Carving a Niche Luz María Hernández Sáenz, 2018-02-21 The beginning of the Mexican War of Independence in 1810 triggered radical political, social, and economic changes, including the reorganization of the medical profession. During this tumultuous period of transition, physicians and surgeons merged in an effort to monopolize the field and ensure their professional survival in a postcolonial, liberal republic. *Carving a Niche* traces the evolution of various medical occupations in Mexico from the end of the colonial period to the beginning of the regime of Porfirio Díaz, demonstrating how competition and collaboration, identity, ever-changing legislation, political instability, and foreign intervention resulted in a complex, gradual, and unique process of medical professionalization – one that neither conformed to theoretical models nor resembled hierarchies found in other parts of the world. Through extensive research, Luz María Hernández Sáenz analyzes the uphill struggle of practitioners to claim their place as public health experts and to provide and control medical education in the face of seemingly insurmountable odds. Highlighting the significance of race, class, gender, and nationality, *Carving a Niche* demonstrates that in the case of Mexico, liberal reforms praised by traditional works often hindered, rather than promoted, the creation of a modern medical profession and the delivery of quality health care services.

El polímata Peter Burke,2022-04-28 Los polímatas son los sabios o eruditos en distintas materias, que han realizado aportaciones innovadoras o relevantes en distintos campos. Desde Leonardo da Vinci hasta John Dee y Comenio, desde George Eliot hasta Oliver Sacks y Susan Sontag, los polímatas han ensanchado las fronteras del saber de innumerables formas. Pero la historia puede ser desagradecida con los eruditos que hacen gala de unos intereses tan enciclopédicos. Demasiado a menudo esas personas son recordadas por sus valiosos logros únicamente en un ámbito. El renombrado historiador cultural Peter Burke presenta sus argumentos a favor de una visión más equilibrada. Burke identifica a 500 polímatas occidentales, entre los que también hay españoles, explora sus éxitos en una amplia gama de ámbitos, y muestra cómo su ascenso coincidió con un rápido crecimiento del saber en la época de la invención de la imprenta, del descubrimiento del Nuevo Mundo y de la Revolución Científica. La ulterior aceleración del saber, que ha dado lugar a un aumento de la especialización y a un entorno que no alienta la existencia de los eruditos y de los científicos polifacéticos, no ha tenido lugar hasta una época bastante reciente. Desde el Renacimiento a la actualidad, Burke cambia nuestra forma de entender esta extraordinaria especie intelectual; lanzando un canto a la interdisciplinaridad, a cómo mejora el conocimiento cuando somos capaces de escapar de los estrechos límites de cada disciplina y evitar la excesiva especialización del mundo moderno, tratando de poner en conexión saberes y materias distintas.
