**Graham Cairns,Rachel Isaac-Menard**

*Muerte y vida de las grandes ciudades* Jane Jacobs,2020-11-27 Cincuenta años después de su publicación, Muerte y vida de las grandes ciudades es, según el New York Times, probablemente el libro más influyente en la historia de la planificación urbana. Jane Jacobs, columnista y crítica de arquitectura de principios de los años sesenta, afirmaba que la diversidad y la vitalidad de las ciudades estaban siendo destruidas por algunos arquitectos y urbanistas muy influyentes. Popular no sólo entre profesionales, el libro es una fuerte crítica de las políticas de renovación urbanística de los años cincuenta, que destruían comunidades y creaban espacios urbanos aislados y antinaturales. Jacobs defiende la abolición de los reglamentos de ordenación territorial y el restablecimiento de mercados libres de tierra, lo que daría como resultado barrios densos y de uso mixto. Frecuentemente cita el Greenwich Village neoyorkino como ejemplo de una comunidad urbana dinámica. Riguroso, lúcido y deliciosamente epigramático, Muerte y vida es un programa para la gestión humanista de las ciudades. Sensato, documentado, ameno e indispensable.

*La ciudad de las putas* Morquecho Sánchez,2023-10-03 El vapor etílico puede cobrar tantas formas como las nubes. En un lugar perdido de América, Santana hace memoria de las mujeres fatales que lo acompañaron en noches fatalmente destinadas a la mañana y a la cotidianeidad sin sentido.

**Planificación estratégica de ciudades** José Miguel Fernández Güell,2019-02-15 Este libro persigue dos fines principales; por un lado, actualizar y ampliar un campo de conocimiento, el de la planificación estratégica, que crece paulatinamente y que atrae la atención de las nuevas generaciones de urbanistas; por otro lado, mantener vivo el debate sobre la crisis y validez de la planificación urbana contemporánea, para lo que se utiliza siempre un tono optimista sobre las posibilidades de la buena gobernabilidad para superar los desafíos del futuro. Esta nueva edición constituye una revisión profunda de la primera edición de este libro (1997). El resultado ha sido una transformación rigurosa y crítica de la estructura y los contenidos iniciales.

**Invisible Reconstruction** Lucia Patrizio Gunning,Paola Rizzi,2022-12-06 What does it really mean to reconstruct a city after a natural, biological or man-made disaster? Is the repair and reinstatement of buildings and infrastructure sufficient

without the mending of social fabric? The authors of this volume believe that the true measure of success should be societal. After all, a city without people is no city at all. Invisible Reconstruction takes the view that effective disaster mitigation and recovery require interdisciplinary tactics. Historian Lucia Patrizio Gunning and urbanist Paola Rizzi expand beyond the confines of individual disciplines or disaster studies to bring together academics and practitioners from a wide variety of disciplines, comparing strategies and outcomes in different scenarios and cultures from South America, Europe and Asia. From cultural heritage and public space to education and participation, contributors reflect on the interconnection of people, culture and environment and on constructive approaches to strengthening the intangible ties to increase resilience and reduce vulnerability. By bringing practical examples of how communities and individuals have reacted to or prepared for disaster, the publication proposes a shift in public policy to ensure that essential physical reinforcement and rebuilding are matched by attention to societal needs. Invisible Reconstruction is essential reading for policymakers, academics and practitioners working to reduce the impact of natural, biological and man-made disaster or to improve post-disaster recovery.

*Inclusive Cities and Global Urban Transformation* Ajay Bailey,Kei Otsuki,2025-01-03 This open access book addresses the problem of global urban development that excludes various groups of people from the benefits of urban growth and sustainable development. Using the intersectionality and agency of urban dwellers and citizens, it outlines possibilities of responsive urban governance that builds on principles of the inclusive city. The book's first section presents various cases of digital, smart, logistical, and green infrastructure that drive a city's growth and sustainable development while excluding various citizens from these benefits. The second and third sections focus on the intersectionality and agency of urban citizens vulnerable to marginalization in different urban contexts—such as the elderly, people with various physical and mental challenges, women, and children. The last section presents the cases of potential forms of responsive governance and possibilities for future inclusive city planning and development. This book appeals to students of urban and development studies and planning and related disciplines, such as human and cultural geography, applied anthropology, sociology, sustainability sciences, architecture, and design. It is also helpful for activists and practitioners as illustrative cases presented in the book show various experiences and possibilities for making a city inclusive.

**Housing the Future** Graham Cairns,Rachel Isaac-Menard,2015-12-31 *Housing The Future: Alternative Approaches for Tomorrow* offers three perspectives on the problems of housing today with an eye on tomorrow. It brings together world-leading practising architects with academics from seven countries and teams of international students. World leaders in the field of residential design such as UN Habitat Award winner Avi Friedman present built projects whose design criteria and aims they lay out in text. Academics from the UK, the USA, Spain, Germany and elsewhere follow these project descriptions with extended essays from a more theoretical perspective but remain focused on the realities of practice. Finally, ideas on current housing problems from the next generation of designers are brought together in student projects from Europe and

North America. With an introduction by Dr Graham Cairns, this book highlights the practice of residential design internationally at a time when affordable housing provision is seen as a critical issue by designers, planners and policy makers alike.

**Contemporary Perspectives on Jane Jacobs** Dirk Schubert,2016-05-13 Jane Jacobs's famous book *The Death and Life of Great American Cities* (1961) has challenged the discipline of urban planning and led to a paradigm shift. Controversial in the 1960s, most of her ideas became generally accepted within a decade or so after publication, not only in North America but worldwide, as the articles in this volume demonstrate. Based on cross-disciplinary and transnational approaches, this book offers new insights into her complex and often contrarian way of thinking as well as analyses of her impact on urban planning theory and the consequences for planning practice. Now, more than 50 years after the initial publication, in a period of rapid globalisation and deregulated approaches in planning, new challenges arise. The contributions in this book argue that it is not possible simply to follow Jane Jacobs's ideas to the letter, but instead it is necessary to contextualize them, to look for relevant lessons for cities and planners, and critically to re-evaluate why and how some of her ideas might be updated. Bringing together an international team of scholars and writers, this volume develops conclusions based on new research as to how her work can be re-interpreted under different circumstances and utilized in the current debate about the proclaimed 'millennium of the city', the 21st century.

*Iglesia Centrada* Timothy Keller,2013-01-08 A muchos pastores les cuesta un gran esfuerzo convertir sus principios teológicos en un ministerio fructífero en los lugares que han sido llamados a alcanzar. No les es suficiente saber lo que se debe creer (la teología), o la forma en que se debe trabajar en el ministerio (la metodología). Necesitan algo que se halle entre ambos extremos. Necesitan ayudar a pensar en función del ministerio dentro de una cultura que ha dejado de creer que el cristianismo sea una fuerza beneficiosa, sin mencionar siquiera que en la Persona de Cristo se encuentre la fuente máxima de la verdad revelada. Iglesia Punto Central, una colección de doce ensayos escritos por Timothy Keller, esboza una visión teológica del ministerio que está organizada alrededor de tres compromisos básicos:

- Centrarnos en el Evangelio: El Evangelio de la gracia en Jesucristo lo transforma todo; desde nuestro corazón hasta nuestra comunidad y el mundo entero. Le da una forma totalmente nueva al contenido, la tonalidad y las estrategias en todo lo que hagamos.
- Centrarnos en la ciudad: Con un acercamiento positivo a nuestra cultura actual, aprendemos a proclamar que las ciudades son lugares maravillosos y estratégicos que no nos merecemos, y en los cuales podemos desarrollar el ministerio del Evangelio.
- Centrarnos en el movimiento: En lugar de edificar nuestra propia tribu, buscamos la prosperidad y la paz de nuestra comunidad, dirigidos por el Espíritu Santo.

Urbicide Fernando Carrión Mena,Paulina Cepeda Pico,2023-03-23 This book uses the reflection of academics specialized

in the urban area of Latin America, Europe and the United States, to initiate a comparative debate of the different dynamics in which Urbicidio expresses itself. The field or focal point of analysis that this publication approaches is the city, but under a new critical perspective of inverse methodology to that has been traditionally used. It is about understanding the structural causes of self-destruction to finally thinking better and then going from pessimism to optimism. It is a deep look at the city from an unconventional entrance, because it is about knowing and analyzing what the city loses by the action deployed by own urbanites, both in the field of its production and in the field of its consumption. This supposes that the city does not have an ascending linear sequential evolution in its development but neither in each of its parts in the improvement process, showing the face that commonly is not seen but others live. The category used for this purpose is that of Urbicidio or the death of the city, which contributes theoretically and methodologically to the knowledge of the city, as well as to the design of urban policies that neutralize it. In addition, it is worth mentioning that the book has an inclusive view of the authors. For this reason, gender parity, territorial representation and the presence of age groups have been sought.

*Urbanismo Regenerativo* Landlab, Paisaje Transversal, 2024-01-23 We are living in a critical moment, a reality marked by environmental and socio-economic limits that requires innovative and realistic forms of action and planning. This is what regenerative urbanism proposes, a new approach based on utopian pragmatism that seeks to restore balance to the urban territory by designing systems that allow it to adapt and transform. It is a methodology that defines models that do not consume available resources, but rather generate new ones that ensure compatibility between economic and social prosperity and nature. Santander, Hábitat Futuro (Santander, Future Habitat) is the city model created from this methodology, a proposal for the transformation of this city for the year 2055. It is an open model based on innovation and citizen participation that prepares and adapts the territory for the different scenarios to come. Santander, Habitat Futuro is a guide that directs the commitment of the different social, economic and political agents towards a common goal: to achieve a circular, sustainable, resilient, vertebrate, prosperous, vital and inclusive city. A model that, due to its innovative nature, can serve as an example to other intermediate cities around the world.

A Manifesto for the Just City Roberto Rocco, Caroline Newton, Luz María Vergara d'Alençon, Anja van der Watt, 2021-03-29 This book addresses the need to re-imagine and re-conceptualise the Just City in light of recent systemic shocks: climate change, the pandemic, a generalised erosion of democratic standards and more. It contains texts by a number of guests and 43 manifestos written by students from 25 universities from all over the world. A "Manifesto for the Just City" comes in the wake of the realisation that socio-spatial justice is a crucial dimension for sustainability transitions. Growing inequality and the erosion of the public sphere undermine the social and political structures required to fight climate change, pandemics and other systemic shocks. With this book, we have sought to encourage students to formulate their own visions for the Just City and for a just transition. This book is the result of an Urban Thinkers Campus organised between 9 and 30 November 2020.

The Urban Thinkers Campus (UTC) model is an initiative of UN-Habitat's World Urban Campaign, conceived in 2014 as an open space for critical exchange between stakeholders and partners. It aims to promote debate and action on sustainable and inclusive urbanization upholding the principles and guidelines contained in the New Urban Agenda, launched at Habitat-III in 2016 in Quito, Ecuador.

**Administración pública del Ecuador ¿Dónde estamos? ¿Tenemos una agenda?** Efrén Guerrero,2023-03-23 El propósito de este texto es hacer una visión exploratoria del alcance, características y usos de la Gestión Pública, aplicado a casos concretos, y su implementación en la administración pública ecuatoriana. Como se verá en las páginas de este documento, se propone esta área como una ciencia de la acción, en la que los elementos jurídicos, políticos y económicos se combinan, con el fin de asegurar el mejor ejercicio de los derechos fundamentales y la concreción de los objetivos de Estado. En este sentido, y la mayoría de autores coinciden con que el proceso de reforma del Estado tan necesaria en nuestra órbita nacional o regional, es una acción nacida de una necesidad de largo plazo, con fuertes vínculos comunicantes entre la acción de la administración con actores políticos dotados de legitimidad electoral. Los textos que se encontrarán en las siguientes páginas tienen varios elementos en común: los Estados no se gobiernan como un acto puramente técnico-racional, sino que ejercen el arte de gobernar (statecraft) con actos conscientes e inconscientes, para gestionar las tensiones de los diferentes involucrados en una política pública.

**Made-to-Measure Future(s) for Democracy?** Julen Zabalo,Igor Filibi,Leire Escajedo San-Epifanio,2022-11-25 This open access volume analyses the development of democracy at different levels of governance (from local to global). The Basque search for an institutional and democratic model that adapts to its social needs and solves its problems offers an interesting perspective for analyzing the way in which democracy is seeking new forms of materialization from the local to the global. The volume is divided into four parts. The chapters in Part I analyze the tensions between the neoliberal vision of democracy and the voices contesting it, with projections at different levels of government. The chapters in Part II focus on the emerging framework and scales of Western democracy. The chapters in Part III present new forms of citizen participation, paying special - though not exclusive - attention to new practical strategies for Basque society. The volume concludes with a block of chapters on the relevance of reviewing the methodological and epistemological frameworks from which knowledge about democracy and mechanisms of citizen participation is generated (Part IV). By delving deeper into the idea and practice of democratic governance, this volume will be of interest to researchers and students from all disciplines of politics, international relations, sociology and law.

**Equality and the City** Enrique Peñalosa Londoño,2024-04-16 In Equality and the City, Enrique Peñalosa Londoño draws on his experience as mayor of Bogotá, Colombia, as well as his many years of international work as a lecturer and consultant, to share his perspective on the issues facing developing cities, especially sustainable transportation and equal access to

public space. As mayor of Bogotá, Peñalosa Londoño initiated development of the TransMilenio Rapid Bus Transit system, among the largest and most comprehensive public transit systems in the Global South, which carries 2.5 million passengers a day along dedicated bus lanes, bike paths, and a rapid metro line. The system emphasizes accessibility for the entire population. Peñalosa Londoño's efforts to create public space were similarly ambitious: over the course of his two terms, more than a thousand public parks were created or improved. Underlying these policies was a conviction of how cities should be—a compelling humanistic philosophy of sustainable urbanism. For Peñalosa Londoño, city design is not just engineering; it defines human happiness, dignity, and equality. "An advanced city is not one where the poor own a car," Peñalosa writes, "but one where the rich use public transport." Equality and the City provides practical criteria for conceiving and constructing different and better cities, describes the obstacles that are confronted when doing so, and identifies ways to overcome them.

**Urban Resilience: Methodologies, Tools and Evaluation** Octavio Francisco González Castillo, Valentina Antonucci, Enrique Mendieta Márquez, Margarita Juárez Nájera, Alberto Cedeño Valdiviezo, Mariana Osorno Castro, 2023-01-10 This book presents a select set of papers from an international and multidisciplinary approach, outlining the vanguard in the field of methodology, tools, and evaluation of the movement towards urban resilience. Reflecting on and redesigning the guidelines that orient the planning and management of urban development has become, today, an issue of global scope and priority that demands the committed and determined participation of society. Faced with the formidable challenge of guiding our cities towards sustainability, it is necessary to develop new approaches, paradigms, models, methodologies, and tools that make it possible to assess and raise the resilience profile of urban socio-ecosystems. The experiences that are developed in this book offer a wide and diverse set of concepts, theories, methodologies, instruments, and casuistry, impregnated by resilience notion, to inspire, influence, and guide thinking and practice for architects, urban planners, government officials, businessmen, civil and research organizations. In this book, the reader will be able to review either theoretical-methodology to organize notions on urban resilience, or application cases in a variety of areas and subsystems of a city but, being all of them inevitably and intricately linked through a complex matrix of structures and interactions that determine future, well-being, and resilience of urban socio-ecosystems in the global anthropo-environment.

Sustainable Development and Renovation in Architecture, Urbanism and Engineering Pilar Mercader-Moyano, 2017-03-17 This book provides an overview of the environmental problems that arise from construction activity, focusing on refurbishment as an alternative to the current crisis in the construction sector, as well as on measures designed to minimize the effects on the environment. Furthermore, it offers professionals insights into alternative eco-efficient solutions using new materials to minimize environmental impacts and offers solutions that they can incorporate into their own designs and buildings. It also demonstrates best practices in the cooperation between various universities in Andalusia in Spain and Latin

America and many public and private companies and organizations. This book serves as a valuable reference resource for professionals and researchers and provides an overview on the status of investigations to find solutions to improve sustainable development in terms of materials, systems, facilities, neighborhoods, buildings, and awareness of the society involved.

*Counteracting the Neoliberal City* Michaela De Marco, 2025-09-22 This book presents a groundbreaking theoretical and methodological framework for analyzing urban phenomena and urban policies and a pioneering approach to urban regeneration projects. The text advocates for an “Integral and Recognitive Urban Regeneration” of public spaces in cities to confront current neoliberal urban policies, which have been ineffective in achieving genuine overall “wellbeing” in contemporary urban environments. “Integral and Recognitive Urban Regeneration” is a macro-process composed of several micro-contextualized urban projects that account for the complexity of urban spaces. This process goes beyond merely enhancing the aesthetics and functionality of architectural spaces, rather presenting itself as an educational, community-oriented, cooperative, creative, socializing, eco-friendly, multidisciplinary, and transdisciplinary process that serves as a platform for regenerating compromised ecosystems; promoting the cognitive, psychological, emotional, social, and political empowerment of resident communities; and addressing local and global forms of social and ecological injustice. As such, this book is an essential resource for students, researchers, academics, and experienced planners alike.
