It covers how to assess the risk to and readiness of a health care facility for potential disasters and how to deal with any deficiencies found.

Surgery During Natural Disasters, Combat, Terrorist Attacks, and Crisis Situations COL Robert B. Lim, 2015-12-11 The lessons from this book help surgeons prepare for emergency events that require disaster preparedness usually handled by the United States military, including chemical attacks and massive casualty events. Written by experts in the field perspectives that come from various combat zones and disaster sites, this book highlights the pitfalls to avoid, the organization that is essential for success, and the tips to help perform surgery in the most austere conditions. The book will address situations where surgeons may have to operate on wanted criminals, operate wearing chemical protective equipment, operate in a collapsed building, or even remove an unexploded device. The book includes cases from the battlefield that are designed to guide surgeons facing these scenarios in the civilian world. There are also chapters detailing the lessons learned from the Boston Marathon Bombing, airline disasters, and the Oklahoma City bombing. Unlike any other

current text, *Surgery During Natural Disasters, Combat, Terrorist Attacks, and Crisis Situations* is an excellent resource for all surgeons who might be faced with these events.

*Nursing Care of the Pediatric Trauma Patient* Sandra J. Czerwinski, 2003 *Nursing Care of the Pediatric Trauma Patient* provides the most comprehensive coverage available on nursing care of the pediatric trauma patient. Ideal for both emergency and trauma nurses, this reference discusses pediatric trauma across the continuum of care. This provides a broad perspective that enables the reader to use a systems approach that is consistent with the current health care environment. The book is organized into three sections. The first section, *The Scope of Pediatric Trauma*, covers issues such as epidemiology, prevention, and outcomes management. The second section, *Clinical Concepts*, covers issues such as mechanism of injury, pre-hospital care, initial resuscitation, rehabilitation, pain management, nutrition, family-centered care, and violence. Section Three, *System Injuries*, addresses specific body system issues and sequelae of trauma. Comprehensive content focuses specifically on nursing care of the pediatric trauma patient. The nurse's role in the continuum of care is consistent with the emphasis of the current healthcare environment. The organizational framework focuses on the systems approach and is divided into four sections. The section on *The Scope of Pediatric Trauma* covers issues such as epidemiology, prevention, outcomes management, and ethical issues. The *Clinical Concepts* section addresses mechanism of injury, pre-hospital care, initial resuscitation, rehabilitation, pain management, nutrition, family-centered care, and violence. The section on *System Injuries* covers specific body system issues. The section on *Multisystem Issues* covers thermal and submersion injuries as well as the unborn infant as trauma victim and sequelae of trauma. Independent and collaborative nursing interventions are emphasized in the *System Injuries* section. Timely issues such as outcomes management are discussed. Chapters written by nurses practicing in pediatric trauma ensure clinically relevant, up-to-date content.
