## Lowell Joseph Ragatz

*Atlas of Medieval Europe* David Ditchburn, Angus Mackay, 2002-09-11 Covering the period from the fall of the Roman Empire through to the beginnings of the Renaissance, this is an indispensable volume which brings the complex and colourful history of the Middle Ages to life. Key features: \* geographical coverage extends to the broadest definition of Europe from the Atlantic coast to the Russian steppes \* each map approaches a separate issue or series of events in Medieval history, whilst a commentary locates it in its broader context \* as a body, the maps provide a vivid representation of the development of nations, peoples and social structures. With over 140 maps, expert commentaries and an extensive bibliography, this is the essential reference for those who are striving to understand the fundamental issues of this period.

*Europe 1300-1700: History in Maps* ,

*A Syllabus for the Study of Medieval Times* Lowell Joseph Ragatz, 1928

*Europe in the Fourteenth and Fifteenth Centuries* Denys Hay, 2016-04-15 The second edition of this highly successful textbook analyses the structure of later medieval society in Europe, identifies its main groups and their political programmes, and examines their impact on the political, economic and social history of the major European states. There are many additions and expansions in this new edition, and the important chapter on the Central Monarchies (of Poland, Hungary, Bohemia, Rumania and Lithuania) has been newly contributed by Professor J M Bak of the University of British Columbia.

Civilization in Europe Jacob Salwyn Schapiro, Richard Brandon Morris, 1928

*Oxford Handbook of Medieval Central Europe* Nada Zečević, Daniel Ziemann, 2022 A unique, comparative presentation of a region that is often considered forgotten, this handbook provides a variety of expertly informed perspectives on life and society in medieval Central Europe and its dynamic interactions across the continent.

Europe in the Central Middle Ages Christopher Brooke, 2016-04-15 This wide-ranging introduction to medieval Europe has been updated and revised. In his popular survey Brooke explores the variety of human experience in the period. He looks at society, economy, religious life and popular religion, learning, culture, as well as political events; the rise of the Normans and the heyday of the medieval Empire. For the new edition there is increased coverage of the role of women and more attention to central Europe, Bohemia, Hungary and Poland.

*Lords and Towns in Medieval Europe* Howard B. Clarke, Annagret Simms, 2017-07-14 This volume is the first publication to

draw upon the mass of information provided by the Historic Towns Atlases in order to explore comparative questions in medieval urban history. The volume addresses the wider question of comparative urban studies, the processes that determined the morphological formation of towns, and the symbolic meaning of large-scale town plans in their cultural context.

Physical and Cultural Space in Pre-industrial Europe Marko Lamberg, Marko Hakanen, Janne Haikari, 2011-01-01 Prior to the Industrial Era, the geography of Europe posed problems, but also offered possibilities for its people. Distances created obstacles to communication and state formation, but at the same time, inhabitants and officials in peripheral areas gained room to pursue more independent action and allowing unique customs to flourish. In *Physical and Cultural Space in Pre-industrial Europe* the authors seek to answer how early modern Europeans -- rulers, officials, aristocrats, scholars, priests, and commoners -- perceived, utilised and organised the space around them. The geographic focus is on northern Europe, where distances played a more important role in society than in the densely populated areas of Southern Europe. Written by nineteen scholars of history, archaeology and ethnology, this book takes a multidisciplinary approach to European spaces of the past and the human agents within them.

*Old Silver of Europe & America from Early Times to the Nineteenth Century* Edward Alfred Jones, 1928

Early Mapping of Southeast Asia Thomas Suarez, 2012-08-07 With dozens of rare color maps and other documents, *Early Mapping of Southeast Asia* follows the story of map-making, exploration and colonization in Asia from the 16th to the 19th centuries. It documents the idea of Southeast Asia as a geographical and cosmological construct, from the earliest of times up until the dawn of the modern era. Using maps, itineraries, sailing instructions, traveler's tales, religious texts and other contemporary sources, it examines the representation of Southeast Asia, both from the historical perspective of Western exploration and cartography, and also through the eyes of Asian neighbors. Southeast Asia has always occupied a special place in the imaginations of East and West. This book recounts the fascinating story of how Southeast Asia was, quite literally, put on the map, both in cartographic terms and as a literary and imaginative concept.

**The World Through Maps** John R. Short, 2003 An illustrated history of maps and mapmaking, including reproductions of 200 antique maps.

**Redrawing the Map of Europe** M. Emerson, 1998-09-07 Michael Emerson draws on a rare experience of Europe's new political and economic structures - from Brussels to Moscow - to explain Europe's contradictory tendencies towards both integration and conflict. He confronts the two strategic issues for the Europe of the early 21st century: how to ensure success for the Euro and how to stabilise the wider Europe with a strong structure for EU-Russian relations. He draws distinctions between the different Europes - geographic Europe, the European Union, 'Security Europe' (based around NATO) and the emerging 'Civil Europe'. The author argues that 'Civil Europe' could be the basis of a new European golden age, and outlines

the far-reaching institutional and cultural changes required to achieve this.

**Churches and Churchmen in Medieval Europe** C. N. L. Brooke, 1999-01-01 Considers many facets of the medieval church, dealing with institutions, buildings, personalities and literature. The text explores the origins of the diocese and the parish, the history of the See of Hereford and of York Minster. It discusses the arrival of the archdeacon, the Normans as cathedral builders and the kings of England and Scotland as monastic patrons. The studies of monastic life deal with the European question of monastic vocation and with St Bernard's part in the sensational expansion of the early 12th century. An epilogue takes us to the 14th century, contrasting Chaucer's parson with an actual Norfolk rector.

**Historical Archaeologies of Transhumance across Europe** Eugene Costello, Eva Svensson, 2018-03-05 Transhumance is a form of pastoralism that has been practised around the world since animals were first domesticated. Such seasonal movements have formed an important aspect of many European farming systems for several thousand years, although they have declined markedly since the nineteenth century. Ethnographers and geographers have long been involved in recording transhumant practices, and in the last two decades archaeologists have started to add a new material dimension to the subject. This volume brings together recent advances in the study of European transhumance during historical times, from Sweden to Spain, Romania to Ireland, and beyond that even Newfoundland. While the focus is on the archaeology of seasonal sites used by shepherds and cowherds, the contributions exhibit a high degree of interdisciplinarity. Documentary, cartographic, ethnographic and palaeoecological evidence all play a part in the examination of seasonal movement and settlement in medieval and post-medieval landscapes. Notwithstanding the obvious diversity across Europe in terms of livestock, distances travelled and socio-economic context, an extended introduction to the volume shows that cross-cutting themes are now emerging, including mobility, gendered herding, collective land-use, the agency of non-elite people and competition for grazing and markets. The book will appeal not only to archaeologists, but to historians, geographers, ethnographers, palaeoecologists and anyone interested in rural lifeways across Europe.

*The Castle in Medieval Europe* Danielle Watson, 2016-07-15 Castles are perhaps the greatest symbol of the Middle Ages. But what was life like inside these mighty fortresses? This book examines the rise of castles as the center of noble life and provides information on the men, women, and children who lived within the castle walls.
