The Sun Is Also a Star Nicola Yoon, 2024-04-02 The #1 New York Times bestseller and National Book Award finalist from the bestselling author of *Everything, Everything* will have you falling in love with Natasha and Daniel as they fall in love with each other! Natasha: I'm a girl who believes in science and facts. Not fate. Not destiny. Or dreams that will never come true. I'm definitely not the kind of girl who meets a cute boy on a crowded New York City street and falls in love with him. Not when my family is twelve hours away from being deported to Jamaica. Falling in love with him won't be my story. Daniel: I've always been the good son, the good student, living up to my parents' high expectations. Never the poet. Or the dreamer. But when I see her, I forget about all that. Something about Natasha makes me think that fate has something much more extraordinary in store—for both of us. The Universe: Every moment in our lives has brought us to this single moment. A million futures lie before us. Which one will come true? *** Beautifully crafted. --People A book that is very much about the many factors that affect falling in love, as much as it is about the very act itself. . . . Fans of Yoon's first novel, *Everything, Everything*, will find much to love—if not, more—in what is easily an even stronger follow up. —Entertainment Weekly Transcends the limits of YA as a human story about falling in love and seeking out our futures. —POPSUGAR.com

Vaastu: The Art And Science Of Living Ashwini Kumar, 2005-11-01 Vaastu Shaastra is the art and science of living a happy and contented long life. In the modern-day world of high-speed technology, many diseases are arising out of faulty lifestyles. Classical principles of Vaastu Shaastra describe the ancient way of living which need modifications in the present-day context. This book is an intelligent amalgamation of the ancient practice of Vaastu living and modern technologies of house building and architecture. It offers an introduction to Vaastu Shaastra, systematising and standardising its techniques and methodologies. The book has been divided into three sections. The first section has been devoted to the understanding of the key concepts, principles and forces of Vaastu that exert an influence on any given space. The second section of the book reveals how to create heaven on earth; right in your home. It shows how we can achieve internal peace by first achieving

external peace in the house. The third section is related to the day-to-day use of Vaastu. One chapter has been devoted to Vaastu of workplace which, in many aspects, is different from residential Vaastu. This book has been written according to the established principles of Vedic Astrology; an inevitable part of Vaastu Shaastra. The effect of the nine planets is considered in Astrology while mainly the effect of planet earth is taken in Vaastu. Astrology depends on dashas (Planetary Periods) while Vaastu depends on dishas (Directions), Jyotish assumes the existence of Kaal Purush (Time Personified) while Vaastu assumes the existence of Vaastu Purush (Space Personified). The book incorporates current knowledge of building science to explain the ancient wisdom of Vaastu Shaastra only to bridge the gap between ancient traditions and modern way of thinking. No attempt has been made to transgress into the other parallel systems known as Feng Shui and Pyramidology, which require totally separate study. The work is meant primarily for those who want to learn Vaastu from the very beginning and pursue it seriously in a scientific manner. The book will also serve as a stepping-stone for those who intend to indulge in hitherto unexplored areas of Vaastu Shaastra like suitability of certain directions for certain activities, hidden meanings of Vaastu Purush; forty-five demi gods; ten dikpalas; three energies and Panchmahabhootas, predicting the fate of a house and its inhabitants through Vaastu kala, etc.

Soul, God and Buddha in Language of Science Mathura Prasad, 2017-04-18 The Buddha answers all questions that a scientist like Stephen Hawking has in his mind. • Two beginning-less, self-existent entities are- the Universe and the Buddha Field. At high energy level both covert in to each other. The Buddha Field gives birth to physical and psychic particles (souls). At high energy level, a soul converts in to the Buddha Field. • Mass is of two kinds. Positive mass is due to souls. A soul is cause of dark matter. • Gravitational force is repulsive in nature between two souls, attractive between matters. • Outer region of the Universe is dark because here beings are without material bodies. Here TIME does exist BUT without SPACE. Psychic matter is the cause of Expanding Universe. • God's atom does exist. All heavenly bodies including black holes are abodes of beings. • Stars are born due to gravitational instability in the Orion Nebula caused by God. Number of God is uncountable in the Universe. • Very soon, the world will see all religions (barring Buddhism), Marxism and all other Wrong Views, dying of natural death. • I have dedicated this book to Stephen Hawking, one of the brilliant theoretical physicists since Einstein.
