A Sesquicentennial History of Iowa State University John R. Anderson,2007-01-23 As centerpiece to its sesquicentennial celebration in 2007-08, Iowa State University has commissioned a book to record, for the first time, the events and themes of the second half of the 20th century. Emphasizing the years from 1940-2000, this book builds on an earlier history of the University by Earle Ross. The authors, familiar with (knowledgeable about) ISU and expert in their subject area, have meticulously researched and skillfully written ten chapters that treat specific decades, particular administrations, or key topics of interest. Written in a lively narrative style, this anthology encompasses a wealth of information. The authors have focused on appealing to the largest possible audience of Iowa State University supporters and well-wishers: alumni, faculty and staff, and fans throughout the state of Iowa. Some will want to read it from cover to cover; others will dip in to relive their years on campus or to pursue a favorite topic like student life or athletics. To enhance the historical narrative, entertaining vignettes about students, faculty and administrative leaders, and alumni appear throughout the book. Generously illustrated with black-and-white photographs, this book invites casual browsing. Its attractive design increases visual appeal by using a clean, open layout and readable type. To ensure its value as a gift book, a handsome full-color jacket and 8x 11 format make it suitable for coffee table display wherever loyal Iowa Staters gather. Part 1 contains 4 chapters, leading off with a survey of the major developments of Iowa State College's first 80 years, followed by a chronological approach to the years from 1940 forward that highlights presidential administrations. Part 2 broadens the book's coverage with 6 chapters telling the ISU story from the perspective of topics such as the physical landscape of campus, the national and international impacts of the University, and Iowa State athletics through the years. This broad-brushed overview of ISU history is rich with detail yet emphasizes the grand themes that defined the nation's first land-grant university.

This book covers the applications of various big data analytics, artificial intelligence, and machine learning technologies in smart grids for demand prediction, decision-making processes, policy, and energy management. The book delves into the new technologies for modern power systems such as the Internet of Things, Blockchain for smart home and smart city solutions in depth. Technical topics discussed in the book include: • Hybrid smart energy system technologies • Smart meters • Energy demand forecasting • Use of different protocols and communication in smart energy systems • Power quality and allied issues and mitigation using AI • Intelligent transportation • Virtual power plants • AI based smart energy business models • Smart home solutions • Blockchain solutions for smart grids.

Building Route 128 Yanni Kosta Tsipis, David Kruh, 2003 Route 128 traces its origins to the late 1920s, when the Massachusetts Department of Public Works cobbled together a makeshift network of existing roads through Boston's suburbs. Between 1947 and 1956, during a statewide push to build new highways, Route 128 was reconstructed as a major regional expressway. The new highway immediately fueled explosive growth in many of the region's once bucolic suburbs. What was once the road to nowhere quickly became a major commercial nexus for eastern Massachusetts and a critical link in the region's highway network. The visionary highway project vigorously promoted by William F. Callahan permanently altered the character of the two dozen towns through which it passed. Building Route 128 vividly documents the highway's construction and its impact on towns such as Waltham, Dedham, Lynnfield, and Gloucester. Drawing on previously unpublished images from the Massachusetts Department of Public Works and archives from many of the cities and towns affected, Building Route 128 tells the story of a region forever changed by the highway's construction.
