The Next Generation Tony Ryan,2017-08-14 Today's children will be an unprecedented global force—are they ready? The Next Generation maps out the world of possibilities ahead for today's young people, and reveals the skills and habits they'll need to take full advantage of their unique futures. Around 35% of the world's population is under 20 years of age; known as Generation Z and Generation Alpha, these children are coming of age in a world that is safer, healthier, wealthier and more productive than ever before. Opportunities fan out in the distance for today's kids—a world of possibility awaits, and they will be the ones to shape the future for us all. Right now, it's the job of parents and educators to prepare these kids for what awaits. They need an instinctual adaptability, quick thinking and comfort with change. They need to be technologically literate, and ready to take on whatever challenges arise. This book explores the evolution of coming of age in a world where teens are already an entrepreneurial force, and shows you how to instill the talent, skills and instincts today's children will need to make the most of their future. Explore the unique opportunities that exist for today's children Discover the three capabilities that will prepare them for their dramatic journey Learn three ways in which kids can help create a worthwhile future for themselves Give them the skills they need to successfully navigate rapid, never-ending change Continuous technological advancements combined with our children's unprecedented levels of involvement will unleash humanity's next major social and economic evolution—will your child be ready? The Next Generation helps you prepare them for their journey to success.

Routledge Handbook of the Resource Nexus Raimund Bleischwitz,Holger Hoff,Catalina Spataru,Ester van der Voet,Stacy D. VanDeveer,2017-12-14 In recent years the concept of the resource nexus has been both hotly debated and widely adopted in research and policy circles. It is a powerful new way to understand and better govern the myriad complex relationships between multiple resources, actors and their security concerns. Particular attention has been paid to water, energy and food interactions, but land and materials emerge as critical too. This comprehensive handbook presents a detailed review of current knowledge about resource nexus-related frameworks, methods and governance, including a broad set of inter-

disciplinary perspectives. Written by an international group of scholars and practitioners, the volume focuses on rigorous research, including tools, methods and modelling approaches to analyse resource use patterns across societies and scales from a nexus perspective. It also provides numerous examples from political economy to demonstrate how resource nexus frameworks can illuminate issues such as land grabs, mining, renewable energy and the growing importance of economies such as China, as well as to propose lessons and outlooks for sound governance. The volume seeks to serve as an essential reference text, source book and state-of-the-art, science-based assessment of this increasingly important topic – the resource nexus – and its utility in efforts to enhance sustainability of many kinds and implement the United Nations Sustainable Development Goals in an era of environmental and geopolitical change.

Leadership Team Coaching in Practice Peter Hawkins, 2022-02-03 A high-performing and cohesive leadership team is essential for organizational success. *Leadership Team Coaching in Practice* provides an overview of the tools and techniques for coaching leadership teams and shows how these approaches have been applied around the world in a variety of team types and industries. Featuring expert contributions from chief executives, team coaches, team leaders and consultants in organizations including Comair and the UK National Health Service (NHS), this practical guide illustrates best practice tailored to the needs of each organization. The new and updated third edition of *Leadership Team Coaching in Practice* incorporates the latest research and thinking in the field, including new material on developing the personal core capacities for systemic team coaching. Alongside updates to case studies to offer a long-term view of interventions, the third edition contains new case studies including team coaching in Toyota through a period of transformation. There is a new medley chapter of short case stories that address some of the regularly asked questions by new team coaches and new material that explores ways of creating a teaming and 'team of teams' culture. This book remains an essential resource for executive and team coaches, CEOs, team leaders, organizational development consultants, and those studying coaching as part of a degree or coaching qualification.

Senior Leadership Roundtable on Military and Defence Aspects of Border Security in South East Europe I.V. Lochard, 2019-02-08 The region of South East Europe (SEE), which is home to both NATO and Partnership for Peace (PfP) countries, serves as an important corridor between Europe and the Middle East, North Africa, and the Caucasus. In recent years, however, SEE has also experienced high levels of cross-border, military and defense-related challenges in the form of migration, smuggling, terrorism, and cyber threats. Furthermore, the use of the new information environment (IE) to further extremism in SEE and elsewhere in NATO and PfP countries has had far-reaching command and control (C2) implications for the Alliance. A collaborative interdisciplinary, international and regional approach is clearly needed to adequately assess and address these hybrid threats. This book presents papers delivered at the NATO Science for Peace and Security (SPS) event: “Senior Leadership Roundtable on Military and Defense Aspects of Border Security in South East Europe”, held in Berovo,

the Former Yugoslav Republic of Macedonia* from 23-30 September 2017. The aim of this special SPS grant was to maximize opportunities for extensive dialogue and collaboration between senior regional members, and the almost 70 distinguished academic and legal experts, as well as current or former senior-level practitioners from various governments, NATO bodies, and international organization that participated. It was the first SPS event of its kind in SEE as well as the first NATO SPS grant to be co-executed by the U.S. Department of Defense via the U.S. National Defense University. Other co-organizers were the C4I and Cyber Center of Excellence at George Mason University and PfP partner institution, the General Mihailo Apostolski Military Academy – Skopje, Associate Member of the University of Goce Delčev – Stip. The book is divided into five parts: global trends, defining the problem, policy and academic solutions, national and regional case studies, and technological solutions. It will prove an invaluable source of reference for all those with an interest in the SEE region as well as cross-border hybrid threats, in general. * Turkey recognizes the Republic of Macedonia with its constitutional name.

Routledge Companion to Media and Humanitarian Action Robin Andersen, Purnaka L. de Silva, 2017-09-14 In this moment of unprecedented humanitarian crises, the representations of global disasters are increasingly common media themes around the world. The Routledge Companion to Media and Humanitarian Action explores the interconnections between media, old and new, and the humanitarian challenges that have come to define the twenty-first century. Contributors, including media professionals and experts in humanitarian affairs, grapple with what kinds of media language, discourse, terms, and campaigns can offer enough context and background knowledge to nurture informed global citizens. Case studies of media practices, content analysis and evaluation of media coverage, and representations of humanitarian emergencies and affairs offer further insight into the ways in which strategic communications are designed and implemented in field of humanitarian action.

Move Up Clotaire Rapaille, Andrés Roemer, 2015-04-30 With an abundance of data and evidence, Move UP explores the societal and biological factors that determine whether cultures are able to ascend socially, economically and intellectually. This provocative, ambitious and entertaining book devises a formula that will allow countries and individuals to assess their own potential for upward mobility. Drawing on science and statistics as much as on human instinct and emotion, Move UP reconsiders the modern world with a motion to improving it.

Liberation Technology Larry Diamond, Marc F. Plattner, 2012-07-30 Liberation Technology brings together cutting-edge scholarship from scholars and practitioners at the forefront of this burgeoning field of study. An introductory section defines the debate with a foundational piece on liberation technology and is then followed by essays discussing the popular dichotomy of liberation" versus control with regard to the Internet and the sociopolitical dimensions of such controls. Additional chapters delve into the cases of individual countries: China, Egypt, Iran, and Tunisia.

Fewer, Richer, Greener Laurence B. Siegel, 2019-11-26 How the world has become much better and why optimism is

abundantly justified Why do so many people fear the future? Is their concern justified, or can we look forward to greater wealth and continued improvement in the way we live? Our world seems to be experiencing stagnant economic growth, climatic deterioration, dwindling natural resources, and an unsustainable level of population growth. The world is doomed, they argue, and there are just too many problems to overcome. But is this really the case? In *Fewer, Richer, Greener*, author Laurence B. Siegel reveals that the world has improved—and will continue to improve—in almost every dimension imaginable. This practical yet lighthearted book makes a convincing case for having gratitude for today's world and optimism about the bountiful world of tomorrow. Life has actually improved tremendously. We live in the safest, most prosperous time in all human history. Whatever the metric—food, health, longevity, education, conflict—it is demonstrably true that right now is the best time to be alive. The recent, dramatic slowing in global population growth continues to spread prosperity from the developed to the developing world. Technology is helping billions of people rise above levels of mere subsistence. This technology of prosperity is cumulative and rapidly improving: we use it to solve problems in ways that would have been unimaginable only a few decades ago. An optimistic antidote for pessimism and fear, this book: Helps to restore and reinforce our faith in the future Documents and explains how global changes impact our present and influence our future Discusses the costs and unforeseen consequences of some of the changes occurring in the modern world Offers engaging narrative, accurate data and research, and an in-depth look at the best books on the topic by leading thinkers Traces the history of economic progress and explores its consequences for human life around the world *Fewer, Richer, Greener: Prospects for Humanity in an Age of Abundance* is a must-read for anyone who wishes to regain hope for the present and wants to build a better future.

AI Enabled Business Melodena Stephens, Himanshu Vashishtha, Dirk Nicolas Wagner, 2023-07-01 As the use of AI becomes more and more ubiquitous in companies around the world, managers charged with taking key decisions require resources to enable them to evaluate new projects effectively. The business case for AI projects is not necessarily clear cut and part of the reason for this is the lack of understanding on key decision criteria. AI touches on many ethical concepts - data privacy, validity and more importantly, its potential misuse. AI is often being used to replace human decision-making and there is often no real understanding of the implications of this. This book provides a detailed primer for practitioners without a deep technological background. It guides the reader through the basic issues and offers advice on 'how to take decisions'. There is a dearth of such books currently available and this book aspires to fill a growing niche.

ENDORSEMENTS: This book is sure to offer value to business users, students and the general public. — K. Ananth Krishnan, Tata Consultancy Services I highly recommend this book for the leader seeking an up-to-date review of AI to make strategic investments. — Kes Sampanthar, Innovation, BCG Brighthouse The specificity of application in case studies and easy to understand definitions and recommendations make this a must read in the ever-growing field of literature around AI. — John

Cities Without Capitalism Hossein Sadri, Senem Zeybekoglu, 2021-07-22 This book explores the interconnections between urbanization and capitalism to examine the current condition of cities due to capitalism. It brings together interdisciplinary insights from leading academics, activists and researchers to envision progressive, anti-capitalist changes for the future of cities. The exploitative nature of capitalist urbanization, as seen in the manifestation of modern cities, has threatened and affected life on Earth in unprecedented ways. This book unravels these threats to ecosystems and biodiversity and addresses the widening gap between the rich and the poor. It considers the future impacts of the capitalist urbanization on the planet and the generations to come and offers directions to imagine and build de-capitalised and de-urbanised cities to promote environmental sustainability. Written in lucid style, the chapters in the book illustrate the current situation of capitalist urbanization and expose how it exploits and consumes the planet. It also looks at alternative habitat practices of building autonomous and ecological human settlements, and how these can lead to a transformation of capitalist urbanization. The book also includes current debates on COVID-19 pandemic to consider post-pandemic challenges in envisioning a de-capitalised, eco-friendly society in the immediate future. It will be useful for academics and professionals in the fields of sociology, urban planning and design and urban studies.

Assistive Technologies and Environmental Interventions in Healthcare Lynn Gitlow, Kathleen Flecky, 2019-08-08 Providing a holistic and client-centered approach, Assistive Technologies and Environmental Interventions in Healthcare explores the individual's needs within the environment, examines the relationship between disability and a variety of traditional and cutting-edge technologies, and presents a humanistic discussion of Technology-Environment Intervention (TEI). Written by a multidisciplinary team of authors, this text introduces readers to a variety of conceptual practice models and the clinical reasoning perspectives. It also provides insight into how designers go about solving human-tech problems, discusses best practices for both face-to-face and virtual teams, and looks at the psychological, sociocultural, and cognitive factors behind the development and provision of assistive technologies. Examines a wide range of technologies and environmental interventions Demonstrates how a better understanding of the complexity of human interaction with both the physical and social environment can lead to better use of technology Explores the future of technology and research in TEI Complete with a range of learning features such as keywords, case studies and review questions, this book is ideal for undergraduate and graduate students in occupational therapy and other related health professions, as well as those undertaking certification and board examinations.

Introduction to Health Care Services: Foundations and Challenges Bernard J. Healey, Tina Marie Evans, 2014-12-11 A comprehensive guide to the structure, synergy, and challenges in U.S. health care delivery Introduction to Health Care

Services: Foundations and Challenges offers new insights into the most important sectors of the United States' health care industry and the many challenges the future holds. Designed to provide a comprehensive and up-to-date understanding of the system, this textbook covers the many facets of health care delivery and details the interaction of health, environments, organizations, populations, and the health professions. Written by authors with decades of experience teaching and working in health care administration and management, the book examines the current state and changing face of health care delivery in the United States. Each chapter includes learning objectives and discussion questions that help guide and engage deeper consideration of the issues at hand, providing a comprehensive approach for students. Cases studies demonstrating innovations in the delivery of health care services are also presented. Health care administration requires a thorough understanding of the multiple systems that define and shape the delivery of health care in the United States. At the same time, it is important for students to gain an appreciation of the dilemma confronting policy makers, providers, and patients in the struggle to balance cost, quality, and access. Introduction to Health Care Services: Foundations and Challenges is an in-depth examination of the major health care issues and policy changes that have had an impact on the U.S. health care delivery system. Includes information on U.S. health care delivery, from care to cost, and the forces of change Focuses on major industry players, including providers, insurers, and facilities Highlights challenges facing health care delivery in the future, including physician shortages, quality care, and the chronic disease epidemic The U.S. health care system is undergoing major reform, and the effects will ripple across every sector of the industry. Introduction to Health Care Services: Foundations and Challenges gives students a complete introduction to understanding the issues and ramifications.

Learn or Die Edward D. Hess, 2014-09-23 New and evolving technologies and increasing globalization continue to impact many businesses. To compete in this rapidly changing environment, individuals and organizations must take their ability to learn—the foundation for continuous improvement, operational excellence, and innovation—to a much higher level. In Learn or Die, Edward D. Hess combines recent advances in neuroscience, psychology, behavioral economics, and education with key research on high-performance businesses to create an actionable blueprint for becoming a leading-edge learning organization. Learn or Die examines the process of learning from both an individual and an organizational standpoint. From an individual perspective, the book discusses the cognitive, emotional, motivational, attitudinal, and behavioral factors that promote better learning. Organizationally, Learn or Die focuses on what kind of structures, culture, leadership, employee learning behaviors, and human resource policies are necessary to create an environment that enables critical and innovative thinking, learning conversations, and collaboration. The volume also provides strategies to mitigate the reality that humans can be reflexive, lazy thinkers who seek confirmation of what they believe to be true and affirmation of their self-image, a reality that makes seeking the truth and high-quality learning difficult. Exemplar learning organizations discussed in the book include the secretive Bridgewater Associates, LP; Intuit, Inc.; United Parcel Service (UPS); W. L. Gore & Associates;

and IDEO.

Open Innovation Results Henry William Chesbrough, 2020 To get real results from innovation, businesses must open up their innovation process and finish more of what they start. This book offers the latest theory and evidence from innovation processes, and discusses how they can, and must, connect to the organization as a whole in order to have real long-term value.

Process Engineering Renewal 3 Éric Schaer, Jean-Claude André, 2020-07-16 Process engineering emerged at the beginning of the 20th Century and has become an essential scientific discipline for the matter and energy processing industries. Its success is incontrovertible, with the exponential increase in techniques and innovations. Rapid advances in new technologies such as artificial intelligence, as well as current societal needs sustainable development, climate change, renewable energy, the environment are developments that must be taken into account in industrial renewal. Process Engineering Renewal 3 presents a prospective analysis that demonstrates the significant disruptions linked to sustainable development, global warming, etc. These constraints may trigger changes in the social regulation system, which in turn applies pressure on actors of process engineering to evolve and adapt to these developments.

The African Union Ten Years After Mammo Muchie, Phindil Lukhele-Olorunju, 2013-10-21 This book looks at the first ten years of the African Union. This is the second in a series of books that will be produced each year from annual conferences held on the multi-faceted issue of African liberation. The key themes of the book explore ways of improving the effectiveness of the African Union, fostering unity amongst African countries through entrenchment of pan-Africanism, and building ownership of the African Union by the African people and their communities. In addition, the thoughts of key figures of pan-Africanism and black emancipation, such as Sylvester Williams and Frantz Fanon, are re-positioned to even greater contemporary relevance. Through its promotion of Ethiopianism, pan-Africanism and the African renaissance, we trust that this book will add new interest and a fresh perspective to how Africans move forward together into a post-colonial era where policies and actions are determined by the united agency of liberated Africans the world over.

'One Planet' Cities David Thorpe, 2019-04-30 This book addresses the crucial question of how the essential needs of the growing human population can be met without breaking the Earth's already-stretched life-support system. With four out of five people predicted to be urban dwellers by 2080, 'One Planet' Cities proposes a pathway to genuine sustainability for cities and neighbourhoods, using an approach based on contraction and convergence. Utilising interviews with key players, including the Global Footprint Network, World Future Council, WWF, mayors and government officials, and case studies from across the globe, including Europe, North and South America, Australia, South Africa, China and India, David Thorpe examines all aspects of modern society from food provision to neighbourhood design, via industry, the circular economy, energy and transport through the critical lens of the ecological footprint and relevant supporting international standards and

indicators. Recommendations on managing supply chains and impacts, how the transition to a world within limits might be financed, and a deep examination of the Welsh Government's pioneering efforts follow. It concludes with an imagined vision of what a genuinely sustainable future might be like, and an appeal for 'one planeters' everywhere to step up to the challenge. This book will be of great interest to practitioners and policymakers involved in governance, administration, urban environments and sustainability, alongside students of the built environment, urban planning, environmental policy and energy.
