A Guide to State Succession in International Investment Law Patrick Dumberry,2018-07-27 A Guide to State Succession in International Investment Law provides a comprehensive analysis of State succession issues arising in the context of international investment law. The author examines whether a successor State is bound by the investment treaties and State contracts which the predecessor State had signed with other States and foreign investors before the date of succession. Actors who are called upon to apply rules of State succession in investment arbitration cases will find this book a valuable source of practical guidance with strong theoretical foundations.

International Law Jan Wouters,Cedric Ryngaert,Tom Ruys,Geert De Baere,2018-12-13 This textbook offers for the first time a comprehensive analysis of the classic doctrines and main areas of international law from a European perspective, meeting the needs of the many European law schools teaching public international law in English. Special attention is devoted to the practice of the European Union, the Council of Europe and European States - both civil law and common law countries - with regard to international law. In particular the book analyses the interplay between international law, EU law and national law in the case law of the Court of Justice of the EU, the European Court of Human Rights and national jurisdictions in Europe. It provides the reader with insights into how the international legal practice of the EU and its Member States impacts the development of international law, both in terms of doctrines such as treaty-making and customary law, the exercise of (extraterritorial) jurisdiction, state responsibility and the settlement of disputes, as well as particular sub-fields of international law, such as human rights law and international economic law. In addition the book covers other important areas such as the use of force and collective security, the law of armed conflict, and global and regional international organisations. It provides European perspectives on all these issues and will be of great value to students, scholars and practitioners.

Quality In Professional Translation Joanna Drugan,2013-02-28 How do translation companies, multilingual international organizations and individual translators measure and improve the quality of their translations? This book

reports on the range of approaches to quality assurance across the translation industry, from Norway to China, from the individual freelance working in a home office to the largest translation supplier in the world. Best practice is outlined for a range of translation scenarios, enabling readers to learn from others' experience - and mistakes. The author also draws on over a decade's experience to outline the potential to improve quality by exploiting modern technological support tools such as translation memory software. New and experienced translators will gain understanding of what employers expect (and reward); translation companies can learn how their peers and rivals manage this sensitive area of their work; clients will find out what levels of quality they can expect; and academics are provided with an illuminating insight into how quality is assessed and guaranteed in the profession today.

Ils/Elles peuvent prescrire des produits de santé non soumis à prescription médicale obligatoire, des examens complémentaires et effectuer des renouvellements ou adaptations de prescriptions médicales. Les IPA interviennent dans les domaines des pathologies chroniques stabilisées, de la prévention et des polypathologies courantes en soins primaires ; de l'oncologie et hémato-oncologie ; de la maladie rénale chronique, dialyse et transplantation ; de la psychiatrie et santé mentale. Mais qu'est-ce que la pratique avancée et comment s'est-elle construite ? Quelle est la législation qui la régit, notamment la plus récente ? Comment et où se former ? Quels sont les rôles et les actes effectués par l'IPA à ce jour ? Quelles sont les compétences attendues pour cet exercice ? Autant de questions auxquelles ce livre propose une réponse claire, structurée et actualisée, appuyée des témoignages et des retours des premiers diplômés.

Stage Directing Michael Wainstein, 2012-03-15 With Stage Directing: A Director's Itinerary, the student of theatrical directing now has a step-by-step guide to directing a production, from choosing a play to opening night. Unlike other

directing textbooks, this practical guidebook provides instruction on how to organize the work of the director through the practical challenges of the directorial process (e.g., organizing a budget spreadsheet, writing casting notices, setting up an audition space, etc.). In Stage Directing, the process of directing a production takes the form of twenty-one chapters, which contain helpful examples and tried-and-true exercises, as well as information on how to organize the director's documents into a director's production notebook.

Airport Competition Regulation in Europe Stamatis Varsamos, 2016-10-15 Over the past thirty years, airports within the EU - including nearly a hundred newly built or rebuilt during that time - have undergone a major economic transformation. From mere infrastructure providers, airports have become diversified and complex commercial enterprises in competition with each other. This is the first and only book thus far to deal with the legal issues surrounding this important development, focusing on the impact of EU Directive 12/2009 on airport charges. Examining the use of airport infrastructure, the growing competition among airports, and the relations between airlines and airports, the author, a leading aviation law practitioner, covers such issues and topics as the following: - types of charges - landing, passenger, aircraft parking; - pricing factors determining airport charges; - vertical contractual relations between airports and airlines; - airport market power and dominance; - issues of consultation and transparency; - ability of airlines and passengers to switch to alternative airports; - application of state aid rules; - security charges; - environmental charges and schemes; and - price discrimination and differentiation. The presentation encompasses a critical analysis of the findings of case law, both international and European, on airport charges in the context of the new trend of airports and airlines concluding vertical agreements. As an examination of the economic regulation of EU airports due to the liberalization process, structural changes in the ownership status of many EU airports, and the emergence of new airline business models (such as low-cost carriers), this book, the only one of its kind, will quickly become indispensable to practitioners, policymakers, and academics in aviation law.

Community Health Workers: Describing the Breadth of Interventions and Contexts Across the World Mathieu Nacher ,Nicolas Vignier, 2025-05-15 Social inequalities in health remain a challenging problem throughout the world. Despite a variety of specific contexts, vulnerable populations often present to care later with more advanced health problems, and often greater fatality rates, at younger ages. To remediate this, health services NGOs project personnel to liaise with the communities and serve as an intermediary between health professionals and patients from vulnerable populations. The denominations may vary (health mediation, cultural mediation, community health workers, Agente de Saúde...) and sometimes entail different functions. Hard evidence on the impact of these "mediators" is often lacking because of the differences in contexts, specific health problems considered, and what "mediation" entails in different countries. In this Research Topic, we encourage submissions of articles that describe a range of experiences for different contexts where

“mediation” (health mediation, cultural mediation, community health workers, Agente de Saúde...) programmes are deployed for public health issues. From this variety of experiences we hope this special issue will constitute a precious repository of experiences and contexts that could be transferable and scalable interventions for others.
