Several People Are Typing: A GMA Book Club Pick Calvin Kasulke, 2022-09-27 A Good Morning America Book Club Pick!

• A work-from-home comedy where WFH meets WTF. • An absurd, hilarious romp through the haunted house of late-stage capitalism. —Carmen Maria Machado, author of *In the Dream House* Told entirely through clever and captivating Slack messages, this irresistible, relatable satire of both virtual work and contemporary life is *The Office* for a new world. Gerald, a mid-level employee of a New York-based public relations firm has been uploaded into the company's internal Slack channels—at least his consciousness has. His colleagues assume it's an elaborate gag to exploit the new work-from home policy, but now that Gerald's productivity is through the roof, his bosses are only too happy to let him work from ... wherever he says he is. Faced with the looming abyss of a disembodied life online, Gerald enlists his co-worker Pradeep to help him escape, and to find out what happened to his body. But the longer Gerald stays in the void, the more alluring and absurd his reality becomes. Meanwhile, Gerald's colleagues have PR catastrophes of their own to handle in the real world. Their biggest client, a high-end dog food company, is in the midst of recalling a bad batch of food that's allegedly poisoning Pomeranians nationwide. And their CEO suspects someone is sabotaging his office furniture. And if Gerald gets to work from home all the time, why can't everyone? Is true love possible between two people, when one is just a line of text in an app? And what in the hell does the :dusty-stick: emoji mean? In a time when office paranoia and politics have followed us home, Calvin Kasulke is here to capture the surprising, absurd, and fully-relatable factors attacking our collective sanity ... and give us hope that we can still find a human connection.

Hanging Out Sheila Liming, 2023-01-24 Hide your phone, stop hustling for a second, and read this passionate argument for the importance of unstructured pre-digital hang. —People Loneliness is an epidemic; it feels harder than ever to connect with others meaningfully. What can we do to remedy this? Sheila Liming has the answer: we need to hang out more. With the introduction of AI and constant Zoom meetings, our lives have become more fractured, digital and chaotic. *Hanging Out: The Radical Power of Killing Time* shows us what we have lost to the frenetic pace of digital life and how to get it back. Combining personal narrative with pungent analyses of books, movies, and TV shows, Sheila Liming shows us how the new social landscape deadens our connections with others — connections that are vital to both self-care and to a vibrant community. Whether drinking with strangers in a distant city or jamming with musician friends in an abandoned Pittsburgh row house, Liming demonstrates that unstructured social time is the key to a freer, happier sense of self. *Hanging Out* shows how simple acts of casual connection are the glue that binds us together, and how community is the antidote to the disconnection and isolation that dominates contemporary life. The book conceives of hanging out as a way to reclaim time as something other than a raw ingredient to be converted into productivity. —New York Times “Rich with illuminating stories.” —Slate We could all use more of that blissfully unstructured social time, posits Sheila Liming in the well-considered series of arguments found in *Hanging Out*. —Reader's Digest Opens with a simple and expansive account of what hanging out is ... Liming dedicates much of the book to stories from her past. She has lived an interesting life, and she tells these stories well.” —Washington Post Sharp and vivid writing ... a layered exploration of social dynamics that contains some textured literary criticism.” —Bookforum More books about hanging out, less about productivity please. Sheila Liming sees the gap in our thinking about time, and the true worth in spending it in an unstructured fashion with members of our community.” —LitHub

The Digital Future of English Simone Murray, 2025-07-18 More than any other academic discipline, literary studies is the creation of print culture. How then can it thrive in the digital era? Early 1990s predictions of the book's imminent demise presented a simplistic either/or choice between the legacy of moribund print and triumphalist digital technology. Yet we have grown to experience the two media as complexly interdependent and even complementary. Clearly, digital does not kill print. But literary studies in the digital era cannot simply resume business as usual. It is urgently necessary to reconsider the discipline's founding assumptions in light of digital technology. The digital era prompts a rethinking of literary studies' object

of study, as well as its methods, theories, audiences and pedagogical practices. What counts as literature necessarily shifts in an age of proliferating born-digital texts and do-it-yourself (DIY) online publication. Where should literary studies sit institutionally, and how might it graft contextually-oriented social sciences methods onto its traditionally humanistic mode of textual analysis? Why should literary study continue to marginalize emotional responses to texts when online communities bond via readerly affect? Who is the audience for literary criticism in an age where expertise is routinely challenged yet communication with global book-loving publics has never been technologically easier? Finally, how can we utilize digital tools to rejuvenate literary studies pedagogy and help English staff better connect with millennial-age students? Literary studies has been convulsed for decades by debates over electronic literature and, more recently, digitally-aided 'distant reading'. But these discussions still mostly confine themselves to demarcating our proper object of study. We need to think more expansively about digital technology's impact on the underpinning tenets of the discipline. Literary Media Studies is pitched at fellow literary scholars, book historians, media theorists, cultural sociologists, digital humanists and those working at the interface of these converging disciplines. It models constructive engagement with contemporary digital culture. Most importantly, it brings a burst of sorely needed optimism to the question of literary studies' digital future.

Computers, Phones, and the Internet Robert Kraut, Malcolm Brynin, Sara Kiesler, 2006-07-06 During the past decade, technology has become more pervasive, encroaching more and more on our lives. Computers, cell phones, and the internet have an enormous influence not only on how we function at work, but also on how we communicate and interact outside the office. Researchers have been documenting the effect that these types of technology have on individuals, families, and other social groups. Their work addresses questions that relate to how people use computers, cell phones, and the internet, how they integrate their use of new technology into daily routines, and how family function, social relationships, education, and socialization are changing as a result. This research is being conducted in a number of countries, by scientists from a variety of disciplines, who publish in very different places. The result is that it is difficult for researchers and students to get a current and coherent view of the research literature. This book brings together the leading researchers currently investigating the impact of information and communication technology outside of the workplace. Its goal is to develop a consolidated view of what we collectively know in this fast-changing area, to evaluate approaches to data collection and analysis, and to identify future directions for research. The book will appeal to professionals and students in social psychology, human-technology interaction, sociology, and communication.

Don't Use Your Words! Jane Juffer, 2019-05-28 How children are taught to control their feelings and how they resist this emotional management through cultural production. Today, even young kids talk to each other across social media by referencing memes, songs, and movements, constructing a common vernacular that resists parental, educational, and media imperatives to name their feelings and thus control their bodies. Over the past two decades, children's television

programming has provided a therapeutic site for the processing of emotions such as anger, but in doing so has enforced normative structures of feeling that, Jane Juffer argues, weaken the intensity and range of children's affective experiences. *Don't Use Your Words!* seeks to challenge those norms, highlighting the ways that kids express their feelings through cultural productions including drawings, fan art, memes, YouTube videos, dance moves, and conversations while gaming online. Focusing on kids between ages five and nine, *Don't Use Your Words!* situates these productions in specific contexts, including immigration policy referenced in drawings by Central American children just released from detention centers and electoral politics as contested in kids' artwork expressing their anger at Trump's victory. Taking issue with the mainstream tendency to speak on behalf of children, Juffer argues that kids have the agency to answer for themselves: what does it feel like to be a kid?

Cultural Anthropology & Human Experience Katherine A. Dettwyler, 2011-03-31 Katherine A. Dettwyler, author of the Margaret Mead Awardwinning *Dancing Skeletons*, has written a compelling and original introductory text. *Cultural Anthropology & Human Experience* is suitable for use in Cultural and Social Anthropology courses, and its twelve chapters easily fit into quarter or semester terms, while leaving room for additional readings, discussions, or other projects. All the standard topics are covered, but with less emphasis on method and theory and more coverage of a variety of industrial and postindustrial societies. Auxiliary materials bells and whistles have been kept to a minimum to reduce distractions and maintain a reasonable price to students. The author has chosen all the photographs with great care to illustrate or amplify important points. The Instructors Manual includes summaries of each chapter, student exercises, and a test bank. Dettwyler's upbeat tone inspires students to: develop the ability to think logically, objectively, and critically about different cultural beliefs, practices, and social structures; understand that humans are primates with culture, with a complex overlay of environmental and cultural influences; appreciate how powerful cultural beliefs and practices can be in shaping human

perceptions of the world; realize that culture is not the same thing as social constructions of race, ethnic identity, or place of geographic origin; understand why/how cultural practices make sense within the cultures that practice them; articulate how an anthropological perspective helps discern everyday situations and interactions at the local, national, and international levels; understand that anthropology is not just an academic discipline it is a way of looking at and understanding the world; appreciate the ways cultural beliefs and practices, social structures, and human lifestyles contribute to a meaningful life.

The No-Girlfriend Rule Christen Randall, 2025-03-04 An instant USA TODAY bestseller Four starred reviews! Julie Murphy meets Heartstopper with a D&D twist in this “magical, heartwarming” (Rachael Lippincott, #1 New York Times bestselling author of *She Gets the Girl*) queer romance about a teen girl whose foray into fantasy tabletop roleplaying brings her new confidence, true friends, and a shot at real, swoon-worthy love. Hollis Beckwith isn't trying to get a girl—she's just trying to get by. For a fat, broke girl with anxiety, the start of senior year brings enough to worry about. And besides, she already has a boyfriend: Chris. Their relationship isn't particularly exciting, but it's comfortable and familiar, and Hollis wants it to survive beyond senior year. To prove she's a girlfriend worth keeping, Hollis decides to learn Chris's favorite tabletop roleplaying game, *Secrets & Sorcery*—but his unfortunate “No Girlfriends at the Table” rule means she'll need to find her own group if she wants in. Enter: Gloria Castañeda and her all-girls game of S&S! Crowded at the table in Gloria's cozy Ohio apartment, the six girls battle twisted magic in-game and become fast friends outside it. With her character as armor, Hollis starts to believe that maybe she can be more than just fat, anxious, and a little lost. But then an in-game crush develops between Hollis's character and the bard played by charismatic Aini Amin-Shaw, whose wide, cocky grin makes Hollis's stomach flutter. As their gentle flirting sparks into something deeper, Hollis is no longer sure what she wants...or if she's content to just play pretend.

Controversial Therapies for Developmental Disabilities John W. Jacobson, Richard M. Foxx, James A. Mulick, 2005-01-15
One of the largest and most complex human services systems in Western nations has evolved to address the needs of people with developmental disabilities. In the U.S., for example, school budgets are stretched thin by legally mandated special education, and billions of Medicaid dollars annually are consumed by residential and professional services to this population. The temptation of a quick fix is strong. Many parents desperately seek the latest ideas and place pressure on program administrators, who often are not trained to think critically about the evidence base for intervention efforts. The problems of people with developmental disabilities have historically been targeted by a wide range of professionals who rely on clinical experience and intuition and do not submit their claims to the tests of scientific research. Professional entrepreneurs have energetically promoted their treatments to a public perhaps too trustful of those with credentials. Thus, families and their children are buffeted by reforms founded on belief and ideologically driven management. Services fluctuate with the currents of social movements and rapidly shifting philosophies of care as policymakers and providers strive for increased responsiveness and individualization. These forces affect not only where and how, but how well people are served. Too often, services are less effective than they could be, or worse, damaging to personal growth and quality of life. Many treatments are based on poorly understood or even disproven approaches. What approaches to early intervention, education, therapy, and remediation really help those with mental retardation and developmental disabilities improve their functioning and adaptation? And what approaches represent wastes of time, effort, and resources? This book brings together leading behavioral scientists and practitioners to focus light on the major controversies surrounding these questions. The authors review the origins, perpetuation, and resistance to scrutiny of questionable practices, and offer a clear rationale for appraising the quality of services. In an era of increasing accountability, no one with a professional stake in services to individuals with mental retardation and developmental disabilities can afford not to read this book.
