The Encyclopedia of Best Films Jay Robert Nash, 2019-10-23 This all-inclusive A-Z encyclopedia by one of the world's foremost experts on cinema provides comprehensive annotations of the best films produced from 1914 on. The work offers more than 5,000 three- to five-star entries (three stars=good; four stars=excellent; five stars=masterpiece), and yes, author Jay Robert Nash has viewed every single one of them as well as many more that did not make the cut. In addition to a precis, each film's entry also includes a listing of the cast as well as the key principles involved in production, from the director to the hair stylist. Especially unique to this book is a rating system that helps parents determine whether or not a film is appropriate for their children. Unlike the industry rating system which can be influenced by studio lobbying, Nash objectively evaluates each film and confers upon it one of four recommendations for viewing: recommended, acceptable, cautionary, and unacceptable. Backmatter includes a list of top films by genre (i.e. animated, drama, sports, mystery, adventure etc.) as well as an annotated name index listing all persons mentioned along with their dates of birth and death. Rounding out this essential volume for the film buff are over 500 still photos from the author's private collection.

Three Lives Oliver Matuschek, 2011-11-29 Drawing on a great wealth of newly available sources, this definitive biography recounts the eventful life of a great writer spoilt by success—a life lived in the shadow of two world wars, and which ended tragically in a suicide pact. Matuschek examines three major phases in the life of the world-famous Austrian author—his years of apprenticeship, his years of success as a professional working writer in Salzburg, and finally his years of exile in Britain, the USA and Brazil. Including the sort of personal detail conspicuously absent from Zweig's memoir, and incorporating newly discovered documents, Matuschek's biography offers us a privileged view into the private world of the master of psychological insight.

The Rotarian, 1995-02 Established in 1911, The Rotarian is the official magazine of Rotary International and is circulated worldwide. Each issue contains feature articles, columns, and departments about, or of interest to, Rotarians. Seventeen Nobel Prize winners and 19 Pulitzer Prize winners – from Mahatma Gandhi to Kurt Vonnegut Jr. – have written for the magazine.

Germany and the Americas Thomas Adam, 2005-11-07 This comprehensive encyclopedia details the close ties between the German-speaking world and the Americas, examining the extensive Germanic cultural and political legacy in the nations of the New World and the equally substantial influence of the Americas on the Germanic nations. From the medical discoveries of Dr. Johann Siebert, surgeon general to Simon Bolivar, to the amazing explorations of the early-19th-century German explorer Alexander von Humboldt, whose South American and Caribbean travels made him one of the most celebrated men in Europe, Germany and the Americas examines both the profound Germanic cultural and political legacy throughout the

Americas and the lasting influence of American culture on the German-speaking world. Ever since Baron von Steuben helped create George Washington's army, German Americans have exhibited decisive leadership not only in the military, but also in politics, the arts, and business. *Germany and the Americas* charts the lasting links between the Germanic world and the nations of the Americas in a comprehensive survey featuring a chronology of key events spanning 400 years of transatlantic history.

What Little I Remember Otto Robert Frisch, 2019-08-17 Otto Robert Frisch took part in some of the most momentous developments in modern physics, notably the discovery of nuclear fission (a term which he coined). His work on the first atom bomb, which he saw explode in the desert "like the light of a thousand suns", brought him into contact with figures such as Robert Oppenheimer, Edward Teller, Richard Feynman and the father of electronic computers, John von Neumann. He also encountered the physicists who had made the great discoveries of recent generations: Einstein, Rutherford and Niels Bohr. This characterful book of reminiscences sheds an engagingly personal light on the people and events behind some of the greatest scientific discoveries of this century, illustrated with a series of fascinating photographs and witty sketches by the author himself. "This is a happy book, from which the author's personality and his enjoyment of physics, of music, of life, emerges clearly. It is also a portrait of the pre-War world of physics, of days of small numbers and small apparatus, of times when a physicist could think of an ingenious experiment today and set it up tomorrow." — Rudolf Peierls, *Nature* "In writing a charming, light-hearted cameo of his life and times as a scientist, Professor Frisch has revealed more about science than many authors with greater pretensions. This is a book that deserves to be read, and will be enjoyed, by a wide audience." — *The Economist* "Despite his modest title, what Frisch 'manages to remember' is quite impressive. He loved to tell stories and his many vignettes of his associates... include nearly every outstanding physicist who worked in nuclear physics." — *Science* "In the straightforward narrative style he developed writing lay treatments of modern physics, Frisch recounts his memories of significant men and events in the history of physics between 1920 and 1960... Frisch tells his stories well..." — Robert W. Seidel, *Isis, A Journal of the History of Science Society*

British Cinema of the 1950s Sue Harper, Vincent Porter, 2003 In this definitive and long-awaited history of 1950s British cinema, Sue Harper and Vincent Porter draw extensively on previously unknown archive material to chart the growing rejection of post-war deference by both film-makers and cinema audiences. Competition from television and successive changes in government policy all forced the production industry to become more market-sensitive. The films produced by Rank and Ealing, many of which harked back to wartime structures of feeling, were challenged by those backed by Anglo-Amalgamated and Hammer. The latter knew how to address the rebellious feelings and growing sexual discontents of a new generation of consumers. Even the British Board of Film Censors had to adopt a more liberal attitude. The collapse of the

studio system also meant that the screenwriters and the art directors had to cede creative control to a new generation of independent producers and film directors. Harper and Porter explore the effects of these social, cultural, industrial, and economic changes on 1950s British cinema.

Chess in the Middle Ages and Early Modern Age Daniel E. O'Sullivan, 2012-07-30 The game of chess was wildly popular in the Middle Ages, so much so that it became an important thought paradigm for thinkers and writers who utilized its vocabulary and imagery for commentaries on war, politics, love, and the social order. In this collection of essays, scholars investigate chess texts from numerous traditions - English, French, German, Latin, Persian, Spanish, Swedish, and Catalan - and argue that knowledge of chess is essential to understanding medieval culture. Such knowledge, however, cannot rely on the modern game, for today's rules were not developed until the late fifteenth century. Only through familiarity with earlier incarnations of the game can one fully appreciate the full import of chess to medieval society. The careful scholarship contained in this volume provides not only insight into the significance of chess in medieval European culture but also opens up avenues of inquiry for future work in this rich field.

Exiles Traveling ,2015-06-29 This volume presents for the first time a study of the interface between exile and travel within the context of exile from Nazi Germany. The nineteen essays share the overarching aim to compare the tropes of travel and exile as generators of a critical discourse and as central categories within German exile, in particular literature, music and film. The essays are guided by powerful questions: How does travel compare to exile, and how much overlap is there between these two categories? How do exiles travel, as practitioners of displacement? Or rather, to what extent does the concept of travel apply to the exilic predicament? Do the terms "exile" and "travel" still have validity in our postmodern era of cosmopolitanism, ever increasing mobility, the embrace of otherness, and tourism? How does exile literature in which travel is thematized compare to the tradition(s) of travel writing? And how are the critical moments of leavetaking, remembering home, and return imagined and narrated? The essays feature numerous German and Austrian authors, musicians, and filmmakers and lend fresh insights into German Exile and the field of Exile Studies at large.
