Managing Global Legal Systems Gary W. Florkowski, 2006-09-27 Presenting a framework for understanding the corporate strategy-public policy interface as it relates to human capital management, this unique text treats legal systems as factors that must be actively managed in the firm's larger pursuit of international competitive advantage. It provides readers with the most comprehensive description to date of the role that transnational, regional and national institutions play in the evolution of domestic employment regulation and international labour standards, and discusses the opportunities that employers have to influence their form and application. High-profile news events from around the world are utilized to illustrate key concepts, offering unique insights into the regulatory environment that MNEs face when managing an international work force. Iroquoia Kelly Y. Hopkins, 2025-05-15 *Iroquoia* highlights the innovation of the Haudenosaunee peoples in retaining sovereignty over their homelands through seven generations of social and environmental change following European contact and the settler invasion. Kelly Y. Hopkins argues that Haudenosaunee men and women incorporated articles of European manufacture into their daily lives to fulfill conventional social and cultural needs. They used new trade items and alliances to enhance their lives and to pursue goals specific to their communities. In *Iroquoia*, Hopkins explores how engagement in the global market economy irreversibly transformed the local environment, severed Indigenous relationships and responsibilities to human and other-than human kin, and challenged longstanding social and economic relationships within Haudenosaunee communities. While settler expansion, violence, and imperial terraforming threatened Indigenous communities, food

sovereignty, and water management, The People of the Longhouse produced distinctive new material cultures and new land use practices that incorporated features of the colonial settlement template into longstanding subsistence and settlement patterns. Haudenosaunee peoples employed these survivance strategies to control the scale and scope of European intrusion into their homelands.

The Romanian Journal of European Studies no.5-6/2007 ,

French Revolutionary Infantry 1789-1802 Terry Crowdy, 2012-06-20 The years immediately following the French Revolution of 1789 saw an extraordinary transformation of the French army. From a distrusted instrument of the feudal power of the king and nobility, it became the symbol of liberty and citizenship. The transition was complex and painful, as the remnants of the old professional army were joined by a flood of civilian volunteers and conscripts, of whom even the best were short of everything except republican fervour. This book describes the stages of the rebirth that produced an army capable of beating off half the monarchies of Europe, thus laying the foundations for Napoleon's unique victories ten years later.

Veer Ecology Jeffrey Jerome Cohen, Lowell Duckert, 2017-12-15 The words most commonly associated with the environmental movement—save, recycle, reuse, protect, regulate, restore—describe what we can do to help the environment, but few suggest how we might transform ourselves to better navigate the sudden turns of the late Anthropocene. Which words can help us to veer conceptually along with drastic environmental flux? Jeffrey Jerome Cohen and Lowell Duckert asked thirty brilliant thinkers to each propose one verb that stresses the forceful potential of inquiry, weather, biomes, apprehensions, and desires to swerve and sheer. Each term is accompanied by a concise essay contextualizing its meaning in times of resource depletion, environmental degradation, and global climate change. Some verbs are closely tied to natural processes: compost, saturate, seep, rain, shade, sediment, vegetate, environ. Many are vaguely unsettling: drown, unmoor, obsolesce, power down, haunt. Others are enigmatic or counterintuitive: curl, globalize, commodify, ape, whirl. And while several verbs pertain to human affect and action—love, represent, behold, wait, try, attune, play, remember, decorate, tend, hope—a primary goal of *Veer Ecology* is to decenter the human. Indeed, each of the essays speaks to a heightened sense of possibility, awakening our imaginations and inviting us to think the world anew from radically different perspectives. A groundbreaking guide for the twenty-first century, *Veer Ecology* foregrounds the risks and potentialities of living on—and with—an alarmingly dynamic planet. Worldviews John Valk, 2021-10-01 This book investigates the concept of worldview, in its numerous aspects, and how worldviews impact, shape, and influence individuals, communities, societies, and cultures. It explores various worldviews—religious, spiritual, and secular—using a comprehensive approach to highlight their breadth, depth, and scope. John Valk argues that everyone has a worldview, and that worldview is often shaped and influenced by individual circumstances and situations. While worldviews have similar structures to one another, they vary in content, including differences in metanarratives, teachings, ethics, and more. In the course of explaining how worldviews respond to life's ultimate and existential challenges, the book poses ontological questions to highlight various (world)views on the nature of being and the human, and epistemological questions pertaining to sources of knowledge and certainty. Inviting readers to reflect on their own worldviews as they explore the worldviews of others, Valk also reveals how certain universal worldview beliefs are interpreted in particular contexts.

Religious Symbols and the Intervention of the Law Sylvie Bacquet, 2019-06-11 In contemporary pluralist states, where faith communities live together, different religious symbols and practices have to coexist. This may lead to conflicts between certain minority practices and the dominant majority, particularly around the manifestation of belief in the public domain which may be seen both by the religious and secular majorities as a threat to their cultural heritage or against the secular values of the host country. The law has to mitigate those tensions in order to protect the public from harm and preserve order but in doing so, it may where necessary have to limit citizens' ability to freely manifest their religion. It is those limitations that have been disputed in the courts on grounds of freedom of religion and belief. Religious symbols are often at the heart of legal battles, with courts called upon to consider the lawfulness of banning or restricting certain symbols or practices. This book analyses the relationship between the state, individuals and religious symbols, considering the three main forms of religious expression, symbols that believers wear on their body, symbols in the public space such as religious edifices and rituals that believers perform as a manifestation of their faith. The book looks comparatively at legal responses in England, the U.S.A and France comparing different approaches to the issues of symbols in the public sphere and their interaction with the law. The book considers religious manifestation as a social phenomenon taking a multidisciplinary approach to the question mixing elements of the anthropology, history and sociology of religion in order to provide some context and examine how this could help inform the law.

Interrogation Nation Keith R. Allen, 2017-05-25 This groundbreaking book explores the treatment of the millions of refugees and tens of thousands of spies that flooded Germany after World War II. Drawing on newly declassified espionage files, Keith R. Allen uncovers long-hidden interrogation systems that were developed by Germany's western occupiers to protect internal security and gather intelligence about the Soviet Union. He shows how vetting in the name of public order brought foreign intelligence officials into practically every venue, from train stations to corporate boardrooms to private dwellings, in postwar West Germany. At the heart of efforts to extract insights were extensive, personalized efforts by law enforcement and security officials to manipulate desires and emotions involving dearest family members, closest friends, and trusted colleagues. Linking personal narratives of those interrogated to the international context of postwar politics, Allen

reveals a compelling world inhabited by spies and refugees. Allen's study illuminates the places, personalities, and practices of refugee interrogation in one of Europe's most successful postwar states. As calls for intense scrutiny of refugees have grown dramatically, Allen illustrates how decisions to shortchange the rights of migrants in periods of heightened ideological and military tension may contribute to long-term threats to personal liberties and the rule of law.

Challenges for Language Education and Policy Bernard Spolsky, Ofra Inbar-Lourie, Michal Tannenbaum, 2014-09-15
Addressing a wide range of issues in applied linguistics, sociolinguistics, and multilingualism, this volume focuses on language users, the 'people.' Making creative connections between existing scholarship in language policy and contemporary theory and research in other social sciences, authors from around the world offer new critical perspectives for analyzing language phenomena and language theories, suggesting new meeting points among language users and language policy makers, norms, and traditions in diverse cultural, geographical, and historical contexts. Identifying and expanding on previously neglected aspects of language studies, the book is inspired by the work of Elana Shohamy, whose critical view and innovative work on a broad spectrum of key topics in applied linguistics has influenced many scholars in the field to think "out of the box" and to reconsider some basic commonly held understandings, specifically with regard to the impact of language and language on individual language users rather than on the masses.

Groundwater Quality and Geochemistry in Arid and Semi-Arid Regions Shakir Ali, Abdelazim Negm, 2024-03-19
This book reviews groundwater quality and its major global contaminants, and collects the latest advances in the analysis, remediation, risk assessment, and hydrogeochemistry of groundwater in countries such as Algeria, Egypt, Ghana, Kazakhstan, Morocco, Saudi Arabia, and the USA. This book mainly focuses on the major arid and semi-arid areas where groundwater is scarce and highly polluted with geogenic and anthropogenic contaminants and the recharge to the groundwater is negligible due to limited rainfall. Divided into 2 parts, the book starts by covering topics like assessment and protection of groundwater in arid and semi-arid regions, groundwater pollution, and contamination risk assessment. Particular attention is given to the application of environmental isotopes in groundwater studies and how anthropogenic activities impact groundwater quality, the impact of irrigation reservoirs in groundwater and soil quality, and how artificial intelligence is applied to forecast groundwater quality. In the second part of this book, readers will find more about the major global contaminants of groundwater in arid and semi-arid areas, including a geochemical analysis of fluoride and nitrate contamination. Supported by regional case studies, this book appeals to researchers, scholars, and professionals working in the field of groundwater contamination and remediation and is also an important account for policymakers.

Talking International Law Ian Johnstone, Steven Ratner, 2021-09-09 Examining legal argumentation by states and other actors in the settings where it mostly transpires - outside of courts, *Talking International Law* challenges the realist assumption that legal argumentation is largely inconsequential. Addressing a gap in scholarship within international law and international relations theory, this book provides a comprehensive analysis of why it occurs, how, where, and to what effect by exploring the phenomenon in a range of issue areas, from security and human rights, to the environment, trade, and intellectual property. Diplomats and other governmental actors are the principal participants in international legal discourse, but intergovernmental officials, non-governmental organizations, academics, corporations, and even non-state armed groups also engage in law talk. Through close examination of legal arguments in political and other settings, the authors uncover various motives these actors have for making legal claims - including persuasion, strategic calculations, assertions of identity, and the felt need to legitimate one's actions - or to delegitimize those of an adversary. Legal argumentation can have short-term and long-term effects, both intended and unintended, on immediate participants or a wider net of actors. By bringing together distinguished scholars with diverse perspectives and senior practitioners from around the world who engage in such argumentation themselves, the book offers a unique exposure to the multi-faceted practice of legal argumentation and thereby deepens our understanding of how international law actually operates in international affairs.

M10 and M36 Tank Destroyers 1942-53 Steven J. Zaloga, 2012-08-20 The US Army had a unique tactical doctrine during World War II, placing the emphasis for tank fighting on its Tank Destroyer Command whose main early-war vehicle was the M10 3-inch Gun Motor Carriage, based on the reliable M4A2 Sherman tank chassis. This durable and versatile vehicle saw combat service from the North Africa campaign in 1943. By 1944, its gun was not powerful enough and it was rearmed with the new 90 mm gun, becoming the M36 90mm Gun Motor Carriage. This book details one of the only US armoured vehicles capable of dealing with the Panther and Tiger during the Battle of the Bulge.
