen de la ciencia influida por la Tecnología, el contexto social, religioso, económico, político, etc., los fundamentos de la Didáctica general y específica para argumentar su práctica, la resolución de problemas vinculados con el mundo real, el abordaje de los contenidos desde una organización interdisciplinaria o interareal y el desarrollo de habilidades para comunicarse en ambientes laborales crecientemente tecnificados.

Expansión Onésimo Díaz Hernández,2020-11-06 Al terminar la Guerra Civil española en 1939 José María Escrivá contaba con catorce hombres y dos mujeres para desarrollar el Opus Dei. Al finalizar la Segunda Guerra Mundial en 1945 serán más de doscientos veinte varones y casi treinta mujeres quienes le siguen. Estos jóvenes extenderán su mensaje por las ciudades españolas y prepararán su expansión internacional. Son años de formación intensa, de rumores e incomprendiciones y también de deslumbramiento por la novedad del mensaje, tanto en el seno de la Iglesia como en la sociedad civil.

Las edades del mundo Friedrich Schelling,2002-04-02 Este volumen recoge las tres versiones iniciales de la obra que obsesionó a Schelling durante casi veinticinco años: Las edades del mundo. Estos textos fragmentarios no se publicaron en vida de su autor, y gracias a ellos podemos conocer la fase más oscura y enigmática de la filosofía de Schelling, aquella que abandona las comodidades de la filosofía de la identidad y se adentra en los terrenos de la religión y de la mitología.
