Diseño y testeo de un instrumento de observación de clases que favorezca la reflexión de los docentes en educación superior Jorge Abelardo Azócar Bascuñán, 2018 El presente informe tiene como objetivo dar a conocer el desarrollo y los resultados de un proyecto de intervención, cuyo propósito es contribuir al programa de acompañamiento docente institucional en una organización de educación superior. Se presentan los principales antecedentes teóricos que definen la metodología de la evaluación del programa vigente y el diseño y testeo del nuevo instrumento de observación. Los resultados permitieron concluir que el programa de acompañamiento institucional genera observaciones con un fuerte foco en el docente (69%) y una modalidad principalmente evaluativa, los que son patrones menos deseados. Adicionalmente se observó que no genera evidencias del logro de la reflexión docente durante la retroalimentación. El nuevo instrumento diseñado en este proyecto de intervención, favoreció una mirada integral de los componentes del triángulo instruccional además de una modalidad descriptiva (>90%), que son estándares de observadores más entrenados. Adicionalmente produjo evidencias atribuibles a la reflexión de los docentes durante la retroalimentación. Estos resultados permiten proyectar el nuevo instrumento diseñado como un complemento del programa institucional para profundizar según criterios de criticidad que se definan.

Rediseño de pauta observación de clases para apoyar desarrollo profesional de profesores y formación en habilidades del siglo XXI de estudiantes León Iván Vásquez Rojas, 2018 El presente estudio busca dar cuenta de un proyecto de intervención realizado en un colegio particular pagado ubicado en la comuna de Ñuñoa, Santiago de Chile, a través del cual se abordan tanto el proceso de evaluación y desarrollo profesional docente como de formación en habilidades del siglo XXI de sus estudiantes. En el contexto de un establecimiento educacional con muy buenos resultados académicos en las evaluaciones nacionales estandarizadas (SIMCE y PSU) y que es bien evaluado y valorado por profesores, estudiantes y apoderados, este proyecto busca acercarse -a través del empleo de metodologías básicamente cualitativas- a la percepción que tienen agentes claves en el colegio respecto a dichos procesos y, en conjunto con información relativa a prácticas de aula y de acompañamiento de profesores instaladas desde la gestión, realizar un diagnóstico de la situación del establecimiento. Los

resultados revelan un uso restringido de la información obtenida de los procesos que están institucionalizados para el desarrollo profesional de sus profesores, procesos que, además, se muestran poco articulados como sistema ni alineados con el Proyecto educativo del establecimiento. Finalmente, a la luz de lo que manifiesta la bibliografía revisada se plantea una propuesta de mejora a mediano plazo que comienza con la instalación y validación de una Pauta de Observación de clases que se diseña a partir de ciertos estándares.
