Mathematical Reasoning of Children and Adults Alina Galvão Spinillo, Síntria Labres Lautert, Rute Elizabeth de Souza Rosa Borba, 2021-05-24 This book adopts an interdisciplinary approach to investigate the development of mathematical reasoning in both children and adults and to show how understanding the learner's cognitive processes can help teachers develop better strategies to teach mathematics. This contributed volume departs from the interdisciplinary field of psychology of mathematics education and brings together contributions by researchers from different fields and disciplines, such as cognitive psychology, neuroscience and mathematics education. The chapters are presented in the light of the three instances that permeate the entire book: the learner, the teacher, and the teaching and learning process. Some of the chapters analyse the didactic challenges that teachers face in the classroom, such as how to interpret students' reasoning, the use of digital technologies, and their knowledge about mathematics. Other chapters examine students' opinions about mathematics, and others analyse the ways in which students solve situations that involve basic and complex mathematical concepts. The approaches adopted in the description and interpretation of the data obtained in the studies documented in this book point out the limits, the development, and the possibilities of students' thinking, and present didactic and cognitive perspectives to the learning scenarios in different school settings. Mathematical Reasoning of Children and Adults: Teaching and Learning from an Interdisciplinary Perspective will be a valuable resource for both mathematics teachers and researchers studying the development of mathematical reasoning in different fields, such as mathematics education, educational psychology, cognitive psychology, and developmental psychology.

Avaluació psicològica María Forns i Santacana, 2004 L'avaluació psicològica és una tasca complexa d'integració que es

produceix en l'entrecreuament dels coneixements de moltes disciplines de psicologia. Comporta l'anàlisi d'informació rellevant al cas i un conjunt de preses de decisions que conduiran a l'establiment de la diagnosi, a la selecció del tractament i a la valoració del seus resultats. Al llarg d'aquesta obra, els autors donen al lector tota la informació i les eines necessàries per a: reconèixer el marc d'anàlisi en què s'ha de situar una consulta psicològica; discernir la pertinença de l'anàlisi; obtenir i seleccionar la informació per a aclarir el motiu de consulta; estructurar les dades; seleccionar els àmbits de mesura i els instruments d'exploració pertinents; interpretar les principals proves psicològiques; integrar dades i redactar un informe psicològic.

La integración personal social y vocacional de los deficientes psíquicos adolescentes: elaboración y aplicación experimental de un programa conductual Carrobles, José Antonio, Verdugo Alonso, Miguel Ángel, 1988 Investigación que ofrece un programa de modificación de las conductas encaminado a integrar en la sociedad a los deficientes psíquicos adolescentes.

Focus on Neuropsychology Research Joshua R. Dupri, 2006 Neuropsychology is the study of brain-behaviour relationships and examines such domains of cognitive functioning as memory, attention, visual-perceptual abilities, language and intellectual function. It is strongly scientific in its approach and shares an information processing view of the mind with cognitive psychology and cognitive science. It is one of the most eclectic of the psychological disciplines, overlapping at times with areas such as neuroscience, philosophy (particularly philosophy of mind), neurology, psychiatry and computer science (particularly by making use of artificial neural networks).

The Theory of Mind Under Scrutiny Teresa Lopez-Soto, Alvaro Garcia-Lopez, Francisco J. Salguero-Lamilliar, 2024-01-01 This book is a call to expand and diversify our approach to the study of the human mind in relation to the Theory of Mind. It proposes that it is necessary to combine cross-disciplinary methods to arrive at a more complete understanding of how our minds work. Seeking to expand the discussion surrounding the Theory of Mind beyond the field of psychology, and its focus on our capacity to ascribe mental states to other people, this volume collects evidence and research to point to a more holistic understanding of our own minds, the minds of others, behavior, language, and reasoning. This book therefore illuminates the conceptual intricacy underlying the Theory of Mind. It posits that a wide scope is necessary to make a breakthrough in scientific research towards a full understanding of the nature, function, and development of our capacity to converge on biological processes of the brain towards consciousness, emotion, awareness, and cognition. The volume presents methods, results, critiques, and models intended to provoke debates in various academic disciplines. It is of interest to scholars working in psychology, neuroscience, philosophy of mind, and artificial intelligence.

Diagnóstico psicopedagógico María Cristina Cardona Moltó,Esther Chiner Sanz,María Ana Lattur Devesa,2011-03-09 Diagnóstico Psicopedagógico, conceptos básicos y aplicaciones es un libro que nace con una clara intención: disponer de un manual que guie y contribuya a hacer más fácil las tareas de diagnóstico en el campo de la educación y salir al paso de dos de los problemas endémicos en este campo: (1)la conveniencia de llevar a cabo procesos de evaluación y diagnóstico basados en métodos y procedimientos de recogida de datos consistentes, precisos y apropiados a cada situación y (2)la necesidad de hacer hincapié en la extrema precaución que es necesario tomar a la hora de realizar este tipo de funciones. Todos los capítulos del libro se complementan con un apartado de actividades que tienen el objetivo de conectar los contenidos teóricos con las aplicaciones prácticas. La combinación del componente teórico con el práctico hace de este libro un material especialmente idóneo para la docencia de la materia Diagnóstico en los títulos de grado de formación de Maestro, así como de los títulos de postgrado o Máster en psicopedagogía y educación.

Investigación orientada al cambio en Psicología Educacional Jorge Catalán,2012 Este libro es un testimonio de la existencia de investigación al servicio del cambio educativo. Lo han escrito psicólogos y psicólogas, educadores y educadoras comprometidos con la educación. Si bien hay buenos argumentos para demandar más productividad y calidad en lo que se investiga, también los hay para difundir los méritos del saber acumulado, lo que de buena manera ha inspirado esta publicación. Ojalá que estudiantes y profesionales se beneficien de ella. Ojalá que quienes ostentan cargos relacionados con distintos niveles de la toma de decisiones, encuentren aquí algunas luces para bien de su labor. Ojalá también que

académicos y académicas utilicen el texto en sus clases y para sus propias investigaciones, e igualmente para criticarlo y mejorararlo

Investigación sobre la Atención Educativa y Comorbilidad en el Trastorno del Espectro Autista Celia Gallardo Herrerías,Antonio Luque de la Rosa,2025-04-02 El TEA ha supuesto a lo largo de varias décadas un cajón de sastre donde se ha incluido a todo a aquel alumnado que impedía el normal desarrollo de la enseñanza en un aula, aunque ya finales del siglo pasado comenzaron a desarrollarse investigaciones donde se trataba de explicar el origen nosológico y cuadro clínico característico de esta patología, continúa existiendo hoy en día falta de rigor en cuanto a su explicación, comprensión y tratamiento. En este contexto de incertidumbre se nutre la necesidad de homogeneizar diagnósticos e intervenciones, siendo la primera de las cuestiones resuelta por los manuales y clasificaciones de trascendencia internacional como DSM-V-TR (APA, 2022) y CIE-11 (OMS, 2019). No obstante, existe una latente falta de unidad en todo el territorio español en cuanto a lo que respuesta educativa se refiere. Las competencias educativas de cada CCAA han motivado la existencia de variados y en muchos casos distantes modos de organizar la respuesta educativa orientada al alumnado con TEA, fruto de la concreción de un currículo abierto a múltiples interpretaciones, elaborado a nivel estatal.Recordamos aquí nuevamente que el cuadro clínico de esta patología presenta anomalías en las funciones ejecutivas (control inhibitorio, memoria de trabajo y capacidad atencional), así como asociadas a la comunicación, al lenguaje, a la interacción social y al área conductual; siendo las mismas causantes de una mayor dificultad para el aprendizaje.En este sentido, Rogers et al. (2011) apuntan importantes conflictos en el trabajo de las áreas troncales de conocimiento, vinculadas fundamentalmente al área del lenguaje y las matemáticas, requiriendo un mayor esfuerzo y tiempo de trabajo para la realización de una misma tarea comparativamente que sus coetáneos, convirtiéndose esta circunstancia en un elemento determinante para el rendimiento escolar y consecuente éxito académico.La reciente consideración de la comorbilidad asociada al TEA (DSM-V-TR), complejiza aún más si cabe la situación anteriormente planteada, siendo el caso del TEA comórbido con TDAH el más difícil de diagnosticar dada su proximidad sintomatológica.Según Blair y Razza (2007) los niños con un trastorno coexistente con TEA como es TDAH tienden a presentar un mayor deterioro cognitivo comparativamente con aquellos que presentan TEA de manera aislada. Esta circunstancia repercute negativamente en la capacidad para mantenerse concentrado en una tarea, retener la información o inhibir las respuestas impulsivas convirtiéndose en un inconveniente para el aprendizaje y por consiguiente para el éxito académico. Las funciones ejecutivas (memoria de trabajo, inhibición de respuesta y capacidad atencional) alteradas se vinculan de manera muy estrecha con la alfabetización y la competencia matemática (Clark et al., 2010).Aunque las alteraciones de las funciones ejecutivas afectan tanto al TDAH (Barkley, 1990) como al TEA (Ozonoff et al., 1991), Miranda et al. (2013) sugieren patrones diferentes. Mientras que para TEA son frecuentes los errores de planificación y flexibilidad cognitiva, para el TDAH serán recurrentes los problemas de inhibición de respuesta. La memoria de trabajo según Truedsson

et al. (2015) se verá afectada por igual, tanto en el TDAH como en el TEA. De esta manera se pretende analizar las dificultades de aprendizaje que presentan los niños con TEA comórbido con TDAH y la respuesta educativa recibida, teniendo en cuenta los recursos y las medidas adoptadas a nivel educativo.
