Javier Callejo Gallego, Consuelo Del Val Cid, Jesús Gutiérrez Brito, Antonio Viedma Rojas

Métodos y técnicas de investigación social Ezequiel Ander-Egg, 2004 De los seis volúmenes de Métodos y técnicas de investigación social, éste es el que tiene un desarrollo más teórico sobre los problemas de la ciencia, el método y la investigación social. Se trata, pues, de reflexiones de tipo epistemológico, cuyo objeto específico es el estudio de los problemas filosóficos que subyacen en la ciencia, referentes a la naturaleza, la estructura y la construcción de las teorías; problemas relacionados con el método, los paradigmas subyacentes en el pensar científico, etc. Como enseñó en su momento Gino Germani, el impulsor de la sociología científica en Argentina, los problemas epistemológicos no son cuestiones sustanciales para quienes se inician en el estudio de las ciencias sociales o en las diferentes formas de intervención social (trabajo social, animación cultural, educación, etc.). De ahí el problema que enfrentó Ander-Egg para la redacción de este volumen. Hizo tres versiones diferentes: una con un desarrollo más académico y erudito, para explicar los problemas que conciernen al método y las cuestiones conexas; otra, de carácter elemental para ser utilizada como forma de divulgación, y la tercera, que es la que se publica, podríamos denominarla una versión intermedia entre lo académico y lo divulgativo, la que puede ser más útil a los destinatarios de este libro. El gusto por la ciencia y los problemas concernientes al método no se despierta con una dieta de epistemología, pero tampoco se logra un cierto nivel en el campo de la investigación social con una total ignorancia de los aspectos que subyacen en el mismo método y los procedimientos utilizados, especialmente en la forma de abordar la realidad. Diremos, por último, que la lectura de este volumen sólo adquiere pleno sentido teniendo en cuenta los cinco restantes. Su pretensión, modesta por supuesto, es ofrecer al estudiante una primera aproximación al trasfondo oculto en la formulación y la aplicación de los métodos de investigación social.

Guía para realizar investigaciones sociales Raúl Rojas Soriano, 1991 La presente Guía para realizar investigaciones sociales es el resultado de las experiencias adquiridas en el campo de la investigación social aplicada y la docencia. En ella se exponen los diferentes procesos de la investigación documental con las de carácter social y estadística, de tal manera que se comprenda su aplicación, así como sus alcances y limitaciones. Además, se examinan los problemas metodológicos más comunes que surgen en el proceso de investigación y se proporcionan pautas generales para efectuar los estudios con rigor científico. Esta Guía responde, sin duda, a las inquietudes de estudiantes y profesionales de distintas carreras interesados en

efectuar sus trabajos de investigación de acuerdo con la metodología científica. En su elaboración, se puso especial cuidado en presentar los diferentes temas de una manera clara y sencilla, sin que por ello esta Guía pierda su nivel de profundidad.

Trabajo social e investigación Miguel Juárez,1993-01-01 Esta obra traza las pautas a seguir para llevar a cabo una investigación en el campo del trabajo social. El objetivo es por tanto dotar a los trabajadores sociales de unas habilidades para acercarse de un forma científica a la realidad social. Contiene los siguientes capítulos: 1) el trabajo social ¿una nueva lectura? 2) la investigación y el trabajo social 3) necesidades y temas de investigación en trabajo social 4) diseño de investigación social 5) metodología y técnicas de investigación social 6) información y trabajo social 7) información para la investigación.

Abordaje hermenéutico de la investigación cualitativa. Teorías, procesos, técnicas Margarita Ballén Ariza,2007

Manual de Sociología y técnicas de investigación social Rubén Rodríguez Puertas,Alexandra Ainz Galende,2024-07-02

Uno de los grandes problemas a los que se enfrenta la sociología de manera particular y las ciencias sociales en un sentido más amplio, es que analizan una realidad, donde, con frecuencia, gran parte de las personas que forman parte de la misma ejercen sin las herramientas necesarias el rol de "expertos sociales". Se trata de una situación que no sucede en otras ciencias como la biología, la física y las conocidas como ciencias "puras" en general. Así, en el ámbito de la realidad social se entrecruzan los conocimientos empíricos desarrollados por expertos, con multitud de conocimientos sin base científica expuestos en la prensa, medios de comunicación y en la propia vida social (quien no ha escuchado a un amigo, a un vecino o a un familiar hablar con total seguridad sobre el empleo, la violencia de género, la crisis económica, la migración o la delincuencia). Por estos motivos uno de los objetivos de este manual, es dotar al estudiantado de las herramientas necesarias, para distinguir si una noticia tiene la suficiente base empírica para ser tratada como 'conocimiento probado', o si contrariamente se trata de 'conocimiento simple' disfrazado con un llamativo titular.

Introducción a las técnicas de investigación social Javier Callejo Gallego,Consuelo Del Val Cid,Jesús Gutiérrez

Brito,Antonio Viedma Rojas,2009-07-22 El presente texto estructurado en cuatro partes pretende ser un material de referencia para los alumnos de la materia de Técnicas de Investigación Social I. La primera parte busca fijar el significado de las técnicas de investigación social introduciendo al lector en las técnicas de investigación social. La segunda parte está destinada a las prácticas cualitativas con especial referencia a las denominadas técnicas grupales. La tercera parte centra sus tres apartados en la encuesta mediante cuestionario estandarizado. La cuarta y última parte estudia las diferentes formas de análisis. Al final de cada tema el lector dispone de una serie de preguntas que permiten un repaso rápido de lo leído.

Estilos de investigación social. Técnicas, epistemología, algo de anarquía y una pizca de sociosofía José Ángel Bergua

Amores,2011-11-19 El texto aborda las características epistemológicas y la utilización de las técnicas de investigación encuadradas en las perspectivas distributiva, estructural, contextual y dialéctica. Además, propone una crítica a la

investigación social, pues forma parte de un modo jerárquico (paternalista unas veces, autoritario otras) de construcción de la sociedad en alianza con las élites políticas y profesionales. Igualmente ofrece una salida para imaginar otros modos de tratar de / con lo social.

Educational Research in Higher Education Jose Gomez Galan,2022-09-01 Moreover, in recognition of the limitations inherent to its conceptualization, in which models present approaches from quantitative and qualitative research in order to address the totality and density of human endeavor. For this reason, within higher education research a more pluralistic and flexible view of research is emerging, where models of quantitative and qualitative research are recognized as being complementary to each other, to enter the social convolution in which we live. Educational Research in Higher Education presents latest research theories and modern-day examples of design research in higher education. The chapters represent an extensive assortment of interpretations and examples of how today's new design researchers conceptualize this growing methodology across areas as varied as classroom teaching methodologies, instructional innovations, educational technology, equality studies, environmental education, etc. This book is planned as a guide for master and doctoral students, novel researchers, crossover and professional researchers from field's other than but related to higher education, who are interested in supporting new design research.

Handbook of Perceptual Dialectology Daniel Long,Dennis R. Preston,2002-12-20 The Handbook of Perceptual Dialectology, Volume 2, expands on the coverage of both regions and methodologies in the investigation of nonlinguists' perceptions of language variety. New areas studied include Canada (anglophone and francophone), Cuba, Hungary, Italy, Korea, and Mali, and most prominent among the new approaches are studies of the salience of specific linguistic features in variety identification and assessment. As in Volume I, the reader will find in these chapters everything from the statistical treatment of the ratings of dialect attributes to studies of the actual discourses of nonlinguists discussing language variety. Dialectologists, sociolinguistics, ethnographers, and applied linguists who work in areas where language variety is a concern will appreciate the findings and methods of these studies, but social scientists of every sort who want to understand the role of language in the cultural lives of ordinary people will also find much of interest here.
