Gill, Kinga Tibori-Szabó, 2023-12-21 This book provides accessible, in-depth coverage and analysis of how international law regulates the use of force through an intra-disciplinary perspective. The Global 1920s Richard Carr, Bradley W. Hart, 2016-01-29 The 1920s is often recognised as a decade of fascism, flappers and film. Covering the political, economic and social developments of the 1920s throughout the world, *The Global 1920s* takes an international and cross-cultural perspective on the critical changes and conditions that prevailed from roughly 1919 to 1930. With twelve chapters on themes including international diplomacy and the imperial powers, film and music, art and literature, women and society, democracy, fascism, and science and technology, this book explores both the 'big' questions of capitalism, class and communism on the one hand and the everyday experience of citizens around the globe on the other. Utilising archival sources throughout, it concludes with an extensive discussion of the circumstances surrounding the 1929 stock market crash and the onset of the Great Depression, the effects of which were felt worldwide. Covering topics from the oil boom in South America to the start of civil war in China, employment advances and setbacks for women across the globe, and the advent of radio and air travel, the authors provide a concise yet comprehensive overview of this turbulent decade. Containing illustrations and a selection of discussion questions at the end of each chapter, this book is valuable reading for students of the 1920s in global history.

The Legacy of Serbia's Great War Alex Tomić, 2024-01-05 In the winter of 1915, following the invasion of Serbia by the Central Powers, the Serbian Army retreated across the mountains of Albania and Montenegro together with thousands of civilians. Around 240,000 lost their lives. Today, the story of the retreat is little known, except in Serbia where it represents the heroic Serbian sacrifice in the Great War. In this book Alex Tomić examines the centenary events memorializing the First World War with the retreat at its core and provides a persuasive account of the ways in which the remembrance of Serbian history has been manipulated for political purposes. Whether through commemorations, ceremonies or grass-root initiatives, she demonstrates how these have been used as distractions from the more recent unexamined past and in doing so provides an important new perspective on the cultural history of commemoration.

Life, Death, and the Western Way of War Lorenzo Zambenardi, 2022-04-07 Life, Death, and the Western Way of War traces when and how western soldiers--once regarded as simple fighting tools--became the far less expendable beings that we know today. In Kant's terms, the study traces the process through which soldiers have been turned from mere military means into ends in themselves. The book argues that such a major transformation is largely the result of a shift in the social meaning ascribed to soldiers' death. It suggests that looking at death can somehow provide a privileged angle to understanding the value that societies attach to life. The narrative emerging from the empirical evidence will show that the story of attitudes towards soldiers' death is the story of a gradual, increasing process of individualization in the social meaning attached to human loss in war. Such a development, which took centuries to emerge in full, was neither simple nor linear. It was a process that the state was temporarily able to frame in the collective narrative of the nation, but which ultimately has seen the increasing importance of the life of the individual soldier. In tracing the process through which soldiers have been turned from an amorphous collective into distinct individuals, this book shows how the emphasis on the primacy of the individual has further eroded the effectiveness of western warfare as an instrument of foreign policy. In particular, the modern, liberal conception of the soldier has had the unintended consequence of jeopardizing the Clausewitzian relationship between military means and political ends.

International Water Law and the Human Right to Water Imad Antoine Ibrahim, 2024-11-19 This book examines the development of international law applicable to Transboundary Aquifers (TBAs) considering the Human Right to Water and Sanitation (HRWS). The purpose is to determine how International Water Law (IWL) and the HRWS can be harmonized in the context of TBAs. This is important given rules and instruments adopted to address this topic are relatively nascent, and the field itself is still in the process of developing regulatory frameworks. Taking the application of the HRWS to shared aquifers as a case study, the work discusses whether IWL and International Human Rights Law complement each other. The response

to this question requires an analysis of the development of International Groundwater Law and its challenges, the evolution of the HRWS, the nature of transboundary groundwaters, and the interplay between these two fields. The author argues that IWL agreements should contain a provision related to the HRWS to ensure the protection of this right with a stipulation included in the nonbinding instrument that tackles shared groundwaters: the Draft Articles on the Law of Transboundary Aquifers adopted in 2008 through the United Nations General Assembly Resolution. The book will be of interest to international lawyers, water and human right experts, geologists, and anyone interested in water and human rights issues.

Colonial Origins of Democracy and Dictatorship Alexander Lee,Jack Paine,2024-05-30 Why are some countries more democratic than others? For most non-European countries, elections began under Western colonial rule. However, existing research largely overlooks these democratic origins. Analyzing a global sample of colonies across four centuries, this book explains the emergence of colonial electoral institutions and their lasting impact. The degree of democracy in the metropole, the size of the white settler population, and pressure from non-Europeans all shaped the timing and form of colonial elections. White settlers and non-white middle classes educated in the colonizer's language usually gained early elections but settler minorities resisted subsequent franchise expansion. Authoritarian metropolises blocked elections entirely. Countries with lengthy exposure to competitive colonial institutions tended to consolidate democracies after independence. By contrast, countries with shorter electoral episodes usually shed democratic institutions and countries that were denied colonial elections consolidated stable dictatorships. Regime trajectories shaped by colonial rule persist to the present day.

CONCEPTS OF INTERNATIONAL TREATIES JOSEPH IDIGO,2023-12-26 This book deals extensively with commentaries on all articles in the Vienna Convention on the Law of Treaties 1969. The book starts with the introduction to treaty and, then, the management of treaties that brings in, as a starting point, the International Law Commission (ILC) and the mandate it received for the codifying of customary international laws and enhancing the progressive development of international law. After this part, the book, then, goes into dealing with each article in the Vienna Convention on the Law of Treaties (VCLT) 1969. Each article is backed by the various activities of the Law Commission that gave rise to it. Then, there are relevant references (in footnotes) that make the contents of each article richer and more explanatory. Each chapter ends with a summary to help the reader easily and quickly remember the highlights of the treated article in that chapter. This process continues till article 85 VCLT, the last article in the VCLT. The realization that Treaty Law is an important aspect of International Law is the main motivation for writing this book. Thus, it is suitable for all international law practitioners and international organizations.

Redefining Reparations Lorena De Vita, Constantin Goschler, 2025-03-24 This edited volume offers a new interpretation of the historically momentous 1952 Wassenaar negotiations between representatives of the Federal Republic of Germany, Israel, and the Jewish Claims Conference to negotiate reparations, compensation, and restitution in the aftermath of the Holocaust. Wassenaar 1952 marked the first time that reparations were the subject of negotiations between representatives of victims and perpetrators following mass human rights violations and genocide. The reparations program that Germany established after the Holocaust eventually became a point of reference for many calling for reparations to deal with the aftermath of other atrocities – from colonialism to slavery – in contexts as diverse as Namibia, the United States, and beyond. Combining perspectives from history, anthropology, international relations, and transitional justice, this volume reassesses the course and global legacy of these negotiations. The book's holistic and nuanced intervention in the study of the politics of repair makes it essential reading for students of history, law, transitional justice, and political science interested in the complex topic of reparations.

India's National Security Satish Kumar,2017-11-22 The global security environment in the last five years has been characterised by a state of 'no war, no peace' among major powers, resulting in a state of uncertainty about their national security objectives. For instance, the US has been concerned about the attitudes of Iran, Russia, North Korea, China, and others, and yet did not expect a direct military conflict with them. On the other hand, China has expanded its naval strategy from a mere 'off-shore defence' to 'open seas protection' and has called for both 'defence and offence' instead of merely 'territorial air defence', thereby indicating preparedness for the possibility of a military confrontation. The major powers have been thus groping for suitable responses to their threat perceptions. It is in this kind of a complex and confusing international environment that India, as a rising power, has been called upon to wade through its strategic partnerships with major powers and nurture friendships with various Asian and African countries. This sixteenth volume of India's National Security Annual Review offers indispensable information and evaluation on matters pertaining to national security. It undertakes a thorough analysis of the trends to provide a backdrop to India's engagement with various countries. The volume also discusses persisting threats from China and Pakistan. With contributions from experts from the fields of diplomacy, academia, and civil and military services, the book will be one of the most dependable sources of analyses for scholars of international relations, foreign policy, defence and strategic studies, and political science, and practitioners alike.

Utilization of International Watercourses on the Korean Peninsula Yeonghwan Chang,2023-06-05 The history of rivers crossing the borders of rival countries, such as East and West Germany, China and Russia, the United States and its neighbors, has much to teach about international watercourse management. In the first book written in English about international watercourses on the Korean Peninsula, Yeonghwan Chang uses a study of foreign cases to propose a wide range of specific strategies and projects for efficient use of shared rivers on the Korean Peninsula. These strategies may also provide useful guidance for future cooperative projects between South Korea and North Korea.

Policy Responses to the Interwar Economic Crisis Adnan Türegün,2022-04-01 This book is about national economic policy responses to the Great Depression of the interwar period. Taking off from a generally liberal starting point in the 1920s, states diverged greatly in their responses. Some were daring while others remained conservative. The two groups further differed among themselves in both degree and kind. The book gives a certain shape to this messy reality by identifying broad policy patterns (paradigms), and offers an explanation of it which emphasizes the ideational disposition of policy actors while recognizing the context that limits what they can do. More specifically, it argues that the ideas held by rulers and the strategies they consequently developed regarding three major groups of interest – business, labour, and, most critically, agrarians – largely determined economic policy variation across nations.
