Concepts of Culture Adam Muller, 2005 How do we define 'culture?' In this volume, Adam Muller brings together contributions from established and emerging scholars in a number of different disciplines who each examine the concept of culture as it is understood and deployed within their respective fields.

Art and Politics in Roger Scruton's Conservative Philosophy Ferenc Hörcher, 2022-12-12 This book covers the field of and points to the intersections between politics, art and philosophy. Its hero, the late Sir Roger Scruton had a longstanding interest in all fields, acquiring professional knowledge in both the practice and theory of politics, art and philosophy. The claim of the book is, therefore, that contrary to a superficial prejudice, it is possible to address the philosophical issues of art and politics in the same oeuvre, as the example of this Cambridge-educated analytical philosopher proves. Accordingly, the book has a bold thesis on the general, theoretical level, mapping the connections between politics, art and philosophy. However, it also has a pioneering commitment on the level of the particular, offering the first full-length study into the philosophical legacy of Roger Scruton, probably the most important British conservative philosopher of the late 20th and the first decades of the 21st century. It also allows reader to look into the philosopher's fascination with Central European art and culture. Finally, it also provides a daring analysis of the late Scruton's metaphysical inspirations, connecting the arts, and especially music, with religion and the bonds of love.

Thinking Through the Body Richard Shusterman, 2012-09-17 A richly rewarding vision of the burgeoning interdisciplinary field of somaesthetics, with fourteen essays by the originator of the field.

The Naked Brain Richard Restak, M.D., 2009-01-21 Consider a world in which • Marketers use brain scans to determine consumer interest in a product • Politicians use brain-image-based profiles to target voters • A test could determine your suitability for a job or to whom you will be romantically attracted Far from science fiction, this "neurosociety"—a society in which brain science influences every aspect of daily life—is already here. Innovative researchers and cutting-edge technology, like brain imaging and brain scanning devices, have revolutionized our understanding of how we process information, communicate, trust, sympathize, and love. However, scientists and doctors are not the only ones interested in the naked brain; advertisers, politicians, economists, and others are using the latest findings on the human brain to reshape our lives, from the bedroom to the boardroom. Despite the potential benefits, there's obvious peril in the promise. Richard

Restak explores the troubling moral and legal dilemmas that arise from corporate and political applications of this new brain research. Someday we may live in a world where our choices, our professional and personal prospects, even our morals and ethics will be controlled by those armed with an elite understanding of the principles of neuroscience. Eye-opening and provocative, *The Naked Brain* is a startling look at the impact such unprecedented access to our most secret thoughts and tendencies will have on all of us. In *The Naked Brain*, bestselling author Richard Restak explores how the latest technology and research have exposed the brain and how we think, feel, remember, and socialize in unprecedented and often surprising ways. Now that knowledge is being used by doctors, advertisers, politicians, and others to influence and revolutionize nearly every aspect of our daily lives. Restak is our guide to this neurosociety, a brave new world in which brain science influences our present and will even more tangibly shape our future. Citing social trends, shifts in popular culture, the rise and fall of products in the public favor, even changes in the American vernacular, *The Naked Brain* is an illuminating and often troubling investigation of the impending opportunities and dangers being created by the neuroscience revolution, and a revelation for anyone who ever wondered why they prefer Coke over Pepsi or Kerry over Bush. From the Hardcover edition.

Four Arts of Photography Dominic McIver Lopes, 2016-01-07 *Four Arts of Photography* explores the history of photography through the lens of philosophy and proposes a new scholarly understanding of the art form for the 21st century. Re-examines the history of art photography through four major photographic movements and with case studies of representative images Employs a top-down, theory to case approach, as well as a bottom-up, case to theory approach Advances a new theory regarding the nature of photography that is grounded in technology but doesn't place it in opposition to painting Includes commentaries by two leading philosophers of photography, Diarmuid Costello and Cynthia A. Freeland

Liberalism Versus Conservatism François B. Gérard, 2000 Everyone eschews labels yet we all seem to possess them in the minds of legions of politicians, marketers and even the ever-peering government. We are being targeted daily by flaming liberals, left-wing liberals, right-wing conservatives, compassionate conservatives, religious conservatives and liberals, pinko liberals, middle-of-the-road liberals conservatives and liberals, pinko liberals, middle-of-the-road liberals and conservatives and of course by neoconservatives and neoliberals. The search is on for kindred souls -- the types who will open their wallets to support whatever it is the hucksters are peddling. But what do these concepts mean and do their torchbearers grasp the underlying philosophies or do they care? This bibliography lists over hundreds of entries under each category which are then indexed by title and author.

Why Conservatives Should Support the Free Market Hannes H. Gissurarson, 2018-10-04 In the report, the author first briefly discusses the ideas of Burke, Hume and Menger, moving on to Hayek and his ambivalent attitude towards conservatism and then turning to the ideas and arguments of two conservative British philosophers, Michael Oakeshott and Sir Roger Scruton. In the chapters that follow, he analyses the most relevant conservative objections to economic liberalism

and try to show how they can be met, and accommodated, by conservative liberalism. The main conclusion of this study is that it is perfectly coherent to be both a social conservative, in favour of stability, family values and patriotism, and an economic liberal, supporting free trade and the market process.

Introduction To The Analysis Of Algorithms, An (3rd Edition) Michael Soltys-kulinicz, 2018-01-31 A successor to the first and second editions, this updated and revised book is a leading companion guide for students and engineers alike, specifically software engineers who design algorithms. While succinct, this edition is mathematically rigorous, covering the foundations for both computer scientists and mathematicians with interest in the algorithmic foundations of Computer Science. Besides expositions on traditional algorithms such as Greedy, Dynamic Programming and Divide & Conquer, the book explores two classes of algorithms that are often overlooked in introductory textbooks: Randomised and Online algorithms — with emphasis placed on the algorithm itself. The book also covers algorithms in Linear Algebra, and the foundations of Computation. The coverage of Randomized and Online algorithms is timely: the former have become ubiquitous due to the emergence of cryptography, while the latter are essential in numerous fields as diverse as operating systems and stock market predictions. While being relatively short to ensure the essentiality of content, a strong focus has been placed on self-containment, introducing the idea of pre/post-conditions and loop invariants to readers of all backgrounds, as well as all the necessary mathematical foundations. The programming exercises in Python will be available on the web (see www.msoltys.com/book for the companion web site).

Sonic Transformations of Literary Texts Siglind Bruhn, 2008 Among the possible relationships between art forms that express themselves in different sign systems, the pairing of words and images is the one that is most thoroughly explored. And in fact, the most securely established terminology is found in a field that has experienced a significant revival in recent years: ekphrasis. The literary topos through which a poem (or any other text) addresses itself to the visual arts has received much attention in recent years and been subjected to intense scrutiny.--BOOK JACKET.

Philosophy of the Arts Gordon Graham, 2006-09-07 A new edition of this bestselling introduction to aesthetics and the philosophy of art. Includes new sections on digital music and environmental aesthetics. All other chapters have been thoroughly revised and updated.

Singularities Aaron Ridley, 2024-08-14 These essays, half of them appearing here for the first time, address issues concerning the two key singularities that Kant identified in aesthetics: artistic creativity and aesthetic judgement. Ranging from Kant himself to contemporary debates, from song to conceptual art, from ethics to atheism, from function to failure, Aaron Ridley explores the ways in which the one-off character of creativity and judgement may defy our ordinary expectations of what an explanation should be like. Intended equally for specialists and students, this collection offers a distinctive approach to aesthetics that will be of interest to any reader concerned with philosophical reflection upon the arts.

Civilizational Identity M. Hall,P. Jackson,2008-01-11 This volume focuses on the constitutive politics of civilizational identity, examining the practices through which notions of civilizational identity are produced and reproduced in different contexts, including the global credit regime, modernity debates, and the war on terrorism.

Is God Invisible? Charles Taliaferro,Jil Evans,2021-04-08 An essay on the religious significance of the person in philosophy of beauty, aesthetic experience, and the philosophy of art.

Territorial Investigations Annette W. Balkema,Henk Slager,1999 In this volume, architects, artists, theorists, three symposia and four exhibitions attempt to find answers to questions such as: Could the architectonic study and/or deconstruction of space play a decisive role in the shift of attention to space?, and: What is the role of the aesthetization of the environment on our concept of space?

Ideology and Power in Norway and Iceland, 1150-1250 Costel Coroban,2018-06-11 This book provides an analysis of the ideology of power in Norway and Iceland as reflected in sources written during the period 1150-1250. The main focus is explaining the way that Kings' power in Norway, and that of chieftains in Iceland, was idealised in important texts from the 12th and 13th centuries (Sverris saga, Konungs skuggsjá, Hákonar saga Hákonarsonar, Íslendingabók, Egils saga, Laxdæla saga and Þórðar saga kakala). The originality of this work consists in the fact that it is the first monograph to comparatively analyse the ideology of power in Iceland, looking specifically at representations of king(s) and chieftains during the Civil Wars period, and compare the findings to those pertaining to Norway.

Futures of the Contemporary Paulo de Assis ,Michael Schwab,2019-07-15 Transdisciplinary approaches to the notions of "the contemporary" and "contemporaneity" Futures of the Contemporary explores different notions and manifestations of "the contemporary" in music, visual arts, art theory, and philosophy. In particular, the authors in this collection of essays scrutinise the role of artistic research in critical and creative expressions of contemporaneity. When distinguished from "the contemporaneous" of a given historical time, "the contemporary" becomes a crucial concept, promoting or excluding objects and practices according to their ability to diagnose previously unnoticed aspects of the present. In this sense, the contemporary gains a critical function, involving particular modes of relating to history and one's own time. Written by major experts from fields such as music performance, composition, art theory, visual arts, art history, critical studies, and philosophy, this book offers challenging perspectives on contemporary art practices, the temporality of artistic works and phenomena, and new modes of problematising the production of art and its public apprehension. Contributors: Andrew Prior (University of Plymouth), Babette Babich (Fordham University), Geoff Cox (Fine Art at Plymouth University / Aarhus University), Heiner Goebbels (Justus Liebig University), Jacob Lund (Aarhus University), Michael Schwab (Orpheus Institute),

Philosophy, Music and Emotion Geoffrey Madell, 2019-08-05 Philosophy, Music and Emotion explores two issues which have been intensively debated in contemporary philosophy: the nature of music's power to express emotion, and the nature of emotion itself. It shows how closely the two topics are related and provides a radically new account of what it means to say that music 'expresses emotion'. Geoffrey Madell maintains that most current accounts of musical expressiveness are fundamentally misguided. He attributes this fact to the influence of a famous argument of the nineteenth-century critic Hanslick, and also to the dominant 'cognitivist' approach to the nature of emotion, which sees the essence of emotion to be the entertaining of evaluative judgements and beliefs of a certain sort, an account very much in accord with Hanslick's position. Such an approach results either in the unpersuasive view that musical expressiveness is somehow akin to human expressive gesture, or in the view that music arouses feelings which have no specific object and, unavoidably, no necessary connection with the music. The book argues that the 'cognitivist' account of the nature of emotion is quite false and that it needs to be replaced with a conception of emotions as states of feeling towards - states of intentional feeling - whose objects are often evaluatively characterised states of affairs; however, in the context of the emotions that are aroused by music these objects are always musical events or states. Central to this bold analysis of emotion is a new account of two closely connected mental states, those of desire and of pleasure, and of what role these states have in human motivation and value.

Suprahumanism Daniel S. Forrest, 2014-08-09 We are at a crucial point in time: a moment of transition as important as the emergence of Homo sapiens, or the beginning of civilisation after the Neolithic Revolution. Paradoxically, the triumph of the West - also called 'globalisation' - means the death of Europe and European man. Our destiny hangs between two options: either to complete the triumph of the egalitarian conception of the world, which will bring about the end of history, or to promote a historical regeneration. Nietzsche prophesied that the Earth will eventually belong to either the last man or to the superman. There are no other alternatives.

British Islam and English Law Patrick S. Nash, 2022-01-27 British Islam and English Law presents a novel argument about the nature and place of groups in society. The encounter with Islam has led English law to tread a line between two theoretical models, liberal individualism and multiculturalism, competing for dominance over the law of organised religion. This philosophical rivalry has generated a set of seemingly intractable conflicts between individual and community, religion and state, nation and culture. This book resurrects the long-buried theory of classical pluralism to address and resolve these tensions. Applying this to five understudied institutions that give structure and form to British Islam - banks, charities, schools, elections, clans - it outlines and justifies the reforms that would optimise the relationship between law and religion. Unflinching and unorthodox, this book places law and theory in context, employs innovative methods such as nudge theory

and applied history, and provides detailed answers to hard questions about British Islam.
