**Education, Religion, and Ethics - A Scholarly Collection** Dianne Rayson, 2023-04-18 This collection draws on research in educational areas displaying best practice pedagogy, theoretical and practical, underpinned by philosophy, empirical science, and neuroscience, among other disciplines. It focusses especially on implications for higher education, school education, professional ethics, and religion. Higher education exploration is on the diminution of the humanities and implications for the range of knowledge needed for future citizenship. The work includes a revisioning of higher education's purpose, especially the changing role of the doctorate and its examination. The focus on school education takes the same pedagogical lens to humanities and social sciences, examining values education and religious studies. Ethical issues include colonisation and decolonisation, especially around the concept of land and ramifications for intercultural studies. The ethics and practice of teaching about life and death issues in medical education are explored in light of research in dialogic consensus. The religion section includes research on interfaith education, especially concerning Islam, and eco-theological education, especially focussed on climate change. Contributors are academic colleagues or former doctoral students of Terence J. Lovat (University Professor, Australia, UK, and Canada) whose internationally acclaimed research straddles these areas. Many of the contributors hold positions of influence in the academic or professional world, while others bring their newly minted doctoral research to the content. The intended readership includes academics and doctoral students across education, ethics, religion, social studies, ecology, health and medicine, indigenous studies, and international affairs. This collection, published in honour of Emeritus Professor Terence Lovat, provides rich insights into the scope and multidisciplinary depth of his scholarship. A philosopher of education whose main work has centred on curriculum theory and values education and ethics in education, Lovat's scholarship reminds us that the education of children and young people must be concerned with more than academic attainment. In emphasising education as a holistic and moral endeavour—one involving hearts and minds—Lovat has consistently advocated for the provision of opportunities for young people to extend their horizons beyond the school environment to engage with issues in society that go beyond academic learning. Professor Lovat has also made a major and longstanding contribution to the development of Studies of Religion in schools and to the theology and history of Islam and Islamic Education. In traversing Lovat's significant and remarkable contributions to education, religion and ethics, and the links between them, this book serves as a testament to a highly esteemed scholar.

**Conflict and Cooperation in the South Caucasus Region** Houman A. Sadri, 2023-12-19 Conflict and Cooperation in the South Caucasus Region: From Theory to Policy combines IR theory and policy in a readable format. Houman A. Sadri discusses the distinctive challenges of the South Caucasus region and offers a survey of relevant IR theories. Armenia, Azerbaijan, and Georgia are covered in-depth since independence. These former Soviet republics have experienced major conflicts and cooperation since independence in the early 1990s. The 2008 Russian invasion of Georgia and the Armenian-Azeri Wars captured headlines and affected markets, but the completion of energy pipelines exposed the complexity of cooperation in connecting the regional and global political economy. Conflict and Cooperation in the South Caucasus Region has three major purposes: 1) To provide a survey of the major developments of the Caucasus States, 2) To analyze the application of IR prominent theories, and 3) To offer practical policy options for policymakers seeking to understand the South Caucasus region. What does the remainder of the 21st Century hold for Armenia, Azerbaijan, and Georgian? Where are the main sources of threats? How can these threats be effectively dealt with?

**American and Muslim Worlds before 1900** John Ghazvinian, Arthur Mitchell Fraas, 2020-02-06 American and Muslim Worlds before 1900 challenges the prevailing assumption that when we talk about American and Muslim worlds, we are talking about two conflicting entities that came into contact with each other in the 20th century. Instead, this book shows there is a long and deep seam of history between the two which provides an important context for contemporary events -- and is also important in its own right. Some of the earliest American Muslims were the African slaves working in the plantations of the Carolinas and Latin America. Thomas Jefferson, a slaveholder himself, was frequently called an infidel and suspected of hidden Muslim sympathies by his opponents. Whether it was the sale of American commodities in Central Asia, Ottoman consuls in Washington, orientalist themes in American fiction, the uprisings of enslaved Muslims in Brazil, or the travels of American missionaries in the Middle East, there was no shortage of opportunities for Muslims and inhabitants of the Americas to meet, interact and shape one another from an early period.

**Europese Unie, Turkije en de Islam** ,2004 Does the fact that the majority of Turkey's population is Muslim form a hindrance to its EU membership? According to a recent policy advice by the Netherlands Scientific Council for Government Policy (WRR), the answer is an adamant 'no'. Why is this issue of Turkish Islam relevant? After all, Turkey should not be judged by standards other than the Copenhagen criteria. The answer is that the public debate outside 'Brussels' will not be limited to these official criteria. Many people in Europe are worried about Turkey's 'Islam factor'. They believe that Muslims are (potentially violent) fundamentalists who want to establish a theocracy. By explicitly examining the role of Turkish Islam and Muslims in Turkey, the WRR wants to contribute to a well-informed European public debate on Turkey's accession.

**Israel and the Neoconservatives** Adam L. Fuller,2019-11-08 For forty years, the neoconservatives have been an influential wing on the American Right. Their critics accuse them of being more loyal to a foreign government than to American interests. But is that true? In this book, the author argues that their support of Israel is rooted just as much in their liberal-democratic priorities.

**Critical Encounters in Secondary English** Deborah Appleman,2023-12-22 Grounded in solid theory with new field-tested classroom activities, the fourth edition of Critical Encounters in Secondary English continues to help teachers integrate the lenses of contemporary literary theory into practices that have always defined good pedagogy. The most significant change for this edition is the addition of Critical Race Theory (CRT) as an analytical lens. CRT offers teachers fresh opportunities for interdisciplinary planning and teaching, as it lends itself to lessons that encompass a variety of disciplines such as history, sociology, psychology, and science. As with the previous edition, each chapter concludes with a list of suggested nonfiction pieces that work well for the particular lens under discussion. This popular text provides a comprehensive approach to incorporating nonfiction and informational texts into the literature classroom with new and revised classroom activities appropriate for today's students. Book Features: Helps both pre- and inservice ELA teachers introduce contemporary literary theory into their classrooms. Offers lucid and accessible explications of contemporary literary theory. Provides dozens of innovative and field-tested classroom activities. Tackles the thorny issue of Critical Race Theory in helpful and practical ways. Praise for the Third Edition "What a smart and useful book! It provides teachers with a wealth of knowledge and material to help their students develop critical perspective and suppleness of thought." —Mike Rose, University of California, Los Angeles "This Third Edition proves that Appleman still has her hand on the pulse of the rapidly changing landscape of education." —Ernest Morrell, Teachers College, Columbia University "This new edition of Deborah Appleman's now classic book demonstrates even more dramatically than previously how the critical theories she so skillfully teaches serve not only as lenses for the reading of literature, but as tools for discovering, interrogating, and challenging injustice, hypocrisy, and the hidden power relations that students are likely to encounter." —Sheridan Blau, Teachers

College, Columbia University

**Civilization** Giovanni Borgognone, Patricia Chiantera-Stutte, 2022-09-29 Civilizations, or rather narratives about civilizations, matter, not only as research subjects in textbooks, literary and scientific essays, but also in politics. This seems to be the case in civilizational states such as China, Russia, Turkey and Syria. Also in Western countries, in recent decades, the notion of civilization has often been used in public discourse: political parties and leaders have referred in particular to the need to protect Western civilization, calling in this regard for policies to restrict immigration from Muslim countries. In 2022 the narrative on civilization was used to legitimize the Russian invasion of Ukraine. The studies in this collected volume reconstruct how civilizational paradigms and narratives have been used to explain political relations, to define the global order, to justify attempts to gain hegemony over particular geopolitical areas, and to make predictions on global developments in specific times of crisis. In particular, this book analyzes the concepts of civilization as they have been used in the intellectual and political discourse in periods particularly critical for global relations and for the consolidation or contestation of the West's dominant role in international, national politics and academic discourse.

**Religious Violence Today** Michael Jerryson, 2020-07-15 Through sections containing overview essays and reference entries related to particular religions, this resource explores the rise of religious violence, hate crime, and persecution around the world. Religious violence and persecution have been growing steadily both within the United States and around the world. Drawing on the expertise of a wide range of scholars, this current and comprehensive reference helps readers understand the persecution of members of particular faiths as well as violence committed by members of those faiths. In doing so, it promotes a greater understanding of the role of religion in global politics, domestic and international terrorism, and religious bigotry. The book contains sections on particular religious traditions from around the world. Each section begins with an overview essay surveying violence related to that particular religion, whether committed by or against members of that faith. Reference entries in each section then provide objective, fundamental information about particular topics related to violence and the religion discussed. The entries provide cross-references and suggestions for further reading, and the work closes with a bibliography of resources for further study.

**Reporting Islam** Jacqui Ewart, Kate O'Donnell, 2018-04-19 Reporting Islam argues for innovative approaches to media coverage of Muslims and their faith. The book examines the ethical dilemmas faced by Western journalists when reporting on this topic and offers a range of alternative journalistic techniques that will help news media practitioners move away from dominant news values and conventions when reporting on Islam. The book is based on an extensive review of international literature and interviews with news media editors, copy-editors, senior reporters, social media editors, in-house journalism trainers and journalism educators, conducted for the Reporting Islam Project. In addition, the use of an original model – the Transformative Journalism Model – provides further insight into the nature of news reports about Muslims and Islam. The

findings collated here help to identify the best and worst reporting practices adopted by different news outlets, as well as the factors which have influenced them. Building on this, the authors outline a new strategy for more accurate, fair and informed reporting of stories relating to Muslims and Islam. By combining an overview of different journalistic approaches with real-world accounts from professionals and advice on best practice, journalists, journalism educators and students will find this book a useful guide to contemporary news coverage of Islam.

*Transatlantic Relations* Donald Abelson, Stephen Brooks, 2022-03-30 This book explains how and why the transatlantic relationship has remained resilient despite persistent differences in the preferences, approaches, and policies of key member states. It covers topics ranging from the history of transatlantic relations, North Atlantic Treaty Organization and security issues, trade, human rights, and the cultural sinews of the relationship, to the impacts of COVID-19, climate change, think tanks, the rise of populism, public opinion, and the triangular relationship between the United States (US), Europe, and China. The book also conceptualizes resilience as a quality arising from myriad forms of interdependence. This interdependence helps shed light on the Atlantic partnership's capacity to withstand serious disagreements, such as those that occurred during the Reagan, George W. Bush, and Trump presidencies. With a principal focus on the US and Europe, the contributors to the volume also employ Canadian case studies to provide a unique and useful corrective. This book will interest all intermediate and senior undergraduate as well as graduate courses on relations between the US and Europe, American foreign policy, and European Union foreign policy. A specialist readership that includes academic and think tank researchers, policy practitioners, and opinion leaders will also benefit from this timely volume.

*Privileged Victims* Eddie Scarry, 2020-02-25 America's worst ideas and people are rising to the top, thanks to a rancid culture that has turned every part of our lives into a fight between so-called "privilege" and entitled brats claiming "victim" status. The country is under siege and America's most ferocious enemy is already here: our privileged victims. On university campuses, in the news media, and in Hollywood, race, gender, and sexuality determine who should advance and who should be taken down a peg. Driven by "social justice" and governed by "intersectionality," out-of-control college students, school administrators, journalists, and titans of the entertainment industry divide and rank us on an infinite scale of grievance—the more of them, the better. And God have mercy on any individual deemed to benefit from "privilege." *Privileged Victims* zealously exposes the lies and myths behind:

- The #MeToo movement that redefined sexual assault and rape to include simple regret, ruining the lives and careers of countless men
- Hoax hate crimes, a key feature of the privileged victim class
- The debate over our jungle-like immigration system, dumbed down by a scheming national news media to ugly charges of racism and xenophobia
- Hollywood, which no longer aims to produce high-quality entertainment, but to virtue signal and promote social justice

And so much more. In gripping detail, Eddie Scarry uncovers the perversion behind social justice and its identity-first dogma that's replacing America's meritocracy, tracing its origins in academia and shining a light on the

havoc it has wrought over the course of three decades. Bewildered citizens mistakenly believe that it's a matter of political correctness gone too far or the ailing symptoms of a country that has grown too sensitive. The truth is much worse: it's a deliberate, malignant reorganization of American life and the replacement of merit with mediocrity is the ultimate destination. "How did everyone in America get so unhappy all of a sudden? In part, because it pays. Eddie Scarry lays out the scam in this infuriating and fascinating book. It'll make you never want to complain again, just for the sake of being countercultural." —Tucker Carlson, Host of "Tucker Carlson Tonight" on Fox News and Author of Ship of Fools What I love about Eddie is his courage. He knows the outrage mob is constantly coming and he doesn't care. Some of us call that being a First Amendment advocate. Count me as a fan and a reader.—Megyn Kelly

Religious Ideology and the Roots of the Global Jihad J. Turner, 2014-08-26 The events of 9/11 prompted questions as to the origins, nature and purpose of international jihadist organisations. In particular, why had they chosen to target the US and the West in general? Turner's book provides a unique, holistic insight into these debates, taking into account historical perceptions and ideology as key factors.

**Investing in Cultural Diversity and Intercultural Dialogue** Unesco, 2009-01-01 This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

**Global Challenges in the Arctic Region** Elena Conde, Sara Iglesias Sánchez, 2016-08-05 Bringing together interconnected discussions to make explicit the complexity of the Arctic region, this book offers a legal discussion of the ongoing territorial disputes and challenges in order to frame their impact into the viability of different governance strategies that are available at the national, regional and international level. One of the intrinsic features of the region is the difficulty in the determination of boundaries, responsibilities and interests. Against this background, sovereignty issues are intertwined with environmental and geopolitical issues that ultimately affect global strategic balances and international trade and, at the same time, influence national approaches to basic rights and organizational schemes regarding the protection of

indigenous peoples and inhabitants of the region. This perspective lays the ground for further discussion, revolving around the main clusters of governance (focusing on the Arctic Council and the European Union, with the particular roles and interest of Arctic and non-Arctic states, and the impact on indigenous populations), environment (including the relevance of national regulatory schemes, and the intertwinement with concerns related to energy, or migration), strategy (concentrating in geopolitical realities and challenges analysed from different perspectives and focusing on different actors, and covering security and climate change related challenges). This collection provides an avenue for parallel and converging research of complex realities from different disciplines, through the expertise of scholars from different latitudes.

It makes use of the levels of analysis framework and boxed features to highlight connections between theory and practice, aspirations and reality and history and contemporary events. The Liberal Way of War Robert P. Barnidge, Jr., 2016-03-03 Examining some of the huge challenges that liberal States faced in the decade after 11 September 2001, the chapters in this book address three aspects of the impact of more than a decade of military action. This book begins by considering four different expressions of universalist moral aspirations, including the prohibition of torture, and discusses migration and 'responsibility to protect,' as well as the United Nations Human Rights Committee's Concluding Observations about security and liberty in the last decade. International humanitarian law and the problems posed by the territorial character of war and the effects of new technologies and child soldiers are also analysed. Finally, Islamic law and its interface with international law is considered from a new perspective, and contributions in this final part offer a different way of thinking about an authentically Islamic modernisation that would

be compatible with Western models of political order. With contributions from international lawyers from diverse backgrounds, this book fills an important gap in the literature on the themes of international human rights law, international humanitarian law and Islamic law.

**Statebuilding and Intervention** David Chandler, 2014-05 This edited book sets out and engages with some of the key policies, practices and paradigms of external intervention in the case of state support and reconstruction. Many assumptions about statebuilding have been reconsidered in the wake of Iraq, and ongoing problems in other states such as Afghanistan, Bosnia and Kosovo. Rather than being a regional survey or a policy-orientated 'lessons learned' book, this collection explores the broader framing of policy goals, statebuilding practices and the consensus on the need for Western states and international institutions to be engaged in this policy area. The volume is divided into three parts: the first engages with some of the key policy frameworks and conceptual issues raised by recent statebuilding interventions; the second considers core statebuilding practices; and the third reconsiders statebuilding paradigms more broadly. The essays open up debate and critical discussion in the field at a time when many advocates of extending statebuilding intervention suggest that the complex nature of the problems of non-Western states and societies mean that it will inevitably be contradictory and limited in its results.

**Belarus** Andrew Wilson, 2012-01-03 This book is the first in English to explore both Belarus's complicated road to nationhood and to examine in detail its politics and economics since 1991, the nation's first year of true independence. Andrew Wilson focuses particular attention on Aliaksandr Lukashenka's surprising longevity as president, despite human rights abuses and involvement in yet another rigged election in December 2010. Wilson looks at Belarusian history as a series of false starts in the medieval and pre-modern periods, and at the many rival versions of Belarusian identity, culminating with the Soviet Belarusian project and the establishment of Belarus's current borders during World War II. He also addresses Belarus's on-off relationship with Russia, its simultaneous attempts to play a game of balance in the no-man's-land between Russia and the West, and how, paradoxically, Belarus is at last becoming a true nation under the rule of Europe's last dictator.

Religion Today Ross Aden, 2012-10-18 Introduces students to key concepts in religious studies through a compelling problem-solving framework. This new textbook features the following: dynamic case studies opening each chapter that teach critical thinking skills and engage students in contemporary religious issues such as the intersection of science and religion; a wide range of examples from world religions throughout the text; clear introductions to classic and contemporary theories of religion, both Eastern and Western; [and] chapter summaries that include essential concepts, a list of key terms, and questions for individual reflection or class discussion. Religion today guides students in understanding the complex role that religion plays in the world, while also building a solid foundation in both religious studies and problem-solving skills--
