**Saline Lakes** John M. Melack, Robert Jellison, David B. Herbst, 2002-04-30 Publications from 7th International Conference on Salt Lakes, held in Death Valley National Park, California, USA, September 1999

Water in Australia Rachel Dixon, 2018-03-01 Australia is the second driest continent on Earth, after the Antarctic. The availability of water has defined the spread of human settlement, from the arrival of the first Aboriginal Australians over 50,000 years ago, right up until the present. Water is precious in Australia and it is not a free resource. Discover the role in human history of the hidden, underground water sources across Australia and see how the presence or lack of water has affected our geography, economy and history.

**Saline Lakes** F.A. Comin, T.G. Northcote, 2012-12-06 Proceedings of the IV International Symposium on Athalassic (Inland) Saline Lakes

Year Book Australia,

Insect conservation and Australia's Inland Waters Tim R. New, 2020-11-28 The first broad overview of conservation needs of Australia's largely endemic freshwater insects, drawing on examples and information from many parts of the world to illustrate and develop needs and practical prospects for conservation in inland water environments. The wide variety of those environments in Australia and their diverse insect inhabitants - many of them highly localised and ecologically specialised and vulnerable - and threats to them is illustrated. Case histories demonstrate the different aspects of practical conservation management that may be possible in different contexts, and numerous references facilitate understanding by non-specialist readers and non-entomologist conservation managers and practitioners.

Saline Lakes V Stuart H. Hurlbert, 2012-12-06 The Vth International Symposium on Inland Saline Lakes was held at Hotel Titikaka on the shores of that lake, 22--29 March 1991 with participants from 16 countries. Twenty-three papers presented by the participants, plus an additional one reporting a microcosm study on salinity effects, constitute the present volume. The papers cover the wide array of subject matters and scales characteristic of our 'interdiscipline' and represent the symposium well. All manuscripts submitted for these proceedings were critically reviewed by at least three referees and are representative of saline lake research, developed around the world in the three-year period since the last symposium.

Wetlands of the World I: Inventory, Ecology and Management Dennis F. Whigham,D. Dykyjová,S. Hejný,2013-03-09 The impetus for this volume was the 2nd International Wetlands Conference which was held in June, 1984 at Trebon, Czechoslovakia. An overview of the worlds wetlands was one of the themes of the conference and it was decided that a useful follow-up would be a publication on the same topic. The initial goal was to cover as many of the worlds wetlands as possible in one volume and to have an emphasis on wetland ecology, biota, classification, and management. Individuals who made presentations at the Trebon conference were asked to prepare chapters and the editors also solicited other contributions. For a variety of reasons, the initial goal has been difficult to reach, especially coverage of the entire globe, and it has been necessary to publish the contributions in more than one volume. Volume 1 represents the completion of the first phase of the project and it covers most of the Western Hemisphere, Australia, most of Africa, the Indian subcontinent, the Mediterranean region, and Papua New Guinea. Volume 2 will contain chapters on Western Europe, Northern Europe, Central Europe, most of northern and It is our hope that Volume western Asia, the Middle East, and Indonesia. 2 will appear in the near future and, if possible, a third volume will be published if authors can be secured to cover areas such as the Far East, other parts of the Indo-Pacific region, and New Zealand.
