Artificial Intelligence Governance and the Blockchain Revolution Qiqi Gao, Jiteng Zhang, 2024-03-19 This is the first professional academic work in China to discuss artificial intelligence and blockchain together. Artificial intelligence is a productivity revolution, and its development has a significant and profound impact on global changes. However, at the same time, its development also brings a series of challenges to human society, such as privacy, security, and fairness issues. Therefore, the significance of blockchain is even more prominent. Blockchain is a revolution in production relations, which will propose important solutions to the challenges of privacy, security, and fairness that arise after the development of artificial intelligence. The book not only discusses the problems currently faced by the development of artificial intelligence, as well as the new opportunities and challenges that artificial intelligence brings to future global governance, but also explains the further development direction of the intelligent revolution from the perspective of blockchain.

Cowdrey, Tananarive Due, Greg Egan, Eliot Fintushel, Peter F. Hamilton,

The Year's Best Science Fiction: Seventeenth Annual Collection Gardner Dozois, 2000-08-12 In science fiction's early days, stories often looked past 1984 to the year 2000 as the far unknowable future. Here now, on the brink of the twenty-first century, the future remains as distant and as unknowable as ever . . . and science fiction stories continue to explore it with delightful results: Collected in this anthology are such imaginative gems as: *The Wedding Album* by David Marusek. In a high-tech future, the line between reality and simulation has grown thin . . . and it's often hard to tell who's on what side. *Everywhere* by Geoff Ryman. Do the people who live in utopian conditions ever recognize them as such? *Hatching the Phoenix* by Frederik Pohl. One of science fiction's Grand Masters returns with a star-crossing tale of the Heechee---the enigmatic, vanished aliens whose discarded technology guides mankind through the future. *A Hero of the Empire* by Robert Silverberg. Showing that the past is as much a province of the imagination as the future, this novelette returns to an alternate history when the Roman Empire never fell to show us just how the course of history can be altered. The twenty-seven stories in this collection imaginatively take us to nearby planets and distant futures, into the past and into universes no larger than a grain of sand. Included here are the works of masters of the form and of bright new talents. Supplementing the stories are the editor's insightful summation of the year's events and a lengthy list of honorable mentions, making this book a valuable resource in addition to serving as the single best place in the universe to find stories that stir the imagination and the heart.

The Rivers of Paradise David Noel Freedman, Michael J. McClymond, 2001 A fascinating look at the founders of the world's main religions. The major religious traditions of the world owe their existence to the vision of an ancient founder. This important volume explores the lives of the five founders of major world religions-Moses, Buddha, Confucius, Jesus, and Muhammad-chronicling what is actually known of these charismatic men and introducing readers to the cultural and religious worlds that heard their messages. Readers in predominantly Christian lands, in addition to learning about the lives of Confucius, Buddha, and Muhammad- whom they might not be familiar with- will also be introduced to modern research now casting fresh light on the careers of Moses and Jesus. Whether studied individually or in comparison with one another, these biographies, together with a chapter on the characteristics of religious leadership, chart the spiritual rivers that continue to feed the diversity of religious expression today.
