An Abecedarian of Animal Spirit Guides Mark G. Boyer,2016-03-28 Almost every person has owned a pet at one time or another in life or known someone who has. In all world religions, animals serve as spirit guides; there is spirituality to animal and human dialogue. Animals have the ability to help us reach wholeness if we learn their wisdom and integrate it into our lives. This abecedarian--a book whose contents are in alphabetical order--explores the spiritual growth that is possible by reflecting on the wisdom of creatures, which serve as spirit guides in all world religions and help humans experience the divine. The author explores animal spirit guides in the Bible, The Quran, The Dhammapada, The Rig Veda, The Analects of Confucius, stories from Aesop and Grimm, and much more. In these pages you can explore bears and bees, eagles and elephants, ravens and roosters, tadpoles and turtles, and many more. For each of the thirty-two entries, the author presents a text identifying the animal spirit guide, a reflective study, a question for journaling or personal meditation, and a concluding prayer. The spiritual life can be nourished in many ways; in this book it is enhanced by animal spirit guides.

Gods and Men in Egypt Françoise Dunand,Christiane Zivie-Coche,2004 In their wide-ranging interpretation of the religion of ancient Egypt, Françoise Dunand and Christiane Zivie-Coche explore how, over a period of roughly 3500 years, the Egyptians conceptualized their relations with the gods. Drawing on the insights of anthropology, the authors discuss such topics as the identities, images, and functions of the gods; rituals and liturgies; personal forms of piety expressing humanity's need to establish a direct relation with the divine; and the afterlife, a central feature of Egyptian religion. That religion, the authors assert, was characterized by the remarkable continuity of its ritual practices and the ideas of which they were an expression. Throughout, Dunand and Zivie-Coche take advantage of the most recent archaeological discoveries and scholarship. Gods and Men in Egypt is unique in its coverage of Egyptian religious expression in the Ptolemaic and Roman periods. Written with nonspecialist readers in mind, it is largely concerned with the continuation of Egypt's traditional religion in these periods, but it also includes fascinating accounts of Judaism in Egypt and the appearance and spread of Christianity there.

Asian Perspectives on Animal Ethics Neil Dalal,Chloë Taylor,2014-04-16 To date, philosophical discussions of animal ethics and Critical Animal Studies have been dominated by Western perspectives and Western thinkers. This book makes a

novel contribution to animal ethics in showing the range and richness of ideas offered to these fields by diverse Asian traditions. *Asian Perspectives on Animal Ethics* is the first of its kind to include the intersection of Asian and European traditions with respect to human and nonhuman relations. Presenting a series of studies focusing on specific Asian traditions, as well as studies that put those traditions in dialogue with Western thinkers, this book looks at Asian philosophical doctrines concerning compassion and nonviolence as these apply to nonhuman animals, as well as the moral rights and status of nonhuman animals in Asian traditions. Using Asian perspectives to explore ontological, ethical and political questions, contributors analyze humanism and post-humanism in Asian and comparative traditions and offer insight into the special ethical relations between humans and other particular species of animals. This book will be of interest to students and scholars of Asian religion and philosophy, as well as to those interested in animal ethics and Critical Animal Studies.

Human Animals Frank Hamel, 2022-07-20 Frank Hamel's 'Human Animals' presents a thought-provoking exploration of the metamorphosis between the human and animal states, reminiscent of Kafkaesque imaginings but with a pseudo-scientific lens. Hamel delves into the anthropomorphic and therianthropic transformations with a clinical and systematic approach, unpacking the conceivable methods such transitions could be realized, as well as their potential reversals. The narrative is grounded in a literary style that weds scientific discourse with speculative fiction, an amalgamation that situates it uniquely at the crossroads of fantasy, science, and philosophy. The historic and contemporary literary context of human-animal transformation provides a rich backdrop to Hamel's discourse, tapping into a vein of mythological and psychological significance that has long fascinated humanity. Frank Hamel, a keen observer of the human condition and its flirtation with the animalistic, brings to his writing a profound fascination with both the real and the imagined. His motivations for penning 'Human Animals' likely stem from an era ripe with scientific discovery and psychological inquiry, where the boundaries of the possible are pushed by the burgeoning fields of psychology and biology. This work likely reflects Hamel's engagement with the themes of identity, evolution, and the inherent animal nature within humans. 'Human Animals' is recommended for readers who yearn to traverse the shadowy corridors between man and beast. It will most appeal to those with an interest in the psychological underpinnings of transformation, admirers of meticulous speculative narratives, and connoisseurs of literary works that provoke the imagination to ponder the limits of humanity. Hamel's offering is a must-read for anyone contemplating the fluid interplay between our civilized selves and our primal instincts.

Migration and Climate Change Jamila Alaktif, Stéphane Callens, 2020-07-16 This book aims to provide a better understanding of how human cultures interact with climate change over an extended period of time. It is an analysis of the past and present, ranging from the first human migration to contemporary organizational management using an approach developed by Michel Foucault, defined as: the research, the practice, the experience, by which the subject operates on themselves the transformations necessary in order to have access to the truth. This book consists of two parts. The first part

focuses on climate change and the substantial effects it had on the first human cultures. The second part explores the role of organizations and the development of new frameworks for action in more recent times of anthropogenic climate change.

Notes for a New Mind William Dell,2005 What is known about the split brain is reviewed, in a historical context, as a paradigm for a new mind. The poetry of William Wordsworth is examined as a precursor to this mentality. The possibility of a new mind (and its new myth: the deconstruction) emerging from the split brain in the modern world is set forth. The last issue of consciousness, perhaps, is not the resolution of duality, but is the multiform periphery. The question is: am I more than my brain?

An Introduction to Religious and Theological Studies, Second Edition Cyril Orji,2021-01-07 An Introduction to Religious and Theological Studies walks students through topical issues to be encountered in the study of the Abrahamic religions: Judaism, Christianity, and Islam as these religions encounter other religions in the context of the wider ecumenism. The text is written from a Christian point of view and aims at helping students understand that to be Christian is to be ecumenical. African Traditional Religions (ATRs) has been included in this survey to provide background for the religious traditions and cultures of peoples of Africa as Christianity moves inexorably southward. The book has been written with undergraduate general education students in mind—including meeting the needs of those in seminaries and theological institutes.

Ghosts & Legends of Crawfordsville, Indiana Christopher M. Hunt,2023 Crawfordsville, Indiana, has a rich history of spiritualism and paranormal lore. In the late 1800s and early 1900s mediums were trained in the city, and spiritualism was

preached from the street corners. Spirit photography was all the rage, and many flocked to town to have their photos taken with ghosts. The Crawfordsville Monster caused a nationwide stir after terrorizing the town for several days and being spotted by more than 100 people. Urban legends also abound in this small city, including legends like the cursed chair of Oak Hill cemetery, Spooky Hollow and the Old Hospital. Authors Christopher and Christina Hunt share these tales and others devoted to the mysterious past and darkly thrilling secret life of the heart of Montgomery County.

Böder the Giant T. J. C., 2016-02-03 In this fantasy novel, a giant named Bder sets out to prove his worth through a series of challenges and adventures across the continent of Durogg which is populated by manimals those who are half human and half animal. Some years ago, these people had worked to rid themselves of Bder, a ten-meter-tall giant pest. The stories say he had been marauding among their farming communities and consuming everything in sight. But the truth, as always, is a little bit more complicated than that. Bder has been outcast and exiled to live on an island in the middle of a large river, when an opportunity arises that might help him to redeem himself. Although the populace at large distrusts and fears him, a merchant in need of a rambunctious giant seeks him out for assistance. So Bder, along with friends and family, sets out on a series of adventures in which he receives help from a princess, deals with some trolls, fights in the arena, faces giant reptiles, Locustmen and pirates and recovers a vast treasure. Whilst along the way he seeks to win the hearts of both a community and a lovely giantess. But only time will tell if Bder can ever fully redeem himself! T.J.C.
