Quotes for Nasty Women Linda Picone, 2017-09-05 Nasty women, unite—and read this compendium of fascinating quotations about powerful women through history. “My passions were all gathered together like fingers that made a fist. Drive is considered aggression today. I knew it then as purpose.” —Bette Davis When Donald Trump referred to Hillary Clinton as “such a nasty woman” during the last presidential debate in 2016, women everywhere felt a jolt of recognition—whatever their politics or feelings about Clinton. In response, they promptly turned his insult into an empowering slogan. This book celebrates the now-ironic phrase with a collection of quotations by and about strong women, both critical and positive. The words come from figures in ancient history like Cleopatra; founding mothers like Mary Wollstonecraft and Elizabeth Cady Stanton; feminist icons such as Gloria Steinem and Betty Friedan; politicians and government leaders; groundbreakers in arts and culture; celebrities; and the mothers, daughters, and sisters at home.

A Little Book Of Random Quotes Kurt Vogler, 2015-11-30 A collection of over 500 light hearted and inspirational quotes, spanning four millenia of wisdom from some of history's greatest minds.

Rita Levi-Montalcini Lisa Yount, 2009 As a woman growing up in early 20th-century Italy, Rita Levi-Montalcini was expected to marry, not pursue an education. Against the objections of her father, she attended Turin School of Medicine, graduating with honors as an M.D. But her hopes of an academic position vanished with the fascist Italian government's

persecution of the Jews in the late 1930s and early 1940s. At the risk of her own life, Levi-Montalcini continued studying how the body's nervous system develops and discovered the nerve growth factor, a protein that controls the growth of neurons and is required for their survival. Building upon her findings, she and a host of other researchers unearthed a whole class of compounds that are intimately involved in every stage of a cell's or an organism's life, from conception to death. Today, scientists are still exploring the implications of her work, from cancer treatments to Alzheimer's disease management to research on birth defects, and more. As Rita Levi-Montalcini shows, this woman's incredible persistence and faith in herself allowed her to persevere through tough opposition and earn a Nobel Prize in Physiology or Medicine in 1986.

Rita Levi-Montalcini: Pioneer and Ambassador of Science Francesca Valente, "My experience in childhood and adolescence of the subordinate role played by the female in a society run entirely by men had convinced me that I was not cut out to be a wife."—Rita Levi-Montalcini Self-assured from an early age, Rita knew that she was cut out for a number of other roles and the difference she could make in the lives of others. Prevailing over her father's traditional values, Rita attended medical school and continued to study the development of the nervous system after graduating. But as a Jew in fascist Italy, her work came to a halt with discriminatory race laws and again later, when she was forced into hiding from the Nazis. In a makeshift lab built from black-market items, Rita continued her research in a small space she shared with her family. Rita's courage to accept a fellowship in the United States when she didn't speak the language was repaid when her six-month stay stretched into thirty-three years. When, at seventy-seven years old, she and Stanley Cohen won the Nobel Prize for their discovery of nerve growth factor—now used in search of cures for Alzheimer's and Parkinson's diseases—Rita felt like her life was just beginning. Over the next two decades, she spoke around the globe as an ambassador for science and humanitarianism and accomplished more than most do during an entire lifetime.

Post-Cold War Predictions Hanna Samir Kassab, 2024-02-20 Post-Cold War Predictions examines how the international order evolved after the collapse of the Soviet Union (and before the attacks on 9/11) by focusing on the ways we study and understand major powers' security behavior within the evolving multipolar order. Beginning with an overview of Post-Cold War literature, Kassab summarizes and evaluates influential Post-Cold War texts to better understand scholarship's need to predict. First, he discusses the central importance of power in international relations and drives home the central focus of international structures, linking findings to the broader structure-agent problem. He then reinterprets the purpose of theory, preferring explanatory theories to those that aim to predict outcomes. To understand the context by which political ideas were developed and followed as if they were political ideologies, Hanna Samir Kassab makes explicit the links between historicism and historiography, forwarding a new methodology for studying political science: Politicist analysis. Using simple jargon and defining terms where necessary, this succinct and enlightening text is required reading for all those interested in international politics.

Preserving Brain Health in a Toxic Age Arnold R. Eiser, 2021-10-11 Learn how to reduce the impact of environmental toxins on brain development, functioning, and health. The human brain is a marvelously complex organ that has evolved great new capabilities over the past 250,000 years. During most of that period, daily life was vastly different from our lives today. Exercise was not optional - one literally had to run for one's life, livelihood, and sustenance. The Stone Age diet was not a fad, but the only food available. Periods of fasting arose from food scarcity, and hence the earliest keto-diet was commonplace. Life changed greatly with the advent of agriculture and industry. Diseases that were previously unknown or uncommon began to surface as by-products of civilization's advance. Changes in our ways of living have altered the nature of illness as well as its diagnosis and treatment. From the 1970s to the present, tens of thousands of chemicals with applications in all aspects of our lives have grown more than 40-fold. Exposure to these new substances has impacted many aspects of our health, especially the delicate parts of the brain and nervous system. In parallel with the changes in our environment, we have seen the growth of brain disorders including Alzheimer's Disease and autism in previously unimaginable ways. Here, Arnold Eiser elucidates some features of diseases affecting the nervous system that are increasing in incidence with a focus on those disorders that appear related to environmental toxins that modern life has introduced. He takes readers behind the scenes of the science itself to discover the human stories involved in the discovery and management of these illnesses. Offering insights from a variety of scientific disciplines, Eiser clearly and succinctly illustrates the impact of toxins on our brains and how we might better protect ourselves from negative outcomes. With interviews from leading authorities in the field of neuroscience, environmental toxicology, integrative medicine, neurology, immunology, geriatrics, and microbiology (re the gut microbiome), this book offers a robust understanding of the complex threats to our brains, and the healthy brain's dependence upon many other systems within our bodies. This is a voyage of discovery into the science, history, and human struggle regarding disorders challenging the brain as well as their possible prevention.

Public History, Private Stories Graziella Parati, 1996 In this important volume, Graziella Parati examines the ways in which Italian women writers articulate their identities through autobiography - a public act that is also the creation of a private life. Considering autobiographical writings by five women writers from the seventeenth century to the present, Parati draws important connections between self-writing and the debate over women's roles, both traditional and transgressive. Parati considers the first prose autobiography written by an Italian woman - Camilla Faa Gonzaga's 1622 memoir - as her beginning point, citing it as a central pre-text. Parati then examines the autobiographies of Enif Robert, Fausta Cialente, Rita Levi Montalcini, and Luisa Passerini. Through her discussion of these women's writings, she demonstrates the complex negotiations over identity contained within them, negotiations that challenge dichotomies between male and female, maternal and paternal, and private and public. *Public History, Private Stories* is a compelling exploration of the disparate identities created by these women through the act of writing autobiography.

The Baltimore Case: A Trial of Politics, Science, and Character Daniel J. Kevles, 2000-01-17 You read with a rising sense of despair and outrage, and you finish it as if awakening from a nightmare only Kafka could have conceived.--Christopher Lehmann-Haupt, New York Times David Baltimore won the Nobel Prize in medicine in 1975. Known as a wunderkind in the field of immunology, he rose quickly through the ranks of the scientific community to become the president of the distinguished Rockefeller University. Less than a year and a half later, Baltimore resigned from his presidency, citing the personal toll of fighting a long battle over an allegedly fraudulent paper he had collaborated on in 1986 while at MIT. From the beginning, the Baltimore case provided a moveable feast for those eager to hold science more accountable to the public that subsidizes its research. Did Baltimore stonewall a legitimate government inquiry? Or was he the victim of witch hunters? The Baltimore Case tells the complete story of this complex affair, reminding us how important the issues of government oversight and scientific integrity have become in a culture in which increasingly complicated technology widens the divide between scientists and society.

The Successful Woman Joyce Brothers, 1988

Life's a Pooch Boze Hadleigh, 2017-11-21 Life's a Pooch is, pardon the expression, catnip for dog lovers. Its five riveting chapters comprise hundreds of celebrity quotes and anecdotes about everyone's best friend. By turns funny, touching, surprising, and informative, it embraces every aspect of the human-dog bond and explores our furry companions' sometimes baffling world and celebrates their impact on ours. Those quoted range from animal superheroes Betty White and Doris Day to Leonardos da Vinci and DiCaprio to dog trainers, Lassie costars, singers and actors, presidents, Walt Disney, and Martha Stewart--to name a few! Did you know that . . . Comparing canines with people, Marilyn Monroe once said, "A dog will never tell you to shut up"? Aldous Huxley explained the pooch's popularity: "To his dog, every man is Napoleon," while President Harry Truman advised, "If you want a friend in Washington, get a dog"? For Renee Zellweger, "Finding exactly the right dog is a lot like falling in love"? Peanuts creator Charles M. Schulz felt, "Happiness is a warm puppy"? And singer Adele is happy to be "my dog's best friend"? Poignant, silly, and heart-warming, *Life's a Pooch* is a must-have for every dog lover!

Art fora de l'aula Camps, Teresa,2020-09-25 La presència d'obres d'art en el nou recinte universitari potser no estava prevista ni en els plans arquitectònics ni tampoc en l'ideari que els acompanyava. Segur que no. I la nova Universitat va començar a caminar sense haver pogut acabar la major part de la construcció dels seus espais ni haver previst cap escultura en el seu gran jardí. No obstant això, l'art s'hi va fer present de forma natural i gairebé silenciosa. Jo diria que va trobar la manera d'infiltrar-s'hi, no hi va renunciar. De la mà d'artistes, alumnes i alguns professors, a poc a poc l'art va anar trobant el lloc propi i compartit en diversos espais del campus, als passadissos, en alguna aula, en un racó esdevingut sala d'exposicions, fins al punt que ara mateix, si no hi fos, es trobaria a faltar. Ha estat així de forma natural, amb llibertat, amb silenci, però també amb convicció, amb propostes ben diverses però irreversibles, discretament i amb la complicitat de la comunitat universitària que, en correspondència a l'acte generós dels artistes, en té cura i respecte.
