**Sustainable Entrepreneurship and Social Innovation** Katerina Nicolopoulou, Mine Karatas-Ozkan, Frank Janssen, John Jermier, 2016-11-10 Sustainable entrepreneurship has attracted growing attention in both scholarly and practitioner circles. **Water Availability and Management in Mexico** Elena María Otazo-Sánchez, Amado Enrique Navarro-Frómeta, Vijay P. Singh, 2019-09-28 This book presents several complex case studies related to water management and planning in the context of pollution, growing demands, and global climate change in Mexico, but which are also relevant for other countries in Latin America. These concerns are of critical importance for policymakers who are coping with multiple conflicting interests. Water availability in Mexico is polarized, with abundant rainfall and large rivers in the south, and desert-like conditions in the

north. The central region, which is the most industrialized, is overpopulated. Mexico City pours millions of cubic meters of “blackwater” into the northern valley daily and receives its clean water from the south. To address these unsustainable conditions, the world's 4th biggest water treatment plant went into operation in 2018. The water infrastructure and governance must satisfy the demands of all sectors, including agricultural, urban, and economic activities. At the same time, water resources are affected by drought, and climate change puts constraints on the supply. As such, regulation and monitoring are important when it comes to adherence to agreed plans and priorities. The book is divided into four sections. 1: Water Availability discusses quantitative aspects, such as supply, methods of calculation, and fracking. 2: Water Quality highlights pollution risks and diagnosis of water resources. 3: Water Allocation examines the sectoral demands and vulnerability due to unsustainable irrigation. 4: Water Governance and Management focuses on laws, urban rules, national parks, planning, and integrated water resources management, among other topics. The chapters include illustrative case studies in Mexico, such as basins, cities, reservoirs, and aquifers, water supply demand assessment, planning, and management.

Ethnobiology is detailed in the present book as well as the importance of the integrative medicine for the ancient and actual cultures. The book represents an effort to keep the ethnobiological knowledge of communities for the use of traditional desertic plants with the actual analytical techniques to unveil the chemical molecules responsible of the biological or biomedical applications. Features: Describes the endemic plants used in traditional medicine Includes the chemical and bioactive compounds from desertic medicinal plants Addresses the analytic techniques to determine chemical and bioactive compounds Represents an effort to keep the ethnobiological knowledge of communities To execute this book, there are collaborations by authors from different institutions in northern Mexico, which is where the arid and semi-arid ecosystems of the country are found. Although the subject of medicinal plants has been treated from different angles, this book offers a holistic and comprehensive vision of these important organisms of the Mexican desert, thus resulting in an updated work for specialized readers and for those who are beginning in this exciting theme.

**Caminos de Desarrollo Estudio multidimensional de Paraguay Volumen 3. Del Análisis a la Acción**

OECD,2019-10-01 Paraguay se ha fijado ambiciosos objetivos de desarrollo para 2030. Para lograrlos, tendrá que enfrentar dos grandes desafíos: reforzar las fuentes sostenibles de prosperidad económica y situar al país en una senda de desarrollo más inclusiva. Avanzar hacia una sociedad más inclusiva requerirá una agenda de reformas amplia y vigorosa. Primero, el sistema de salud del país requiere una reforma sistémica para ampliar su cobertura, reducir la vulnerabilidad de los paraguayos ante los riesgos en salud y aumentar la eficiencia en la provisión de servicios de salud. En segundo lugar, el sistema de protección social debe superar su fragmentación y ser más eficaz en la prestación de los servicios adecuados y las herramientas de gestión de riesgos a los ciudadanos de acuerdo con sus necesidades. En particular, el sistema de pensiones requiere reformas para aumentar su cobertura y ser más equitativo y más sostenible. Tercero, la calidad y la inclusividad del sistema de educación y capacitación deben fortalecerse para generar las habilidades que necesita la economía y brindar oportunidades a todos. Con base en el análisis y las recomendaciones realizadas en los Volúmenes 1 y 2 de este Estudio Multidimensional de País, este informe identifica áreas clave para la acción y presenta planes de acción específicos para iniciar la reforma. El informe también proporciona un cuadro de indicadores de monitoreo para respaldar la agenda de reforma en el país.
