This can bring Indonesia to its heyday if the demographic bonus can be used properly. Human development and mastery of science and technology, sustainable economic development, equitable development, and strengthening national resilience and governance are the four pillars in welcoming that era. The first pillar, human development and mastery of science and technology, can be achieved by realizing quality education. Unfortunately, many factors cause the low quality of higher education in Indonesia. The skill gap or skill gap is one of the causes of the non-absorption of college graduates into work. As a result, many graduates are unemployed. It was recorded that in 2021 the number of unemployed in Indonesia was more than 8 million undergraduates, an increase of 26.3% compared to 2020. In addition to skill gaps, low communication and problem-solving abilities, lack of science and technology, digital literacy skills, and teamwork abilities are also recorded as obstacles. However, to start that development, college students must improve their thought. They have to know the problem's surroundings and solve it through research. And this book is a compilation of their study through research.

Child and Youth Agency in Science Fiction Ingrid E. Castro, Jessica Clark, 2019-10-15 Child and Youth Agency in Science Fiction: Travel, Technology, Time intersects considerations about children's and youth's agency with the popular culture genre of science fiction. As scholars in childhood studies and beyond seek to expand understandings of agency in children's lives, this collection places science fiction at the heart of this endeavor. Retellings of the past, narratives of the present, and new landscapes of the future, each explored in science fiction, allow for creative reimaginings of the capabilities, movements, and agency of youth. Core themes of generation, embodiment, family, identity, belonging, gender, and friendship traverse across the chapters and inform the contributors' readings of various film, literature, television, and virtual media sources. Here, children and youth are heterogeneous, and agency as a central analytical concept is interrogated through interdisciplinary, intersectional, intergenerational, and posthuman analyses. The contributors argue that there is vast power in science fiction representations of children's agency to challenge accepted notions of neoliberal agency, enhance understandings of agency in childhood studies, and further contextualize agency in the lives, voices, and

cultures of youth.

Writing Diverse Characters for Fiction, TV or Film Lucy Hay,2017-08-24 We're living in a time of unprecedented diversity in produced media content, with more LGBT characters. more characters of color, more disabled characters, and more characters from various religions or classes. These characters also appear in genre pieces, accessible to the mainstream, instead of being hidden away in so-called worthier pieces, as in the past. This book discusses issues of race, disability, sexuality and transgender people with specific reference to characterization in movies, TV, and novel writing. Using such examples as the film Mad Max: Fury Road and the novel Gone Girl, the book explores how character role function really works. It discusses such questions as the difference between stereotype and archetype, why trope does not mean what Twitter and Tumblr think it means, how the burden of casting affects both box office and audience perception, and why diversity is not about agendas, buzzwords or being politically correct. It also goes into what authenticity truly means, and why research is so important; why variety is key in ensuring true diversity in characterization; and what agents, publishers, producers, filmmakers and commissioners are looking for—and why.

Handbook of Algorithms for Physical Design Automation Charles J. Alpert, Dinesh P. Mehta, Sachin S.

Sapatnekar, 2008-11-12 The physical design flow of any project depends upon the size of the design, the technology, the number of designers, the clock frequency, and the time to do the design. Whitewashing the Movies David C Oh, 2021-10-15 *Whitewashing the Movies* addresses the popular attention of excluding Asian actors from playing Asian characters in film. Including movies such as *Ghost in the Shell* and *Aloha*, media activists and critics have denounced contemporary decisions to cast White actors to play Asians and Asian Americans. The purpose of this book is to theorize the popularly used concept of whitewashing in stories that subjectify White identities at the expense of Asian/American stories and characters.

Violence in Popular Culture Laura L. Finley, 2018-11-09 A comprehensive resource, this book reviews current and historical examples of violence in film, television, radio, music, music videos, video games, and novels. Despite decades of attention and various attempts to enact legislation that limits violence in American popular culture, it remains ubiquitous across films, television, radio, music, music videos, video games, and popular fiction.
