An Informal History of the Hugos Jo Walton, 2018-08-07 Engaged, passionate, and consistently entertaining, *An Informal History of the Hugos* is a book about the renowned science fiction award for the many who enjoyed Jo Walton's previous collection of writing from Tor.com, the Locus Award-winning *What Makes This Book So Great*. The Hugo Awards, named after pioneer science-fiction publisher Hugo Gernsback, and voted on by members of the World Science Fiction Society, have been presented since 1953. They are widely considered the most prestigious awards in science fiction. Between 2010 and 2013, Jo Walton wrote a series of posts for Tor.com, surveying the Hugo finalists and winners from the award's inception up to the year 2000. Her contention was that each year's full set of finalists generally tells a meaningful story about the state of science fiction at that time. Walton's cheerfully opinionated and vastly well-informed posts provoked valuable conversation among the field's historians. Now these posts, lightly revised, have been gathered into this book, along with a small selection of the comments posted by SF luminaries such as Rich Horton, Gardner Dozois, and David G. Hartwell. A remarkable guided tour through the field—a kind of nonfiction companion to *Among Others*. It's very good. It's great. —New York Times—bestselling author Cory Doctorow, *Boing Boing on What Makes This Book So Great*

The Country You Have Never Seen Joanna Russ, 2007-07-01 In 1959, at the age of 22, Joanna Russ published her first science fiction story, "Nor Custom Stale," in *The Magazine of Science Fiction and Fantasy*. In the forty-five years since, Russ has continued to write some of the most popular, creative, and important novels and stories in science fiction. She was a central figure, along with contemporaries Ursula K. Le Guin and James Tiptree, in revolutionizing science fiction in the 1960s and 1970s, and her 1970 novel *The Female Man* is widely regarded as one of the most successful and influential depictions of a feminist utopia in the entire genre. *The Country You Have Never Seen* gathers Joanna Russ's most important essays and reviews, revealing the vital part she played over the years in the never-ending conversation among writers and fans about the roles, boundaries, and potential of science fiction. Spanning her entire career, the collection shines a light on Russ's role in

the development of new wave science fiction and feminist science fiction, while at the same time providing fascinating insight into her own development as a writer.

**The Martians** Nick Redfern, 2020-10-01 “This provocative and exciting book . . . makes a startling case for there being life on Mars.” —Whitley Strieber, #1 New York Times–bestselling author of *Communion* *The Martians* is an in-depth study of the theory that Mars was once a world that teemed with life. Perhaps, even, life not too dissimilar to ours. Incredibly, the Martians may still be there. Alive. The questions that this book asks and answers include the following: • What kind of society did the Martians have? • What caused their world to become harsh and desert-like? • Did global warming or nuclear war ensure the extinction of the Martians? • Are Martian artifacts strewn about the surface, just waiting to be found by the likes of NASA? • Has NASA already found such evidence, but chosen to withhold such monumental finds from the public and the media? • Could some form of the Martians still exist, deeply below the surface of the planet, in secure installations that allow them to ensure their civilization continues? • What do we know about the Martian environment, its atmosphere, and its landscape? *The Martians* explores the CIA’s top-secret search for the Martians, multiple photos of strange anomalies, and the latest revelations about the environment and water on Mars. And most tantalizing of all: Did an ailing Martian race come to Earth in past eons and were they confused with gods? The questions concerning life on Mars—then and now—are many. The answers are astounding.

**The Cambridge Companion to Science Fiction** Edward James, Farah Mendlesohn, 2003-11-20 Table of contents

*Globalization and the Posthuman* William S. Haney II, 2009-03-26 *Globalization and the Posthuman* argues that by globalizing posthumanism through biotechnology, particularly through the invasive interface of humans and machines, we may well interfere with and even undermine the innate quality of human psycho-physiology and the experience of the internal observer, the non-socially constructed self or pure consciousness. Furthermore, many features of globalization in-and-of itself—such as the fall of public man, the exterritorialization of capital, the loss of an impersonal public world to localized communities based on emotively shared interests—combined with the posthuman expansion of biotechnology will diminish our natural capacity to experience the self as knower and lead to an increase in global crime, sickness, accident rates and overall lack of harmony. The experience of the self comprises the unsayable secret of modern and postmodern literature and art, a secret that may soon become inaccessible if the world continues down the road of globalized infomania. The analysis of the consequences of globalization and the posthuman in this book is unique in that it will be the first to examine the interrelation between globalization, posthumanism and pure consciousness. Posthumanists define consciousness in a way that promotes the globalization of biotechnology without regard for its potential risks. This book explores the implications of the globalization of the posthuman model of consciousness. On the one hand, cognitive scientists tend to equate consciousness with subjectivity, which they associate with the thinking mind as an extension of the body, nature and culture;

Eastern philosophy, on the other hand, distinguishes mind from consciousness, with mind defined as the content of consciousness. Bionic technology will have the effect of raising human metabolism and preventing the mind from settling down to the state of least excitation of consciousness. This book suggests that while conscious content is an indispensable aspect of both the human and posthuman condition, the thoughts, memories, feelings and perceptions of this content do not encompass a vital aspect of human nature attested to not only by the first-person experience of many millions of people around the world, but also by the records of both classical and modern contemplative traditions.

**The Vampire in Science Fiction Film and Literature** Paul Meehan, 2014-07-09 Vampires have been a popular subject for writers since their inception in 19th century Gothic literature and, later, became popular with filmmakers. Now the classical vampire is extinct, and in its place are new vampires who embrace the hi-tech worlds of science fiction. This book is the first to examine the history of vampires in science fiction. The first part considers the role of science and pseudo-science, from late Victorian to modern times, in the creation of the vampire, as well as the sensation fiction of J. Sheridan Le Fanu, Bram Stoker, Arthur Conan Doyle and H.G. Wells. The second part focuses on the history of the science fiction vampire in the cinema, from the silent era to the present. More than sixty films are discussed, including films from such acclaimed directors

as Roger Corman, David Cronenberg, Guillermo del Toro and Steven Spielberg, among others.

Apocalyptic AI: Visions of Heaven in Robotics, Artificial Intelligence, and Virtual Reality Robert M. Geraci, 2010-02-05 Apocalyptic AI, the hope that we might one day upload our minds into machines or cyberspace and live forever, is a surprisingly wide-spread and influential idea, affecting everything from the world view of online gamers to government research funding and philosophical thought. In *Apocalyptic AI*, Robert Geraci offers the first serious account of this cyber-theology and the people who promote it. Drawing on interviews with roboticists and AI researchers and with devotees of the online game *Second Life*, among others, Geraci illuminates the ideas of such advocates of Apocalyptic AI as Hans Moravec and Ray Kurzweil. He reveals that the rhetoric of Apocalyptic AI is strikingly similar to that of the apocalyptic traditions of Judaism and Christianity. In both systems, the believer is trapped in a dualistic universe and expects a resolution in which he or she will be translated to a transcendent new world and live forever in a glorified new body. Equally important, Geraci shows how this worldview shapes our culture. Apocalyptic AI has become a powerful force in modern culture. In this superb volume, he shines a light on this belief system, revealing what it is and how it is changing society.

**Navigating Stylistic Boundaries in the Music History Classroom** Esther M. Morgan-Ellis, 2024-04-30 At a time of transformation in the music history classroom and amid increasing calls to teach a global music history, *Navigating Stylistic Boundaries in the Music History Classroom* adds nuance to the teaching of varied musical traditions by examining the places where they intersect and the issues of musical exchange and appropriation that these intersections raise. Troubling traditional boundaries of genre and style, this collection of essays helps instructors to denaturalize the framework of Western art music and invite students to engage with other traditions—vernacular, popular, and non-Western—on their own terms. The book draws together contributions by a wide range of active scholars and educators to investigate the teaching of music history around cases of stylistic borders, exploring the places where different practices of music and values intersect. Each chapter in this collection considers a specific case in which an artist or community engages in what might be termed musical crossover, exchange, or appropriation and delves deeper into these concepts to explore questions of how musical meaning changes in moving across worlds of practice. Addressing works that are already widely taught but presenting new ways to understand and interpret them, this volume enables instructors to enrich the perspectives on music history that they present and to take on the challenge of teaching a more global music history without flattening the differences between traditions.

Creatures of Light and Darkness Roger Zelazny, 2010-04-13 Two gods, two houses, one quest, and the eternal war between life and death To save his kingdom, Anubis, Lord of the Dead, sends forth his servant on a mission of vengeance. At the same time, from The House of Life, Osiris sends forth his son, Horus, on the same mission to destroy utterly and forever The Prince Who Was a Thousand. But neither of these superhuman warriors is prepared for the strange and harrowing world of mortal life, and The Thing That Cries in the Night may well destroy not only their worlds, but all mankind. As Zelazny did with the Hindu pantheon in the legendary, groundbreaking classic Lord of Light, the master storyteller here breathes new life into the Egyptian gods with another dazzling tale of mythology and imagination.
