*History and Foreign Policy in France and Germany* Ulrich Krotz, 2015-08-11 Why do states similar in size, resources and capabilities significantly differ in their basic orientations and actions across major domains in foreign policy, security and defense? This book addresses this important question by analyzing the major differences between the foreign policies of France and Germany over extended periods of time.

*European Integration Since the 1920s* Mark Hewitson, 2024-10-14 Brexit, populism, and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration. This book re-examines why the European Union and its forerunners were created and investigates how and why they have changed. It links contemporary events to historical explanation, arguing that there were long-term sets of conditions, dating back to the 1920s, which pushed European governments to cooperate economically and to try to resolve their diplomatic differences. The failure of the French and German governments to create what Aristide Briand had called a 'European federal union' demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states. After 1945, the unexpected advent of a 'Cold War' and the military, diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional 'integration', but they also placed limits on European governments' activities, as did disagreements between political parties and the expectations of citizens. As a consequence, supranational bodies such as the European Commission have been accompanied - and often overshadowed - by intergovernmental institutions such as the European Council, with the EU as a whole functioning in important respects as a type of confederation. The volume addresses a series of large-scale historical questions which are integral to an understanding of the European Union. It asks how and why citizens of member states have identified with the EU; how matters of 'security' affected the development of the European Community during and after the Cold War; whether economic

and social convergence have taken place, and with what consequences; and why European institutions have come to function as they have. The study is thematic, focusing on the most important aspects of European integration and explaining why member states have decided to carry out - or have consented to - the unique experiment of the European Union.

From England to France William Chester Jordan, 2015-02-22 At the height of the Middle Ages, a peculiar system of perpetual exile—or abjuration—flourished in western Europe. It was a judicial form of exile, not political or religious, and it was meted out to felons for crimes deserving of severe corporal punishment or death. *From England to France* explores the lives of these men and women who were condemned to abjure the English realm, and draws on their unique experiences to shed light on a medieval legal tradition until now very poorly understood. William Chester Jordan weaves a breathtaking historical tapestry, examining the judicial and administrative processes that led to the abjuration of more than seventy-five thousand English subjects, and recounting the astonishing journeys of the exiles themselves. Some were innocents caught up in tragic circumstances, but many were hardened criminals. Almost every English exile departed from the port of Dover, many bound for the same French village, a place called Wissant. Jordan vividly describes what happened when the felons got there, and tells the stories of the few who managed to return to England, either illegally or through pardons. *From England to France* provides new insights into a fundamental pillar of medieval English law and shows how it collapsed amid the bloodshed of the Hundred Years' War.

**European Shakespeares** Dirk Delabastita, Lieven d'. Hulst, 1993-01-01 Where, when, and why did European Romantics take to Shakespeare? How about Shakespeare's reception in enduring Neoclassical or in popular traditions? And above all: which Shakespeare did these various groups promote? This collection of essays leaves behind the time-honoured commonplaces about Shakespearean translation (the 'translatability' of Shakespeare's forms and meanings, the issue of 'loss' and 'gain' in translation, the distinction between 'translation' and 'adaptation', translation as an 'art'. etc.) and joins modern Shakespearean scholarship in its attempt to lay bare the cultural mechanisms endowing Shakespeare's texts with their supposedly inherent meanings. The book presents a fresh approach to the subject by its radically descriptive stance, by its search for an adequate underlying theory along interdisciplinary lines, and not in the least by its truly European scope. It traces common trends and local features not just in France and Germany, but also in Hungary, Italy, the Netherlands, Portugal, Russia, Scandinavia, and the West Slavic cultures.

**Beethoven and His World** Scott Burnham, Michael P. Steinberg, 2020-09-01 Few composers even begin to approach

Beethoven's pervasive presence in modern Western culture, from the concert hall to the comic strip. Edited by a cultural historian and a music theorist, *Beethoven and His World* gathers eminent scholars from several disciplines who collectively speak to the range of Beethoven's importance and of our perennial fascination with him. The contributors address Beethoven's musical works and their cultural contexts. Reinhold Brinkmann explores the post-revolutionary context of Beethoven's *Eroica* Symphony, while Lewis Lockwood establishes a typology of heroism in works like *Fidelio*. Elaine Sisman, Nicholas Marston, and Glenn Stanley discuss issues of temporality, memory, and voice in works at the threshold of Beethoven's late style, such as *An die Ferne Geliebte*, the Cello Sonata op. 102, no. 1, and the somewhat later Piano Sonata op. 109. Peering behind the scenes into Beethoven's workshop, Tilman Skowronek explains how the young Beethoven chose his pianos, and William Kinderman shows Beethoven in the process of sketching and revising his compositions. The volume concludes with four essays engaging the broader question of reception of Beethoven's impact on his world and ours. Christopher Gibbs' study of Beethoven's funeral and its aftermath features documentary material appearing in English for the first time; art historian Alessandra Comini offers an illustrated discussion of Beethoven's ubiquitous and iconic frown; Sanna Pederson takes up the theme of masculinity in critical representations of Beethoven; and Leon Botstein examines the aesthetics and politics of hearing extramusical narratives and plots in Beethoven's music. Bringing together varied and fresh approaches to the West's most celebrated composer, this collection of essays provides music lovers with an enriched understanding of Beethoven--as man, musician, and phenomenon.

**Reconsidering Europeanization** Florian Greiner, Peter Pichler, Jan Vermeiren, 2022-08-01 This pertinent and highly original volume explores how ideas of Europe and processes of continental political, socio-economic, and cultural integration have been intertwined since the nineteenth century. Applying a wider definition of Europeanization in the sense of becoming European, it will pay equal attention to counter-processes of disentanglement and disintegration that have accompanied, slowed down, or displaced such trends and developments. By focusing on the practices, agents, and experience of Europeanization, the volume strives to bring together the history of ideas and the history of human actions and conduct, two approaches that are usually treated separately in the field of European studies.

The European Union Legal Order After Lisbon Patrick Birkinshaw, Mike Varney, 2010-01-01 In June 2009 the Institute of European Public Law of the University of Hull assembled a range of experts in relevant fields to offer papers and reach some consensus on what has been achieved in the EU legal order and what the future holds for that order given local tensions and global uncertainty.
