Cosmic Reawakening Artimia Arian,2015-11-02 The human body contains hundreds of concentrated energy center sites, which are referred to as chakras. In Sanskrit chakra signifies wheel. The chakras are centers of force, situated in the etheric body, through which we receive, transmit and process life energies. The chakras are the network through which the spirit and its 3 vehicles (physical, emotional and mental bodies) interact, integrating them all into one complete system. Although there are hundreds of chakras in the body, there are 7 major energy centers, corresponding to distinct aspects of our consciousness. Each chakra possesses its own individual characteristics and functions. As each chakra has a certain vibration, each associated organ, gland and color vibrates at a certain frequency too. Each chakra has a corresponding relationship to the organs, glands, colors and food. If a gland or organ is not functioning well, it hinders the corresponding chakra experience and vice-versa.

Lipid Nutrition Randy L. Wysong, 1990 Fats in foods and fat on the body have become national obsessions. With due cause. Research is showing the far-reaching deleterious effects of obesity as well as relationships between lipid (fat and oil) consumption and a wide range of health concerns. In this seminal book, Dr. Wysong brings a surprise and reveals that fats are not the nutritional demons popularly assumed. The key to health is not to avoid dietary fat and jump on the cholesterol checking and drug band wagon. Lipids are a part of every cell and are essential components of hormones and body regulators. Even cholesterol (in its natural state) is critical to health. If it is not eaten, the body produces it. Dr. Wysong provides the understanding necessary to avoid such popular and professional myths. Natural fats are not something to avoid, but rather to seek and cherish. The real villain is food processing. Heat, light, air, hydrogenation, and time are the enemies of healthful fats. Not only does processing destroy important fats and oils, but it can convert them to dangerous disease-producing toxins. Dr. Wysong explains how to choose foods that are protected from these dangers. Read carefully, Lipid Nutrition can be one of those rare books which replaces the reading of dozens of others. Whether you are a person just concerned with better health and nutrition, or a professional seeking keys to prevention and treatment, Lipid Nutrition will prove to be a wonderful aid to understanding and a valuable resource for making healthy decisions.

An Amazing Journey to Health Juanita Prince, 2010-08 An Amazing Journey to Health draws attention to the importance of positive thinking and a healthy lifestyle. Learn about the American food chain, and how rapidly it has changed since the last century, which is alarming! We must learn how to make better choices for better health, or our future may be bleak as we

face the consequences of our poor health choices. In addition to providing the background about food and how it affects us, the book also provides wholesome, healthy, and balanced recipes that are low in cholesterol, fats, and trans fatty acids. These recipes do not contain processed foods, dairy, or GMO. This book also contains a very informative section on foods that help to build the immune system. These healing foods provide a more natural, therapeutic resistance to colds, flu-like symptoms, and other illnesses. Keeping the immune system intact is what counts.

American Barefoot Doctor's Manual Accem Scott, 2004-04-01 In mid twentieth century China, during the time of the Cultural Revolution, there was a great need for medical treatment and a severe shortage of medical practitioners, especially in the countryside. To remedy this situation, workers and farmers were trained in the prevention and treatment of disease. These people were known as Barefoot Doctors. The American Barefoot Doctor's Manual was created in the spirit of these original barefoot doctors. Strategies for using Chinese Patent Medicines, LM Homeopathics, and Flower Essences are found throughout the manual. Also included in this work is an integrated form of movement therapy which opens and increases the energetics through all 14 meridians. For a limited time I will provide 1/2 hour session of Chinese Energetic Method with each purchase.

Deceits of the Mind and Their Effects on the Body Jane Gretzner Goldberg, 1991-01-01 Deceits of the Mind is a major effort at developing a comprehensive theory of disease, one incorporating knowledge of how the mind works, how the body works, and how the two interface. This interface, traditionally called psychosomatic medicine, newly labeled psychoneuro-immunology, has piqued the interest of a great many researchers and lay people alike in the last decade. Most recently, it has shown great promise in the psychological treatment of physical disorders. Although books on the mind/body dynamic usually end with the basic principle of mind affecting the body, this is the point at which Jane Goldberg's Deceits of the Mind begins. Goldberg begins by challenging the traditional medical model of the disease process. Since the advent of modern medicine, sickness has been seen as caused by factors from without--environmental stressors, germs, carcinogens, and so on. In contrast, Goldberg's research and observations indicate that diseases, both biological and psychological, are often rooted in processes that have their origins within the human organism itself. She shows that an organism's ability to defend itself is crucial to the maintenance of both physical and emotional well-being. She describes the variety of

psychological and biological methods of defense the human organism has available to it, and how these go awry in the formation of disease. Moving beyond the traditional psychosomatic postulate of mind affecting body, Goldberg goes a step farther, and proposes the adventuresome notion that mind and body imitate each other. A malfunction at any level of mind or body, she says, is reflected in all other levels. She shows how, in disease conditions, psychosis can exist in the body, not just the mind, and how the cancer process is embedded in the mind, not just the body.
