Lights Out Ted Koppel,2016-10-18 NEW YORK TIMES BESTSELLER • Ted Koppel reveals that a major cyberattack on America's power grid is not only possible but likely, that it would be devastating, and that the United States is shockingly unprepared. "Fascinating, frightening, and beyond timely."—Anderson Cooper Imagine a blackout lasting not days, but weeks or months. Tens of millions of people over several states are affected. For those without access to a generator, there is no running water, no sewage, no refrigeration or light. Food and medical supplies are dwindling. Devices we rely on have gone dark. Banks no longer function, looting is widespread, and law and order are being tested as never before. It isn't just a scenario. A well-designed attack on just one of the nation's three electric power grids could cripple much of our infrastructure—and in the age of cyberwarfare, a laptop has become the only necessary weapon. Several nations hostile to the United States could launch such an assault at any time. In fact, as a former chief scientist of the NSA reveals, China and Russia have already penetrated the grid. And a cybersecurity advisor to President Obama believes that independent actors—from "hacktivists" to terrorists—have the capability as well. "It's not a question of if," says Centcom Commander General Lloyd Austin, "it's a question of when." And yet, as Koppel makes clear, the federal government, while well prepared for natural disasters, has no plan for the aftermath of an attack on the power grid. The current Secretary of Homeland Security suggests keeping a battery-powered radio. In the absence of a government plan, some individuals and communities have taken matters into their own hands. Among the nation's estimated three million "preppers," we meet one whose doomsday retreat includes a newly excavated three-acre lake, stocked with fish, and a Wyoming homesteader so self-sufficient that he crafted the thousands of adobe bricks in his house by hand. We also see the unrivaled disaster preparedness of the Mormon church, with its enormous storehouses, high-tech dairies, orchards, and proprietary trucking company—the fruits of a long tradition of anticipating the worst. But how, Koppel asks, will ordinary civilians survive? With urgency and authority, one of our most renowned journalists examines a threat unique to our time and evaluates potential ways to prepare for a catastrophe that is all but inevitable.

Lights Out Adam Green, 2016-01-20 *Lights Out* by Ted Koppel - Key Summary & Analysis There exists a question about how probable that is. The guide of Koppel estimates the pessimists and optimists but does of separating details from fiction an unhealthy task. *Lights Out* lacks concentration. Koppel contends the energy grid is vulnerable to a cyberattack. He points to not enough business safety criteria, how seldom anybody seems able to preserving established hackers from a PC and how energy firms are influenced by the other person to get and transfer energy. Nonetheless he offers no examples of prosperous cyberattacks from the electrical market. His competition is the fact that since info has been stolen by hackers from Sony and suppliers, then there is on our energy a digital strike imminent. *Lights Out* accounts that Russia and China have the technological power to crack the U.S. power grid, however the guide points out that this assault be part of combat or would constitute an act of war itself. If America are at conflict with China or Russia, then we have troubles greater than a blackout. Even in the case of such an assault, Koppel reviews, it is unclear the blackout would be more than separated. The failures he does cite were a direct result natural problems. Assessing the Security of Critical Infrastructure: Threats, Vulnerabilities, and Solutions, S.HRG. 114-721, May 18, 2016, 114-2 ,2018

Assessing the Security of Critical Infrastructure United States. Congress. Senate. Committee on Homeland Security and Governmental Affairs, 2017

Moment of Truth Kelly McKinney, 2018-07-17 "Miami Beach Devastated by Monster Category 5 Hurricane" "Times Square Incinerated by Homemade Nuclear Bomb" "Magnitude 9.0 Earthquake Reduces Downtown Seattle to Rubble" These aren't actual headlines—but they could be. Even though they sound like next summer's blockbuster movies, each of these worst-case scenarios is a real threat—a threat for which America is hugely underprepared. But it doesn't have to be that way. This is not a book about disasters. Instead, *Moment of Truth* will tell you what these genuine threats mean for society as a whole, as well as for your region or town—or you. All we have to do is open our eyes and look beyond the "brick wall of hope" that clouds our vision in collective denial. In addition to advice for government, *Moment of Truth* contains practical steps that you can take now keep you and your family safe in the face of the next catastrophe. Because it may come down to just you.

Out of Darkness Ralph Nader, 2024-06-25 A collection of columns and essays that reveal Ralph Nader at his outspoken and prescient best, fighting the good fight against corporate corruption, unbalanced political power, consumer dangers, big pharma, and climate deniers. Features an introduction by Lewis Lapham. This collection is classic Nader—exhorting us to make our world and nation a better place, even when faced with unchecked political and corporate power, and perverse market and regulatory incentives. He starts with the declaration that the national Democratic Party bureaucrats are either inept or bewildered. With its record-setting campaign fundraising, he bemoans how the Party can't seem to figure out how to go on the offensive against the overtly lying, cruel, corrupt, law-breaking, Wall Street over Main Street, Trumpian Republican Party. In another essay he praises Canada, explaining that the majority of citizens love their health care system—Medicare-for-all, free choice of doctor and hospital, everybody in, nobody out and far less expensive with better outcomes overall. Highlighting heroes like Pete Seeger, Wendell Berry, the journalist Helen Thomas, Nader also celebrates citizens like the lesser-known charismatic George S. Hawkins, general manager of the District of Columbia Water and Sewer Authority who brought immense energy, vision, and ambitious, overdue plans to the forefront for American's public drinking water. Meanwhile, he doesn't shy away from enemies—for example Nader slams the evils of Big Pharma's strength and hold over Congress and infinite greed. Nader also brings American history to the present day with creative twists. "We need to remember Ben Franklin, our frugal forebear, who coined the phrase 'a penny saved is a penny earned,'" he writes. "Today he would say 'a trillion BTUs saved is a trillion BTUs earned.'" Ranging from hernia repair to auto safety reports and warnings about lethal super-bugs and global pandemics from 2013, Nader's essays and newspaper columns will inform and activate his legions of fans.

The Protected Michael W. Trott, 2019-06-18 "When I was the Director of Central Intelligence, I relied on Mike and his colleagues to keep me and my family safe around the world." - George Tenet Former Director Central Intelligence Agency Close personal protection can often mean the difference between life and death. But for too many protectees or practitioners, understanding the world of executive protection (EP) can be an intimidating and unfamiliar prospect. The Protected is an inside view of personal security, intelligence and executive protection written by someone who has lived it for more than 30 years. In this book, former CIA Special Agent and security specialist Michael Trott demonstrates how much EP depends on training, experience, proper intelligence, lessons learned, one's ability to operate both alone and in a team, and - perhaps most importantly - adopting the proper mindset. Aimed at protectees, practitioners and all those with an interest in EP, The Protected contains valuable insight on: • Determining your personal risk profile (i.e., your why) • How the global risk environment affects your personal security • Establishing a durable and effective protection program • The subtle nuances of providing successful close protection • Important EP methodologies, philosophies, complexities and mindsets • The people who protect others and their unique perspectives

Look Who's Watching, Revised Edition Fen Osler Hampson, Eric Jardine, 2017-11-08 The Internet ecosystem is held together by a surprisingly intangible glue — trust. To meet its full potential, users need to trust that the Internet works reliably and efficiently when providing them with the information they are seeking, while also being secure, private and safe. When trust in the Internet wanes, the network's stock of "digital social capital" falls and users begin to alter their online behaviour. These often subtle changes in behaviour tend to be collectively highly maladaptive, hindering the economic, developmental and innovative potential of the globe-spanning network of networks. *Look Who's Watching: Surveillance, Treachery and Trust Online* confirms in vivid detail that the trust placed by users in the Internet is increasingly misplaced. Edward Snowden's revelations that the United States National Security Agency and other government agencies are spying on Internet users, the proliferation of cybercrime and the growing commodification of user data and regulatory changes — which threaten to fragment the system — are all rapidly eroding the confidence users have in the Internet ecosystem. Based on a combination of illustrative anecdotal evidence and analysis of new survey data, *Look Who's Watching* clearly demonstrates why trust matters, how it is being eroded and how, with care and deliberate policy action, the essential glue of the Internet can be restored.

The Handbook of Homeland Security Scott N. Romaniuk, Martin Scott Catino, C. Augustus Martin, 2023-07-07 The *Handbook of Homeland Security* Handbook is a convenient, one-stop reference and guide to the latest regulations and developments in all things relevant to the homeland security and defense domain. The book is divided into five parts and addresses such critical areas as countering terrorism, critical infrastructure protection, information and cybersecurity, military and private sector support for Homeland Security, risk assessment, and preparedness for all-hazards and evolving threats. In total, more than 100 chapters outline the latest developments in homeland security policies, directives, and mandates as well as emergent threats and topical considerations for the Department of Homeland Security (DHS) and its stake-holders. The diverse array of chapter topics covered—contributed to by dozens of top experts in the field—provides a useful and important resource for any student, professional, researcher, policy-maker, or library in understanding the domestic initiatives of public-sector Homeland Security entities and their responsibilities in the current global environment.

He Caught the Westbound Dayton Lummis, 2017-04-19 He caught the westbound is an old American hobo expression for someone who has departed from this life. In the case of this book it is employed to be symbolic of a passing American way of life and the people who created that. We live in troubled times, and the author often uncomfortably reminds us so. Yet positive travel experiences relieve the pessimism wherein the author says, It could be worse. But not much . . .

Justice for People on the Move Gillian Brock, 2020-02-20 Offers a comprehensive framework that can assist in responding to new justice challenges for people on the move.

The Age of Perversion Danielle Knafo, Rocco Lo Bosco, 2016-12-01 American Board and Academy of Psychoanalysis

Book Prize Winner for 2018 (Theoretical Category) We have entered the age of perversion, an era in which we are becoming more like machines and they more like us. The Age of Perversion explores the sea changes occurring in sexual and social life, made possible by the ongoing technological revolution, and demonstrates how psychoanalysts can understand and work with manifestations of perversion in clinical settings. Until now theories of perversion have limited their scope of inquiry to sexual behavior and personal trauma. The authors of this book widen that inquiry to include the social and political sphere, tracing perversion's existential roots to the human experience of being a conscious animal troubled by the knowledge of death. Offering both creative and destructive possibilities, perversion challenges boundaries and norms in every area of life and involves transgression, illusion casting, objectification, dehumanization, and the radical quest for transcendence. This volume presents several clinical cases, including a man who lived with and loved a sex doll, a woman who wanted to be a Barbie doll, and an Internet sex addict. Also examined are cases of widespread social perversion in corporations, the mental health care industry, and even the government. In considering the continued impact of technology, the authors discuss how it is changing the practice of psychotherapy. They speculate about what the future may hold for a species who will redefine what it means to be human more in the next few decades than during any other time in human history. The Age of Perversion provides a novel examination of the convergence of perversion and technology that will appeal to psychoanalysts and psychoanalytic psychotherapists, social workers, mental health counselors, sex therapists, sexologists, roboticists, and futurists, as well as social theorists and students and scholars of cultural studies.
