**The Life and Times of Ward Kimball** Todd James Pierce,2019-01-17 Besides Walt Disney, no one seemed more key to the development of animation at the Disney Studios than Ward Kimball (1914-2002). Kimball was Disney's friend and confidant. In this engaging, cradle-to-grave biography, award-winning author Todd James Pierce explores the life of Ward Kimball, a lead Disney animator who worked on characters such as Mickey Mouse, Donald Duck, Jiminy Cricket, the Cheshire Cat, and the Mad Hatter. Through unpublished excerpts from Kimball's personal writing, material from unpublished interviews, and new information based on interviews conducted by the author, Pierce defines the life of perhaps the most influential animator of the twentieth century. As well as contributing to classics such as Snow White and the Seven Dwarfs and Pinocchio, from the late 1940s to the early 1970s, Kimball established a highly graphic, idiosyncratic approach to animation alongside the studio's more recognizable storybook realism. In effect, Ward Kimball became the only animator to run his own in-studio production team largely outside of Walt Disney's direction. In the 1950s and 1960s, he emerged as a director and producer of his own animation, while remaining inside Disney's studio. Through Kimball, the studio developed a series of nonfiction animation programs in the 1950s that members of Congress pointed to as paving the way for NASA. The studio also allowed Kimball's work to abandon some ties to conventional animation, looking instead to high art and graphic design as a means of creating new animated forms, which resulted in films that received multiple Academy Award nominations and two awards. Throughout his life, Kimball was a maverick animator, an artist who helped define the field of American animation, and a visionary who sought to expand the influence of animated films.

Walt Disney and the Quest for Community Steve Mannheim,2016-02-24 During the final months of his life, Walt Disney was consumed with the world-wide problems of cities. His development concept at the time of his death on December 15th, 1966 would be his team's conceptual response to the ills of the inner cities and the sprawl of the megalopolis: the Experimental Prototype Community of Tomorrow or, as it became known, EPCOT. This beautifully written, instantly engrossing volume focuses on the original concept of EPCOT, which was conceived by Disney as an experimental community

of about 20,000 people on the Disney World property in central Florida. With its radial plan, 50-acre town center enclosed by a dome, themed international shopping area, greenbelt, high-density apartments, satellite communities, monorail and underground roads, the original EPCOT plan is reminiscent of post-war Stockholm and the British New Towns, as well as today's transit-oriented development theory. Unfortunately, Disney himself did not live long enough to witness the realization of his model city. However, EPCOT's evolution into projects such as the EPCOT Center and the town of Celebration displays a remarkable commitment by the Disney organization to the original EPCOT philosophy, one which continues to have relevance in the fields of planning and development.

*Redeeming Culture* James Gilbert, 2008-04-15 In this intriguing history, James Gilbert examines the confrontation between modern science and religion as these disparate, sometimes hostile modes of thought clashed in the arena of American culture. Beginning in 1925 with the infamous Scopes trial, Gilbert traces nearly forty years of competing attitudes toward science and religion. Anyone seriously interested in the history of current controversies involving religion and science will find Gilbert's book invaluable.—Peter J. Causton, Boston Book Review *Redeeming Culture* provides some fascinating background for understanding the interactions of science and religion in the United States. . . . Intriguing pictures of some of the highlights in this cultural exchange.—George Marsden, *Nature* A solid and entertaining account of the obstacles to mutual understanding that science and religion are now warily overcoming.—Catholic News Service [An] always fascinating look at the conversation between religion and science in America.—Publishers Weekly

*After Apollo* J Bret Bennington, Rodney F. Hill, 2023-06-13 This book explores how NASA's space program impacted American society and culture during and after the race to the Moon, looking back at the 1969 Apollo 11 Moon landing from the perspective of the present day.

*Secret History* Nick Redfern, 2015-04-20 A guide to the hidden mysteries and secrets of the world from an established author and expert on conspiracies, the unexplained, and the paranormal! History is written by the winners—and the powerful—but how much of it is fiction? And who is really in control today? From the dawn of civilization to the 21st century, from ancient aliens to the New World Order, *Secret History: Conspiracies from Ancient Aliens to the New World Order* examines, explores, and uncovers the hidden, overlooked, and buried history of civilization. The book moves from biblical, Egyptian, Mayan, Greek, and early mysteries of antiquity to the clandestine doings of the Nazis and the Masons and assassination plots of the more recent past to the surveillance, monitoring, mind-control, and secret schemes of today. Researcher Nick Redfern investigates the stories, mythologies, lore behind incredible events and clandestine groups of yesterday and today. More than 60 entries dig deep into the manipulation of events by influential groups, including ... Historical riddles—revealing, alien visitations, space gods, human-alien crossbreeding, and more. Government cover

ups—exposing, mind control, murders, scientists' research, secret agents' agendas, and more. Powerful groups and intended consequences—illuminating, 9-11, new world order, bird-flu, chemtrails, and more. Tracing the chilling and lasting effects of conspiracies, cabals, and plots, *Secret History: Conspiracies from Ancient Aliens to the New World Order* exposes their deep reach in shaping today's world! Truly an eye-opening read!

Yesterday's Tomorrows Joseph J. Corn, Brian Horrigan, 1996-05-15 From Jules Verne to the Jetsons, from a 500-passenger flying wing to an anti-aircraft flying buzz-saw, the vision of the future as seen through the eyes of the past demonstrates the play of the American imagination on the canvas of the future.

**The First Space Race** Matt Bille, Erika Lishock, 2004 Offers an account of the competitive technological and political race between the United States and the Soviet Union and their leaders to launch satellites.

**Mad, Bad and Dangerous?** Christopher Frayling, 2013-06-01 From Victor Frankenstein to Dr. Moreau to Doc Brown in *Back to the Future*, the scientist has been a puzzling, fascinating, and threatening presence in popular culture. From films we have learned that scientists are either evil maniacal geniuses or bumbling saviors of society. *Mad, Bad and Dangerous?* puts this dichotomy to the test, offering a wholly engaging yet not uncritical history of the cinematic portrayal of scientists. Christopher Frayling traces the genealogy of the scientist in film, showing how the scientist has often embodied the predominant anxieties of a particular historical moment. The fear of nuclear holocaust in the 1950s gave rise to a rash of radioactive-mutant horror movies, while the possible dangers of cloning and biotechnology in the 1990s manifested themselves in *Jurassic Park*. During these eras, the scientist's actions have been viewed through a lens of fascination and fear. In the past few decades, with increased public awareness of environmental issues and of the impact of technology on nature, the scientist has been transformed once again—into a villainous agent of money-hungry corporate powers. *Mad, Bad and Dangerous?* also examines biographical depictions of actual scientists, illuminating how they are often portrayed as social misfits willing to sacrifice everything to the interests of science. Drawing on such classic and familiar films as *Frankenstein*, *Metropolis*, and *The Wizard of Oz*, Frayling brings social and film history together to paint a much larger picture of the evolving value of science and technology to society. A fascinating study of American culture and film, *Mad, Bad and Dangerous?* resurrects the scientists of late night movies and drive-in theaters and gives them new life as cultural talismans.

*The Facts on File Space and Astronomy Handbook* Joseph A. Angelo, 2009 Contains a referential glossary of astronomy-related terms, biographies of important astronomers and astronauts, and a chronology of notable events contributing to the science.

**Disney's World** Leonard Mosley, 1990-10-01 Documents the stunning accomplishments of Disney's imaginative genius. It is not a flattering portrait. *Library Journal*

**All Up** J. W. Rinzler, 2020-07-14 “With its fascinating personalities that only Rinzler could describe, All Up can’t be put down.”—David Mandel, Veep executive producer All Up plunges its readers into the cloak-and-dagger espionage and blitzkrieg battles of World War II that swirled around rocketry; it introduces them to extraterrestrial phenomena, secret organizations, and the nail-biting missions launched from Cape Canaveral—as well as the secrets and unknown history behind Apollo 11’s legendary trip to the Moon. All Up tells the incredible true story of Nazi Germany’s Wernher von Braun, Soviet Russia’s Sergei Korolev, and America’s Robert Goddard as they work feverishly to fulfill their countries’ technological, military, and geopolitical objectives while satisfying their own personal obsessions. Alongside the Space Age history is the strange but well-documented trail of UFOs—one that leads to a desperate struggle in the highest corridors of power. Who will control the alien technology for their hidden agendas during the Cold War? Secret services compete worldwide in that ruthless game—and no one is a more deadly player than the mysterious agent named Rachel, hot on the trail of war criminal, former SS Brigadeführer Hans Kammler.

**Blue Sky Metropolis** Peter J. Westwick, 2012-06-04 Like citrus, oil, movies, radio, and television, aerospace helped create Southern California and embody its values. Blue Sky Metropolis launches an entirely fresh consideration of an iconic industry that answered the immemorial hunger of the human race for flight and the future.--Kevin Starr, University of Southern California Blue Sky Metropolis presents an intriguing survey of a unique time in Southern California history, when cheap land and benign weather lured massive aerospace enterprises to the region—eventually serving as home to nearly half of the nation’s defense and space fabricators. Before there was a Silicon Valley, high-tech dreamers were on the loose in the Southland, creating inventions as diverse as the Voyager planetary spacecraft and the Stealth bomber. These highly readable essays help us understand how it happened—how Southern California shaped aerospace, and vice versa.—Charles Elachi, Director, Jet Propulsion Laboratory Peter Westwick has assembled a rich collection of essays that tell a wonderful story about the importance of the aerospace industry to Southern California and the importance of Southern California to the aerospace industry. There's technology, sociology, economics, geography, anthropology, and much more woven through the chapters. It's an ambitious project, but it succeeds in being interesting, informative, and entertaining.—Michael Rich, President and CEO, The RAND Corporation

**Chasing the Moon** Robert Stone, Alan Andres, 2019-06-04 JFK issued the historic moon landing challenge. These are the stories of the visionaries who helped America complete his vision with the first lunar landing fifty years ago. A Companion Book to the AMERICAN EXPERIENCE® Film on PBS® Going in depth to explore their stories beyond the PBS series, writer/producer Robert Stone—called “one of our most important documentary filmmakers” by Entertainment Weekly—brings these important figures to brilliant life. In 1961, President John F. Kennedy proposed the nation spend twenty billion dollars to land a man on the Moon before the end of the decade. Based on eyewitness accounts and newly discovered

archival material, *Chasing the Moon* reveals for the first time the unknown stories of the fascinating individuals whose imaginative work across several decades culminated in America's momentous achievement. More than a story of engineers and astronauts, the moon landing—now celebrating its fiftieth anniversary—grew out of the dreams of science fiction writers, filmmakers, military geniuses, and rule-breaking scientists. They include • Science fiction author Arthur C. Clarke, whose writing inspired some of the key players in the Moon race. A scientific paper he wrote in his twenties led to the U.S. beating Russia in one area of space: communications satellites. • Wernher von Braun, the former Nazi military genius who oversaw Hitler's rocket weapons program. After working on ballistic missiles for the U.S. Army, he was recruited by NASA to manage the creation of the Saturn V moon rocket. • Astronaut Frank Borman, commander of the first mission to circumnavigate the Moon, whose powerful testimony before Congress in 1967 decisively saved the U.S. lunar program from being cancelled. • Poppy Northcutt, a young mathematician who was the first woman to work in Mission Control. Her media exposure as a unique presence in this all-male world allowed her the freedom to stand up for equal rights for women and minorities. • Edward Dwight, an African American astronaut candidate, recruited at the urging of the Kennedy White House to further the administration's civil rights agenda—but not everyone welcomed his inclusion. Setting these key players in the political, social, and cultural climate of the time, and including captivating photographs throughout, *Chasing the Moon* focuses on the science and the history, but most important, the extraordinary individuals behind what was undoubtedly the greatest human achievement of the twentieth century.

**Learning from Mickey, Donald and Walt** A. Bowdoin Van Riper, 2014-01-10 Throughout its long and colorful history, Walt Disney Studios has produced scores of films designed to educate moviegoers as well as entertain them. These productions range from the True-Life Adventures nature documentaries and such depictions of cutting-edge technology as *Man in Space* and *Our Friend the Atom*, to wartime propaganda shorts (*Education for Death*), public-health films (*VD Attack Plan*) and coverage of exotic cultures (*The Awa Girls*, *Blue Men of Morocco*). Even Disney's dramatic recreations of historical events (*Ten Who Dared*, *Invincible*) have had their share of educational value. Each of the essays in this volume focuses on a different type of Disney edutainment film. Together they provide the first comprehensive look at Walt Disney's ongoing mission to inform and enlighten his worldwide audience.

**Saving the Magic Kingdom** Jeff Dixon, 2025-01-28 A nonstop thriller loaded with history, mystery, secrets, and fun, *Saving the Magic Kingdom* will take Disney fans on the adventure of a lifetime. The pandemic is finally over—at least that's what everyone thinks. People are starting to adjust to the new normal. While the planet is sick of hearing about viruses, in the Walt Disney World Resort, a new virus is emerging that threatens to forever change the world that Walt Disney himself dreamed of. But this virus is not like anything experienced before. Everything is under attack. No immunity. No vaccine. The only option is to find a cure before time runs out. And the clock is now ticking. Walt Disney left a secret behind that has the

potential to impact the world forever. Will this secret be discovered in time to save Walt Disney World? In a thriller that could be ripped from the headlines, once again, author Jeff Dixon combines heart-stopping fiction, faith, and Disney facts in *Saving the Magic Kingdom*. This stand-alone adventure builds upon the world that unfolds in the Dixon on Disney series, blending fact and fiction in an action-packed romp through Walt Disney World that Disney fans will love.

**America in the Fifties** Andrew J. Dunar, 2006-11-07 Blessed by a booming economy, the United States experienced the benefits of technology in the 1950s, with television and the automobile transforming the way people lived, and the space race offering new challenges. At the same time, the nation faced domestic divisions and international crises that would have far-reaching historical and political consequences. The 1950s evoke images of prosperity, suburbia, a smiling President Eisenhower, cars with elaborate tail fins, Elvis Presley, Marilyn Monroe, and the golden age of television—seemingly a simpler time in which the idealized family life of situation comedies had at least some basis in reality. A closer examination, however, recalls more threatening images: the hysteria of McCarthyism, the shadow of the atomic bomb, war in Korea, the Soviet threat manifested in the launch of Sputnik and the bombast of Nikita Khrushchev, and a clash over the integration of public buses in Montgomery, Alabama, and a high school in Little Rock, Arkansas. Andrew J. Dunar successfully shows how the issues confronting America in the late twentieth century have roots in the fifties, some apparent at the time, others only in retrospect: civil rights, environmentalism, the counterculture, and movements on behalf of women, Latinos, and Native Americans. The rise of the beats, the continuing development of jazz, the emergence of rock ‘n’ roll, and the art of Jackson Pollock reveal the decade to be less conformist than commonly portrayed. While the cold war rivalry with the Soviet Union generated the most concern, Dunar skillfully illustrates how the rise of Nasser in Egypt, Castro in Cuba, and Communist regimes in North Korea, Vietnam, and China signaled new regional challenges to American power. This book will be ideal for instructors of American history survey courses at the high school and undergraduate levels.

*German Rocketeers in the Heart of Dixie* Monique Laney, 2015-06-23 This thought-provoking study by historian Monique Laney focuses on the U.S. government-assisted integration of German rocket specialists and their families into a small southern community soon after World War II. In 1950, Wernher von Braun and his team of rocket experts relocated to Huntsville, Alabama, a town that would celebrate the team, despite their essential role in the recent Nazi war effort, for their contributions to the U.S. Army missile program and later to NASA’s space program. Based on oral histories, provided by members of the African American and Jewish communities, and by the rocketeers’ families, co-workers, friends, and neighbors, Laney’s book demonstrates how the histories of German Nazism and Jim Crow in the American South intertwine in narratives about the past. This is a critical reassessment of a singular time that links the Cold War, the Space Race, and the Civil Rights era while addressing important issues of transnational science and technology, and asking Americans to consider their country’s own history of racism when reflecting on the Nazi past.

**Disney's Land** Richard Snow, 2019-12-03 A propulsive history chronicling the conception and creation of Disneyland, the masterpiece California theme park, as told like never before by popular historian Richard Snow. One day in the early 1950s, Walt Disney stood looking over 240 acres of farmland in Anaheim, California, and imagined building a park where people “could live among Mickey Mouse and Snow White in a world still powered by steam and fire for a day or a week or (if the visitor is slightly mad) forever.” Despite his wealth and fame, exactly no one wanted Disney to build such a park. Not his brother Roy, who ran the company’s finances; not the bankers; and not his wife, Lillian. Amusement parks at that time, such as Coney Island, were a generally despised business, sagging and sordid remnants of bygone days. Disney was told that he would only be heading toward financial ruin. But Walt persevered, initially financing the park against his own life insurance policy and later with sponsorship from ABC and the sale of thousands and thousands of Davy Crockett coonskin caps. Disney assembled a talented team of engineers, architects, artists, animators, landscapers, and even a retired admiral to transform his ideas into a soaring yet soothing wonderland of a park. The catch was that they had only a year and a day in which to build it. On July 17, 1955, Disneyland opened its gates...and the first day was a disaster. Disney was nearly suicidal with grief that he had failed on a grand scale. But the curious masses kept coming, and the rest is entertainment history. Eight hundred million visitors have flocked to the park since then. In *Disney's Land*, Richard Snow brilliantly presents the entire spectacular story, a wild ride from vision to realization, and an epic of innovation and error that reflects the uniqueness of the man determined to build “the happiest place on earth” with a watchmaker’s precision, an artist’s conviction, and the desperate, high-hearted recklessness of a riverboat gambler.
