The Encyclopaedia Britannica: Medal-Mumps ,1911 The last great work of the age of reason, the final instance when all human knowledge could be presented with a single point of view ... Unabashed optimism, and unabashed racism, pervades many entries in the 11th, and provide its defining characteristics ... Despite its occasional ugliness, the reputation of the 11th persists today because of the staggering depth of knowledge contained with its volumes. It is especially strong in its biographical entries. These delve deeply into the history of men and women prominent in their eras who have since been largely forgotten - except by the historians, scholars-- The Guardian,

Impact Craters in South America Rogelio Daniel Acevedo,Maximiliano C. L. Rocca,Juan Federico Ponce,Sergio G. Stinco,2015-04-25 A complete and updated catalogue of impact craters and structures in South America from 2014 is presented here. Approximately eighty proven, suspected and disproven structures have been identified by several sources in this continent. All the impact sites of this large continent have been exhaustively reviewed: the proved ones, the possible ones and some very doubtful. Many sites remain without a clear geological in situ confirmation and some of them could be

even rejected. Argentina and Brazil are leading the list containing almost everything detected. In Bolivia, Chile, Colombia, Guyana, Paraguay, Perú, Uruguay and Venezuela only a few were observed. Only Ecuador is waiting for new discoveries. So far, the largest well stated impact site is still the Araguainha structure in Brazil with its 40 kilometers in diameter. However, two possible impact structures are larger than Araguainha: Malvinas, (with 250 kilometers in diameter) and Vichada in Colombia, (50 kilometers). This study also reports the existence of some Tertiary-Quaternary glassy impactite layers: the escorias and tierras cocidas of the pampas in Argentina.

Plains Vizcachas Luciano Luis Rasía,Claudio Gustavo Barbeito,Francisco Acuña,2024-03-29 The plains vizcacha (*Lagostomus maximus*) is a remarkable rodent of the Neotropic given several peculiar aspects of its biology, some of them

quite unique among rodents or even among mammals. This book gathers specialists studying plains vizcachas from very different approaches, including paleontology, systematics, morphology, physiology, development and conservation. It is divided in two Parts, 1) Evolutionary History, and 2) Morphology, Development and Physiology. It will surely be a required reading for any researcher working with caviomorph rodents, mastozoology of the Neotropics or internal anatomy and physiology of mammals.

The Coronavirus Crisis and Challenges to Social Development Maria do Carmo dos Santos Gonçalves,Rebecca Gutwald,Tanja Kleibl,Ronald Lutz,Ndangwa Noyoo,Janestic Twikirize,2022-01-03 This book is a novel contribution to academic discourses on the coronavirus (COVID-19) crisis and how it has impacted societies globally. It proffers an overview on the social development and political measures, from both the Global North and Global South, to prevent COVID-19's spread. It illuminates major social, political and economic challenges that already existed in different contexts and which are also currently being amplified by COVID-19. Curiously, this global pandemic has opened spaces for different actors, across the globe, to begin to fundamentally question and challenge the hegemony of the Global North, which sometimes is evident in social work. Linked to the foregoing and while reflecting beyond the pandemic and into the future, the book proposes that social work must become more political at all levels, and strive to transform societies, global social development efforts, and economic and health systems. This contributed volume of 38 chapters discusses and analyses ethical, social, sociological, social work and social development issues that complement and enrich available literature in the socio-political, economics, public health, medical ethics and political science. It provides various case studies which should enable readers to gain insights into how countries have responded to the pandemic and learn how COVID-19 negatively impacted countries in different parts of the world. This book also provides a platform for the articulation of neglected and marginalized voices, such as those of indigenous populations, the poor, or oppressed. The chapters are grouped according to three main themes as they relate to research on the COVID-19 pandemic and social work in Africa, Asia, Europe, Latin America and North America: Analysis: Social Issues and the COVID-19 Pandemic Strategies and Responses in Social Work: Globally and Locally Outlook: Looking Ahead Beyond the Pandemic Intended to engage a global, diverse and interdisciplinary audience, The Coronavirus Crisis and Challenges to Social Development is a timely and relevant resource for academics, students and researchers in inter alia Social Work, Philosophy, Sociology, Economics, and Development Studies.
