This new edition contains several chapters on the associated problems of autism, such as intellectual disability, epilepsy, tics, eating disorders and sleep problems, as well as a chapter on epidemiology that documents the historical increase in autism diagnoses. Several chapters summarize the latest data on neuroanatomy, biochemistry and neuropsychology, while three neurogenomics chapters show evidence suggesting that autism occurs due to genetic errors which cause interruption or misdirection of critical neurodevelopmental circuits in the fetal brain. Assessing Adolescent and Adult Intelligence Alan S. Kaufman,Elizabeth O. Lichtenberger,2005-08-05 The classic text--now updated with a new interpretive approach to the WAIS?-III Assessing Adolescent and Adult Intelligence, the classic text from Alan Kaufman and Elizabeth Lichtenberger, has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents. The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS?-III. Augmenting the traditional sequential and simultaneous WAIS?-III interpretive methods, the authors present a new approach derived from Cattell-Horn-Carroll (CHC) theory. This approach combines normative assessment (performance relative to age peers) with ipsative assessment (performance relative to the person's own mean level). Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC?-IV, Kaufman and Lichtenberger have applied this system to the WAIS?-III profile of scores along with integrating recent WAIS?-III literature. Four appendices present the new method in depth. In addition to a detailed description, the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system, and norms tables for the new WAIS?-III subtest combinations added in this approach. Assessing Adolescent and Adult Intelligence remains the premier resource for the field, covering not only the WAIS?-III but also the WJ III?, the KAIT, and several brief measures of intelligence, as well as laying out a relevant, up-to-date discussion of the discipline. The new, theory-based interpretive approach for the WAIS?-III makes this a vital resource for practicing psychologists, as well as a comprehensive text for graduate students.

Treating Mental Illness and Behavior Disorders in Children and Adults With Mental Retardation Anton Do en, Kenneth Day, 2008-08-13 Since the 1970s, the development of normalization philosophy and the implementation of community care policies have highlighted the nature and treatment of psychiatric and behavior disorders in people with mental retardation and rekindled the interest of scientists, psychiatric practitioners, and service providers. With these changes has grown a substantial body of new research and information on the phenomenology, epidemiology, classification, and clinical features of mental illness and behavior disorders in mentally retarded persons. In response to this growing interest and awareness, the editors, together with internationally renowned contributors from the United States and Europe, have compiled the first comprehensive handbook of the current theory and practice of mental health treatment and care in mentally retarded children and adults. Both contemporary and in-depth, this multidisciplinary, multidimensional volume covers all available therapeutic methods, including psychopharmacotherapy, psychotherapy, behavior therapies, cognitive therapy, and the systems approach for all the main diagnostic disorders in people with mental retardation. Parts I and II present an overview of epidemiology and clinical presentation, including research trends, and therapeutic methods, including psychotherapy, psychopharmacology, behavioral therapies, cognitive and social learning treatments, and working with families and caregivers. Parts III and IV focus on psychotherapeutic interventions, such as rational emotive group treatment with dually diagnosed adults, pre-therapy for persons with mental retardation who are also psychotic, and systemic therapy, and how to

apply these methods to the treatment of specific mental illnesses, such as schizophrenia, epilepsy, and mood and anxiety disorders. Parts V and VI discuss how to treat behavior disorders such as aggression/self-aggression (pharmacotherapy and strategic behavioral interventions) and self-injurious behaviors (multimodal contextual approach), including group therapy for sex offenders and a pedagogical approach to behavior problems, and which treatment methods, such as psychodynamically oriented psychotherapy and pharmacotherapy, are most effective with children, including developmental-dynamic relationship therapy with more severely mentally retarded children. Parts VII and VIII provide guidance on mental health services and staff training, including psychiatric treatment in community care and a model for inpatient services for mentally ill persons with mental retardation, and the editors final chapter, which draws together all the various therapeutic approaches described in previous chapters to provide a practical framework for an integrative approach. Filling a major gap in the literature, this indispensable resource for psychiatrists, psychologists, and educators working with mentally retarded persons is also intended for general practitioners, doctors, social workers, and therapists working in the same or related fields.

The second section describes the assessment approaches that clinicians will find most useful in evaluating behaviour. The third section covers treatment approaches emphasising the importance of a broad, eclectic approach. The contributors, all acknowledged experts in their fields of paediatrics, psychology and psychiatry, provide a comprehensive overview of this set of major challenges, emphasising the importance of auditory detection, understanding, measurement and treatment.
