

Heilbroner La Formacion De La Sociedad Economica

José Rosales Obando

La formación de la sociedad económica Robert L. Heilbroner, 1964-01-01 El autor inicia un extenso recorrido histórico que abarca desde la Antigüedad hasta nuestros días. La riqueza de la descripción y el análisis que dedica tanto a cada etapa histórica como a la dinámica de la economía de mercado que le es propia, constituye el punto de partida para entender los conceptos y la evolución de dicha dinámica.

Renaissance in the Tropics Mario Calderón Rivera, GAVIOTAS, For the recovery of Earth's skin There is a new start towards the world. One age that Mario Calderón Rivera, outstanding thinker and humanist, called Renaissance in the sense of both the Italian Renaissance as a change of mind of man to himself, and the contemporary one as a change of mind from man towards nature. The Renaissance, led by this brilliant saying of Leonardo da Vinci: Everything comes from everything, and everything is made out of everything, and everything returns into everything especially in a round planet. This also comes to be true in Centro Las Gaviotas where they achieved, among other things, the reawakening of the Amazon rainforest in the Colombian savannas of Orinoco. There they join the community welfare with the wealth generated by the sustainable use of tropical biodiversity, which, being located in the equatorial zone, has one of the highest rates of biological productivity. Within this context, Mario Calderón, travels through the last 60 years showing the ideas of the human being when he began to reflect on the effects of his action on Earth. They consist of a new attitude towards nature, seeing himself as being part of one system, with it he can coexist without destroying, understanding their connections, i.e. its complexity. Gaviotas age is this way of thinking. The author in honor of Gaviotas and its founder, Paolo Lugari, sets the theoretical foundations of the progress mankind has made in this respect since the last half century. Gaviotas is an example, a path, but at the same time an outpost of a bioculture that makes its way to protect both human life as well as that from others, which ultimately are subjected to the recovery of the vegetable skin of Earth, by the increase in biomass, as this determines the dynamic stability of the composition of the atmosphere of 99%, of nitrogen and oxygen. If this composition would be disturbed by the continuing decline in biomass it would make impossible for human life to exist, something much more serious than global warming. Just warming is only a reductionist analysis of the issue. Development is seen now in productive harmony with nature, without undermining the very foundations of civilization. With an extensive knowledge of the authors who have

made the ecological thinking trends of our time, Calderón contextualizes Gaviotas in the present world highlighting its conceptual contributions and its innovative achievements, always pointing to a decent lifestyle without denying the modernity.

Economía política para todos Diego Rubinzal,2017-11-23 Esta obra de Diego Rubinzal contiene las tres condiciones fundamentales para abordar la economía política: existencia de una actitud crítica, abordaje de la realidad y tratamiento de la relación entre orden interno y contexto externo. Por lo tanto, en la tradición clásica, es un texto de "economía política". Observa la realidad y formula sus propuestas desde una perspectiva nacional, un abordaje que no se reduce al análisis de las variables económicas y, por último, el tratamiento de la economía argentina en el contexto de sus relaciones internacionales. Su amplitud y ambición da respuesta a cuestiones principales y deja abiertos interrogantes que le plantean al autor una rica agenda de investigaciones futuras. Entre ellas, su visión sobre la trayectoria de la economía argentina después de la crisis terminal del 2001, momento en el cual concluye el contenido de la obra.

Renacimiento en el Trópico Mario Calderón Rivera,2012 GAVIOTAS, Por la recuperación de la piel vegetal de la tierra. Se inicia una nueva forma de pensar en el mundo. Una era que Mario Calderón Rivera, sobresaliente pensador y humanista, denominado Renacimiento -en el sentido del renacimiento italiano- como un cambio de mentalidad del hombre hacia sí mismo y en el sentido del renacimiento contemporáneo como un cambio de mentalidad del hombre hacia la naturaleza que lo alberga. El Renacimiento, guiado por el pensamiento genial de Leonardo Da Vinci, Todo viene de todo, todo está hecho de todo y todo regresa a todo máxime en un planeta redondo, se viene a concretar también en el Centro Las Gaviotas en donde se logró, entre otras de sus realizaciones, el renacimiento de la selva amazónica en las sabanas de la Orinoquia colombiana. Allí se vincula el bienestar de la comunidad con la riqueza generada por el aprovechamiento sustentable de su biodiversidad tropical, que por estar ubicada en la zona ecuatorial, tiene uno de los mayores índices de productividad biológica. Dentro de este contexto, Mario Calderón nos pone a viajar por el pensamiento que a partir de los años cincuenta comienza a reflexionar acerca de la acción del hombre sobre la Tierra. Consiste en una nueva actitud con la naturaleza, haciendo parte de un mismo sistema en el que pueden convivir sin destruirse, entendiendo sus conexiones, es decir, su complejidad. El tiempo de Gaviotas es precisamente esta otra forma de pensar. El autor, en homenaje a Gaviotas y a su fundador Paolo Lugari, fundamenta teóricamente el avance que la humanidad ha realizado en este sentido a partir del siglo pasado. Gaviotas es un ejemplo, un camino, pero al mismo tiempo es un puesto de avanzada de una biocultura que se abre paso para defender tanto la vida humana como las otras, que finalmente están supeditadas a la recuperación de la piel vegetal de la Tierra mediante el incremento de la biomasa, pues de esta depende la estabilidad dinámica de la composición de su atmósfera que en un 99% está formada por nitrógeno y oxígeno, y que al ser alterada por la permanente disminución de su biomasa haría inviable la vida humana -algo mucho más grave que el recalentamiento global-. El simple recalentamiento termina siendo un análisis reduccionista, restringido. El desarrollo se concibe ahora en armonía productiva con la naturaleza sin socavar los cimientos

mismos de la civilización. Con un amplio conocimiento de los autores que han formulado las tendencias del pensamiento ecológico de nuestra época, contextualiza a Gaviotas en el mundo actual poniendo de relieve sus aportes conceptuales, así como sus innovadoras realizaciones, apuntando siempre a un estilo de vida sin negar la modernidad.
