Rethinking Development in South Asia Farid Uddin Ahamed,M. Saiful Islam,Amir Mohammad Nasrullah,2022-03-17 This book challenges the way development has been conceptualized and practiced in South Asian context, and argues for its deconstruction in a way that would allow freedom, choice and greater well-being for the local people. Far from taking development for granted as growth and advancement, this book unveils how development could also be a destructive force to local socio-cultural and environmental contexts. With a critical examination of such conventional development practices as hegemonic, patriarchal, devastating and failure, it highlights how the rethinking of development could be seen as a matter of practice by incorporating people's interest, priorities and participation. The book theoretically challenges the conventional notion of hegemonic development and proposes alternative means, and, practically, provides nuances of ethnographic knowledge which will be of great interest to policy planners, development practitioners, educationists and anyone interested in knowing more about how people think about their own development.

Cross-Industry Applications of Cyber Security Frameworks Baral, Sukanta Kumar,Goel, Richa,Rahman, Md Mashiur,Sultan, Jahangir,Jahan, Sarkar,2022-06-24 Data is the most important commodity, which is why data protection has become a global priority. Data breaches and security flaws can jeopardize the global economy. Organizations face a greater risk of failing to achieve strategy and business goals as cyber threat behavior grows in frequency, sophistication, and destructiveness. A breach can result in data loss, business interruption, brand and reputation harm, as well as regulatory and legal consequences. A company needs a well-thought-out cybersecurity strategy to secure its critical infrastructure and

information systems in order to overcome these challenges. Cross-Industry Applications of Cyber Security Frameworks provides an understanding of the specific, standards-based security controls that make up a best practice cybersecurity program. It is equipped with cross-industry applications of cybersecurity frameworks, best practices for common practices, and suggestions that may be highly relevant or appropriate in every case. Covering topics such as legal frameworks, cybersecurity in FinTech, and open banking, this premier reference source is an essential resource for executives, business leaders, managers, entrepreneurs, IT professionals, government officials, hospital administrators, educational administrators, privacy specialists, researchers, and academicians.

Advances in Ethical Work Climate and Employee Well-Being Ige-Olaobaju, Adejoke Yesimi, Ganiyu, Idris Olayiwola, Atiku, Sulaiman Olusegun, Olarewaju, Odunayo Magret, 2025-04-02 Through a strategic alignment of organizational culture, policies, and practices, businesses can cultivate an environment conducive to enhance stakeholder satisfaction and

employee wellbeing. Despite the increasing awareness from different stakeholders, many businesses have continued to engage in unethical behaviors and practices that have resulted in corporate scandals, legal problems, boycotts, negative social media campaigns and damaging images and reputational damage. With the negative impacts of unethical work climates becoming more evident, businesses are under pressure to adopt practices and processes that are more ethically friendly. This shift towards ethics and morals not only benefits the employees but also presents several prospects for businesses to become more trustworthy and reputable. *Advances in Ethical Work Climate and Employee Well-Being* discusses strategies, and best practices for promoting ethical work climate and employee wellbeing by businesses globally. It examines the importance of business management processes and practices in promoting ethical organizations that tend to help businesses achieve the trust of their employees and integrity among other stakeholders. Covering topics such as virtual leadership, social responsibility, and micro-wellness interventions, this book is an excellent resource for business leaders, business managers, consultants, advisors, professionals, researchers, scholars, academicians, and more.

Reflecting the realities of financial services marketing in an increasingly complex sector, it provides the most up-to-date, international and practical guide to the subject available.

Digital Freedom Faizur Rashid, Sadaf Rashid, 2023-12-15 In the present age of the digital era, the terms digitalization, emerging technologies, and social media have become buzzwords. Among all the innovations in our history, digital technology has advanced the fastest. With the freedom of digitalization, emerging technologies, and high-speed internet, computing devices may now work remotely. Every industry, including banking and finance, healthcare, agriculture, logistics, academia, government sectors, and businesses, has recognized the need for innovative digital technologies for their development, boosting efficiency and speed and cutting costs. Digitalization has also converted non-digital applications into digital ones to make things easier for people, at the same time that social media has an increasingly significant impact on human lives and industries. Consequently, the primary goal of this book is to explain to readers how newly emerging digital technologies and social media have significantly altered and aided in the growth of today's organizations and how the freedom of using these technologies has proved to be beneficial, particularly during the COVID-19 pandemic that has affected the entire world. This book demonstrates its argument by providing real-world cases from both developed and developing nations, particularly India. The book also investigates how digital transformation may help every industry and organization be more agile and efficient. Readers will learn about the main goals of digital initiatives that have been launched to create a digitally empowered society worldwide. In this book, the benefits and challenges of digitization, digital tools, and other technologies in diverse fields are also examined.

Of Changes and Transformations Subhankar Saha, 2013

Transfers, behavior change communication, and intimate partner violence Roy, Shalini, Hidrobo, Melissa, Hoddinott, John F., Ahmed, Akhter, 2017-09-09 Transfer programs have been shown to reduce intimate partner violence (IPV), but little evidence exists on how activities linked to transfers affect IPV or what happens when programs end. We assess postprogram impacts on IPV of randomly assigning women in Bangladesh to receive cash or food, with or without nutrition behavior change communication (BCC). Six to 10 months postprogram, IPV did not differ between women receiving transfers and a control group; however, women receiving transfers with BCC experienced 26 percent less physical violence. Evidence on mechanisms suggests sustained effects of BCC on women's threat points, men's social costs of violence, and household well-being.

Everyday Life of Ready-made Garment Kormi in Bangladesh Mohammad Tareq Hasan, 2022-07-15 This book portrays the scene where corporate international trade agreements, a new neoliberal state regime, and a growing textile market have

contributed to the becoming of a new class of Muslim female workers—who labor in Bangladesh’s apparel export factories under conditions of neoliberal capitalism. The garment kormi—often abstracted by the homogenizing category of the “garment worker”—remain lost in the statistics of development and empowerment or contrarily exploitation. Thereby, focusing on the everyday lives of garment kormi, i.e., workers’ stories than on the collective of garment workers as a category, this book at one front highlights the neoliberal structures of difference and inequality, and on the other reflects on the potential of egalitarianism and change in terms of novel ways of comprising and expressing life-worlds. It shows that the values in life and the structures that govern life, such as contemporary Bangladesh’s neoliberal order, kinship relationality, and religiosity, are co-constitutive, multi-layered, and always on the move, never fixed.

Agriculture, Nutrition, and Gender Linkages (ANGeL) Baseline Study Tauseef, Salauddin, Sufian, Farha D., Parvin, Aklima, Haque, Nusrat Z., Ghostlaw, Julie, Ahmed, Akhter, 2017-06-09

1.1 Background Bangladesh has made commendable progress in domestic food production through public investments in agricultural research and extension, public and private investments in irrigation, and liberalization of agricultural input markets. In the early 1970s, Bangladesh was a food-deficit country with a population of about 75 million people. Today, the population has more than doubled, and the country is nearly self-sufficient in rice production, which has tripled over the past three decades. However, Bangladesh’s performance in improving child and maternal nutrition has been less satisfactory. Despite its success in reducing child stunting, the rate of stunting in Bangladesh (36 percent in 2014) remains high (NIPOORT 2015). Bangladesh also continues to struggle with deficiencies in micronutrients such as iron, zinc, iodine, and vitamin A. Such deficiencies reflect poor diets that are rice-dominated, monotonous, and lacking diversity (Ahmed et al. 2013). Anemia (in part due to iron deficiency) is estimated to affect 26 percent of nonpregnant, non-lactating women, whereas 42 percent suffer from iodine deficiency. About 28 percent women of reproductive age are underweight (NIPOORT 2015). In preschool children, the rates of anemia, iodine, and vitamin A deficiencies are 33 percent, 40 percent, and 20 percent, respectively (ICDDR,B 2013). Therefore, government policies and strategies underscore the importance of strengthening the linkage between agriculture and nutrition. Agriculture provides a source of food and nutrients, contributes to income, and affects food prices. Exploring agriculture and nutrition linkages in Bangladesh using data from a multi-round district level panel, a study finds that rice yields are associated with earlier introduction of complementary foods to young children, as well as increases in their weight-for-height (Heady and Hoddinott 2016). Agriculture can also have effects on women’s health, nutrition, empowerment and time allocation, which can have important consequences for their ability to care for family members. Given these links, agriculture has the potential to be a strong driver of nutrition. However, that potential is not being fully realized in Bangladesh because, traditionally, nutrition and agricultural policies have been uncoordinated. Low status of women and gender gaps in health and education contribute to chronic child undernutrition (Smith et al. 2003) and food insecurity (von Grebmer et al. 2009), even when other

determinants of food security, such as per capita incomes, improve. According to an IFPRI study, women are key actors within the food system, but are historically disempowered in Bangladesh in terms of leadership in the community, control of resources, and control of income (Sraboni, Quisumbing, and Ahmed 2014a). The lack of women's empowerment weakens the links between agriculture and nutrition. Despite increases in 2 women's participation in agriculture in Bangladesh in recent years (Asaduzzaman 2010), women face persistent obstacles, particularly due to social and economic constraints, which limit their further inclusion in agriculture. Women have limited control over agricultural assets, as well as limited mobility to go to markets to sell agricultural produce, often relying on husbands and sons to take produce to market.

1.2 Motivation for the Study

IFPRI research in Bangladesh, using data from a nationally representative household survey conducted by IFPRI, reveals that women's empowerment plays a key role in improving household food security and dietary diversity of children, women, and other household members (Sraboni et al. 2014b; Malapit et al. 2015). The study also shows that agricultural production diversity is associated with dietary diversity (Sraboni et al. 2014b). Further, IFPRI research in Bangladesh shows that nutrition behavior change communication (BCC) training imparted to women and men in rural households leads to significant improvements in child nutrition and complementary feeding practices (Ahmed et al. 2016; Menon et al. 2016). Motivated by research-based evidence, IFPRI researchers developed a concept note to strengthen the agriculture-nutrition-gender nexus in Bangladesh and presented it to the Ministry of Agriculture (MOA), Government of the People's Republic of Bangladesh in June 2014. Based on the concept note, an inter-ministerial committee of the Government of Bangladesh approved a pilot research project entitled, "Orienting Agriculture Toward Improved Nutrition and Women's Empowerment", also known as "Agriculture, Nutrition, and Gender Linkages" (ANGeL), for implementation by the MOA, with technical assistance from IFPRI and Helen Keller International (HKI), and an evaluation led by IFPRI. The Minister of Agriculture officially launched the pilot project in October 2015. The project is jointly funded by the Government of Bangladesh and USAID.

1.3 The Baseline Report

As part of the evaluation of the ANGeL Project, IFPRI carried out a baseline survey of project participants and a comparison group of households just before the start of project interventions. This report presents the results of the ANGeL baseline survey. It is organized in nine sections. Section 2 describes the salient features of the ANGeL Project. Section 3 presents the progress of the ANGeL Project to date. Section 4 describes the baseline survey. Section 5 gives a profile of the survey households. Section 6 provides the land tenure status of sample households and findings on agricultural production and practices. Section 7 presents patterns of food consumption and nutrition. Section 8 provides findings on women's empowerment. Section 9 summarizes the main findings and provides conclusions.
