

Taboo Brothers And Sisters

Mike Jess

Siblings C. Dallett Hemphill, 2014 Based on a wealth of family papers, period images, and popular literature, this is the first book devoted to the broad history of sibling relations in America. Illuminating the evolution of the modern family system, *Siblings* shows how brothers and sisters have helped each other in the face of the dramatic political, economic, and cultural changes of the eighteenth and nineteenth centuries. As Hemphill demonstrates, siblings function across all races as humanity's shock-absorbers as well as valued kin and keepers of memory.

Brothers and Sisters Ann Buchanan, Anna Rotkirch, 2020-12-09 This edited volume presents unique insights on sibling relationships in adulthood in the early 21st century, focusing on three themes: relations beyond childhood and school years; factors shaping social support provision between siblings; and changes in family life and how these impact sibling relations. Comprised of chapters from distinguished international family scholars, this book examines sibling dynamics across age, race, culture, gender, sexual orientation, geography, and social environments. It answers important questions such as, to what extent do siblings support each other at different stages of the life cycle? How do cultural practices and family obligations impact on sibling support? How does sibling support differ when looking at surrogates, migrant families, polygamous families, and siblings with disabilities? These contributions expand and contribute greatly to the field of sibling studies and will be of interest to all students and scholars studying and researching family relationships.

Transgressive Sex Hastings Donnan, Fiona Magowan, 2009-02-01 Sex is often regarded as a dangerous business that must be rigorously controlled, regulated, and subjected to rules. Sexual acts that defy acceptable practices may be seen as variously defiling, immoral, and even unnatural. They may challenge and subvert both cultural preconceptions and the social order in a politics of sexual transgression that threatens to transform permissible boundaries and restructure bodily engagements. This collection of essays explores acts of sexual transgression that have the power to reconfigure perceptions of bodily intimacy and the social norms of interaction. Considering issues such as domestic violence, child prostitution, health and sex, teenage sex, and sex with animals across a range of settings from contemporary Oceania, the Pacific, South Africa, and southeast Asia to Euro-America, this book should interest all those who question the naturalness of sex, including public health workers, clinical practitioners and students of sex, sexuality, and gender in the humanities and social sciences.

Strangers in the House William R. Beer, 2017-07-28 If present trends in divorce and remarriage continue, before the

end of the century the stepfamily will outnumber all other types of family in the United States. In 1980 one out of five children under the age of eight were living in stepfamilies, and there were at least two million households in which the children were related only by marriage (stepsiblings) or who shared only one parent in common (half-siblings). How are these new kinds of family relationships working out? In particular, how are children faring in these kinds of families? There are a number of books on the successes and difficulties of second marriages that involve children, but most of these look at problems from the perspective of one or both spouses. Popular literature in particular had emphasized the problem of the new spouse who 'inherits a family,' without really focusing on the relationships among stepsiblings. *Strangers in the House* focuses on the children of these marriages- both stepsiblings and half-siblings, and the relationships among them with the parents. It is a report on how they are faring, drawn from the results of original research by the author: case studies of stepfamilies, interviews with stepsiblings and half-siblings, a survey of members of the Stepfamily Association of America, and participation in three step family self-help groups. The result is a vivid portrait of nontraditional family constellations that provides an overview of changes in American families, the increased divorce and remarriage rates, and how stepfamilies differ from other families. Beer identifies major problem areas in stepsibling relations and shows how youngsters are adapting to these special situations. He examines classic rivalries over love, attention, space, and property shows how these are worked out within these special circumstances. The book concludes with an overview of the dynamics of sibling relations in these special families and analyzes how the stepsibling subsystem fits into the large

Inside Cultures William Balée, 2021-08-17 This concise, contemporary option for instructors of cultural anthropology breaks away from the traditional structure of introductory textbooks. Emphasizing the interaction between humans and their environment, the tension between human universals and cultural variation, and the impacts of colonialism on traditional cultures, *Inside Cultures* shows students how cultural anthropology can help us understand the complex, globalized world around us. This third edition: contains brand new material on many subjects, including anthropological approaches to anti-racism social movements in the Global North during 2020; includes findings in anthropological research regarding the Covid-19 pandemic, and its relation to other recent global events and conditions; updates the organization and presentation of cultural universals and cultural variations; presents updated and enhanced discussions of anthropological studies of humankind and the environment, with expanded analysis of industrial agriculture in the age of globalization; includes more illustrations and updates to existing illustrations, sidebars, and guideposts throughout the volume; is written in clear, supple prose that delights readers while informing on content of one of the important courses in a liberal arts education, one that effectively bridges humanities and the sciences.

Mountain Arapesh Margaret Mead, 2018-10-24 For approximately eight months during 1931-1932, anthropologist Margaret Mead lived with and studied the Mountain Arapesh-a segment of the population of the East Sepik Province, Papua

New Guinea. She found a culture based on simplicity, sensitivity, and cooperation. In contrast to the aggressive Arapesh who lived on the plains, both the men and the women of the mountain settlements were found to be, in Mead's word, maternal. The Mountain Arapesh exhibited qualities that many might consider feminine: they were, in general, passive, affectionate, and peaceloving. Though Mead partially explains the male's femininity as being due to the type of nourishment available to the Arapesh, she maintains social conditioning to be a factor in the type of lifestyle led by both sexes. Mead's study encapsulates all aspects of the Arapesh culture. She discusses betrothal and marriage customs, sexuality, gender roles, diet, religion, arts, agriculture, and rites of passage. In possibly a portent for the breakdown of traditional roles and beliefs in the latter part of the twentieth century, Mead discusses the purpose of rites of passage in maintaining societal values and social control. Mead also discovered that both male and female parents took an active role in raising their children. Furthermore, it was found that there were few conflicts over property: the Arapesh, having no concept of land ownership, maintained a peaceful existence with each other. In his new introduction to *The Mountain Arapesh*, Paul B. Roscoe assesses the importance of Mead's work in light of modern anthropological and ethnographic research, as well as how it fits into her own canon of writings. Roscoe discusses findings he culled from a trip to Papua New Guinea in 1991 to clarify some ambiguities in Mead's work. His travels also served to help reconstruct what had happened to the Arapesh since Mead's historic visit in the early 1930s.

Remembering Victoria James M. Taggart, 2007-12-01 On October 15, 1983, a young mother of six was murdered while walking across her village of Huitzilán de Serdán, Mexico, with her infant son and one of her daughters. This woman, Victoria Bonilla, was among more than one hundred villagers who perished in violence that broke out soon after the Mexican army chopped down a cornfield that had been planted on an unused cattle pasture by forty Nahuatl villagers. In this anthropological account, based on years of fieldwork in Huitzilán, James M. Taggart turns to Victoria's husband, Nacho Angel Hernández, to try to understand how a community based on respect and cooperation descended into horrific violence and fratricide. When the army chopped down the cornfield at Talcuaco, the war that broke out resulted in the complete breakdown of the social and moral order of the community. At its heart, this is a tragic love story, chronicling Nacho's feelings for Victoria spanning their courtship, marriage, family life, and her death. Nacho delivered his testimonio to the author in Nahuatl, making it one of the few autobiographical love stories told in an Amerindian language, and a very rare account of love among the indigenous people of Mesoamerica. There is almost nothing in the literature on how a man develops and changes his feelings for his wife over his lifetime. This study contributes to the anthropology of emotion by focusing on how the Nahuatl attempt to express love through language and ritual.

The Metamorphoses of Kinship Maurice Godelier, 2012-03-03 With marriage in decline, divorce on the rise, the demise of the nuclear family, and the increase in marriages and adoptions among same-sex partners, it is clear that the structures of

kinship in the modern West are in a state of flux. In *The Metamorphoses of Kinship*, the world-renowned anthropologist Maurice Godelier contextualizes these developments, surveying the accumulated experience of humanity with regard to such phenomena as the organization of lines of descent, sexuality and sexual prohibitions. In parallel, Godelier studies the evolution of Western conjugal and familial traditions from their roots in the nineteenth century to the present. The conclusion he draws is that it is never the case that a man and a woman are sufficient on their own to raise a child, and nowhere are relations of kinship or the family the keystone of society. Godelier argues that the changes of the last thirty years do not herald the disappearance or death agony of kinship, but rather its remarkable metamorphosis—one that, ironically, is bringing us closer to the traditional societies studied by ethnologists.

The Tapestry of Culture Abraham Rosman, professor emeritus, Barnard College, Columbia University, Paula G. Rubel, professor emerita, Barnard College, Columbia University, Maxine Weisgrau, Barnard College, Columbia University, 2017-01-12 *Tapestry of Culture* provides students with the tools needed to encounter different cultures—one of the most exciting elements of anthropology. The tenth edition incorporates new material throughout, such as ethnographic examples in every chapter; strengthened discussions of gender, transnationalism, and globalization; and more.

The Sibling Effect Jeffrey Kluger, 2011-09-15 A senior writer at *Time* magazine explores what scientists and researchers are discovering about sibling bonds, the longest-lasting relationships we have in our lives. Nobody affects us as deeply as our brothers and sisters—not parents, not children, not friends. From the time we-and they-are born, our siblings are our collaborators and co-conspirators, our role models and cautionary tales. They teach us how to resolve conflicts and how not to, how to conduct friendships and when to walk away. Our siblings are the only people we know who truly qualify as partners for life. In this groundbreaking book, renowned science writer Jeffrey Kluger explores the complex world of siblings in a way that is equal parts science, psychology, sociology, and memoir. Based heavily on new and emerging research, *The Sibling Effect* examines birth order, twin studies, genetic encoding of behavioral traits, emotional disorders and their effects on-and effects from-sibling relationships, and much more. With his signature insight and humor, Kluger takes big ideas about siblings and turns them into smart, accessible writing that will help anyone understand the importance of siblings in our lives.

Chaucer's Gifts Robert Epstein, 2018-02-01 *Chaucer's Gifts* applies the theoretical approaches of economic anthropology to the *Canterbury Tales*, to show that in Chaucer's world the exchange of gifts is as prevalent as the purchase of commodities, and that social relations are as important as money and the market.

Going the Whiteman's Way David McKnight,2004 Modern anthropologists, unlike their classical predecessors, have observed Australian Aborigines in the field, rather than from the study. None, however, has spent as long as David McKnight in a single community. During a period of 35 years, involving some 20 fieldtrips, he has lived with the Mornington Islanders of northern Queensland for over five years. This intellectual tour de force combines dense ethnography about Australian kinship and marriage - the heart of their world - with major anthropological debate about theories of kinship. It thereby provides a unique and important contribution to kinship studies. McKnight shows how young Aborigines became increasingly determined to marry according to their own inclinations, defying the authority of the elders, who accused them of 'going the Whiteman's Way'.

In God's Image Matthew Akim Tomlinson,2009-03-10 Today, most indigenous Fijians are Christians, and the Methodist Church is the foundation of their social and political lives. Yet, as this thought-provoking study of life on rural Kadavu Island finds, Fijians also believe that their ancestors possessed an inherent strength that is lacking in the present day. Looking in particular at the interaction between the church and the traditional chiefly system, Matt Tomlinson finds that this belief about the superiority of the past provokes great anxiety, and that Fijians seek ways of recovering this strength through ritual and political action—Christianity itself simultaneously generates a sense of loss and the means of recuperation. To unravel the cultural dynamics of Christianity in Fiji, Tomlinson explores how this loss is expressed through everyday language and practices.
