Modificación y terapia de conducta Harold Leitenberg,1982

Manual de técnicas de modificación y terapia de conducta Francisco Javier Labrador Encinas,José Antonio Cruzado Rodríguez,Manuel Muñoz López,2004-09-06 Ha transcurrido casi un cuarto de siglo desde que comenzó a desarrollarse la modificación de conducta en España. Tras un rápido crecimiento, se ha convertido en el tipo de intervención psicológica más utilizado y que mejores resultados ha obtenido. La presente obra ofrece un panorama actualizado de lo que constituyen hoy en día los procedimientos y las técnicas más importantes de modificación de conducta. El objetivo principal del libro es el de enseñar con precisión y minuciosidad la aplicación de cada una de las técnicas, tanto de evaluación como de tratamiento, teniendo siempre como referencia el marco teórico adecuado. Los capítulos exponen, pormenorizadamente y con abundantes ejemplos, la forma de proceder en la utilización de cada una de las técnicas, junto a sus posibles variaciones y todos los aspectos a tener en cuenta para una correcta aplicación de las mismas. Es un manual útil para el profesional, bien como obra de consulta para la solución de los problemas que se presenten durante su quehacer habitual, bien como obra que posibilite su reciclaje. A la vez, constituye una guía de entrenamiento para el estudiante que se acerque a este campo de intervención. Es también muy aconsejable para los profesionales de campos de conocimiento o intervención próximos que deseen profundizar en la modificación de conducta.

Evolución y modificación de la conducta Konrad Lorenz,1985 En este libro Lorenz emprende un análisis penetrante de los conceptos de lo “innato” y lo “aprendido” en el comportamiento. Ninguno de los dos términos, “innato” o “aprendido” es aplicable a pautas de comportamiento completamente desarrolladas sino sólo a la procedencia de la información que constituye el requisito previo para que el comportamiento se adapte al medio. Tal información entra en el sistema orgánico ya sea a través de la especie, que la ha adquirido por mutación y selección, o a través del individuo, que la ha adquirido en la acción recíproca con su medio ambiente habitual. Por una parte, puede haber pautas de comportamiento que deben estar adaptadas exclusivamente a información adquirida en la evolución de la especie, en tanto que, por otra parte, todo comportamiento adaptativo presupone necesariamente un mecanismo programado sobre la base de la información filogenéticamente adquirida. Ni el intercambio entre la adaptación filogenética y la modificación adaptativa ni las formas

análogas en que ambas extraen información del medio -dice Lorenz- pueden eximir a los psicólogos de distinguir entre dos procesos filogenéticamente diferentes ni de rastrear hasta sus fuentes la información que está en la base de toda adaptación del comportamiento.

Técnicas de modificación de conducta Francisco Javier Labrador Encinas,2014-06-02 En poco más de treinta años la psicología ha pasado de ser una profesión del futuro a ser una profesión con un gran presente. Hoy la actuación profesional de los psicólogos es demandada y valorada positivamente en campos tan dispares como el clínico, el laboral, el jurídico o el escolar. Los psicólogos tienen habilidades profesionales eficaces para mejorar las condiciones de vida de las personas, grupos u organizaciones. El desarrollo de la investigación y conocimientos de la psicología ha resultado, sin duda, muy importante, pero lo verdaderamente determinante ha sido disponer de habilidades o técnicas de intervención psicológica. En esta obra se recopilan las técnicas de modificación de conducta. Estas técnicas se exponen de forma detallada, teniendo como referencia constante la evaluación empírica de su eficacia y una búsqueda sistemática de sus fundamentos científicos, a fin de que puedan servir como guía de actuación para expertos, ya que su objetivo fundamental es ser útil al psicólogo profesional. El libro está organizado en tres partes. La primera se centra en el proceso y procedimientos de evaluación. La segunda expone, de forma pormenorizada y orientada a la práctica, las principales técnicas de modificación de conducta. La tercera y última parte incluye, bajo el epígrafe «Ayudas a la intervención psicológica», seis capítulos que servirán para la aplicación profesional de dichas técnicas.

Técnicas de modificación de conducta José Olivares Rodríguez,2014 Pese a su relativa juventud, actualmente, la modificación de conducta, también conocida como terapia de conducta en su aplicación a contextos clínicos, se presenta como punto de referencia necesario para todo aquel que quiera generar, desarrollar, mantener, disminuir o eliminar comportamientos relevantes para el sujeto o entienda necesario modificar el medio en el que tienen lugar (o deberían tenerlo) dichos elementos. Desde la perspectiva de la modificación de conducta el buen psicólogo debe aprender a serlo, se hace a través del estudio concienzudo de la disciplinas que integran la psicología científica y muy especialmente de lo que

otros han hecho antes que él, en relación con la evaluación y tratamiento del problema de que se trata, así como de las dificultades halladas y la forma de afrontarlas. El presente libro trata de contribuir a ello. Sin perder el rigor científico, pretende maximizar el aspecto pedagógico utilizando abundantes ejemplos en relación con cada concepto clave, cuadros y tablas con la finalidad de presentar síntesis de las cuestiones más relevantes, diagramas para orientar y guiar la toma de decisiones, la recomendación de lecturas que se comentan brevemente para guiar al lector sobre el contenido, etc. Todo ello acompañado de una prueba objetiva, con su correspondiente clave de respuestas correctas, que recoge preguntas relativas a las cuestiones más relevantes de cada capítulo, a fin de facilitar la autoevaluación.
